government when the time arrives will rally to Democracy's Standard Bearer and knock the Do-nothing-Party into a cocked-hat, as there was never a better time. I repeat it, Woodrow Wilson's administration eclipses them all, and B the greatest in all the annals of history. President Coolidge says, "He filled the world's eyes and literally was the foremost man on the Planet." He gave utterance to the aspirations of humanity with an eloquence which held the attentions of all the earth, and made America a new and enlarged influence in the destiny of mankind. He has left a name that will be enshrined forever in the hearts of men who love justice and right, liberty and equality, as the symbol of the loftiest ideals which will extricate human kind from the mesh of barbarism, and lead it to a state of real and true civilization. Says the late Henry Clay in one of his eulogies, "Let him rest amid the tokens of freedom which he so much loved. Let him sleep on where the whistling of the tameless winds; where the ceaseless roll of the murmuring waters; where the chirping of the wild bird, and all which speaks of liberty may chant his eternal lullaby. Peace be with his soul. May the earth lie light upon him, and the undying laurel grow green over his grave."

"The Best Fertilizer I Ever Used"

Williamston, R. F. D.
Pamlico Chemical Company,
Washington, N. C.

Gentlemen:
My experience in using Pamlico Fertilizers is that when a farmer once gives them a fair trial, all the cut price agents this side of Calcutta can't jar them loose from you. I have always found your goods cheapest in the end. I don't believe in trying to save money on the price of fertilizers when the saving is at the expense of quality. I tried this one year to my sorrow and learned my lesson.

The past year I averaged on my entire tobacco crop, 1,202 lbs. to the acre at a net price of \$407.56 and with a bad season, too.
I can conscientiously say I believe they are the best fertilizers on the market today and worth at least 25 per cent more than some others sold in my neighborhood.
Yours truly,
M. B. WARD.

Why Do people say this so often about Pamlico Fertilizers?
It is because of the superior quality materials, the curing process they go through, their fine mechanical condition.
Try them this year.
