

BUILD NOW!

No Lack of Materials Now to Retard the Building of Homes

Year Round Comfort

No feature in your new home will contribute more to year-around comfort than the heating, plumbing, and sanitary installations when backed by our guarantee. It is not too much to say that the factors of heating, plumbing and sanitation largely control the success of home building.

Therefore, with such facts known to you, we feel certain this firm will be called upon to submit bids which when judged fairly—price, quality, and service being equal—will add your name to our list of satisfied customers. A complete line of newest improved and sanitary fixtures to choose from and at lowest possible prices.

LET US SHOW YOU

W. E. Dunn

Williamston, North Carolina

The United States government says, "Build Now," because homes are needed.

Bankers and dealers in investment securities say, "Build Now," because they have money tied up in their vaults for this safest of all investments.

Dealers in building material say, "Build Now," and they are putting the cost of their ware down as low as possible to encourage immediate building.

Churches say, "Build Now," for the home owners are the staunch supporters of Religion.

Cities, towns, and villages; industrial corporations, manufacturers, philanthropists, educators, professional people, mechanics, politicians—all say, "Build Now."

"Because there are not enough homes in the United States to fill all needs. It is the demand which influences conditions. If more homes are needed they will be built. There is plenty of money in the banks to do this. There is plenty of lumber, plenty of brick, plenty of cement and plenty of every other material. The war sopped house building except for government purposes.

What is true everywhere is true in your own town. Scores of people would like to live in their own homes. There is hardly a block in which one or more families would not like to move out of rented house and occupy their own home. A big proportion of those people will have "pep" enough to carry out their idea. All they need is a little encouragement; a practical demonstration of what owning your own home means.

The House in the Picture

Above is an ideal home for the average sized American family requiring six rooms, a big sleeping porch and a bath. It occupies a ground space of 24 by 36 feet and is the

last word in economy of construction. On the ground floor the living room is at the front at the left of the vestibule and stairs. The dining room is at the rear, directly off the kitchen. Upstairs are two fine bedrooms, both with plenty of closet space. A sewing room or den is at the front, directly above the vestibule. This room can be utilized as a single bedroom if desired. There is a half-way landing on the stairs which can be made into a cozy nook. Big double French doors open off the living room to the hall and

REFRIGERATORS, ICE BOXES, AND ICE CREAM FREEZERS

If you are in need of a refrigerator, ice box, or ice cream freezer, now is the time to buy it. You will be practicing economy to buy it early and save money on foodstuff that would otherwise spoil on these warm spring days. We have a complete line of new refrigerators, ice boxes, and ice cream freezers in many different sizes.

B. S. Courtney, Furniture

It's an Investment in Contentment Comfort and Happiness

Pride of ownership is one of man's strongest emotions. It brings with it a sense of satisfaction hard to describe. Once established and enjoyed, however, many men have quickly climbed on to real success in life.

The building and loan companies of this nation could fill volumes in telling of the achievements of "just ordinary" men who found themselves through this method of home owning.

If you are not familiar with the building and loan plan, but wish to own a home of your own, we wish you would call at our office and let us explain in detail. It will be the best investment of time you ever made.

ROANOKE SUPPLY COMPANY

Manufacturers and Dealers In
BUILDING MATERIAL
WILLIAMSTON, N. C.

April 10, 1925.

To the public:

We are opening a building supply warehouse in your city, and will be in a position after April 15th to furnish your entire needs in lumber and building supplies from our well-assorted stock that is arriving daily.

We have made a careful survey of the building costs in this territory, and we have found that you have been paying extremely high prices for the material that goes into your dwellings. This, we believe, is due entirely to the way that you have been forced to buy your goods. Some you would have to get from one man and some from another, and this always runs the cost of building much higher than your cost should be.

Our connections enable us to buy our goods at much lower prices than the majority of concerns in our same line of business, and we are going to pass this advantage on to the people of this community and give those who have thought of building homes and have put it off on account of the high prices, a chance to now build the home they have planned. We honestly believe that we can save you at least 25 per cent on your entire bill.

We will also have a modern wood-working plant in connection with our business, and will be prepared to make for you anything that is made of lumber. We will be glad to receive all inquiries and quote you our prices on all your work of any kind.

Let us make and hang all your screens and put in your French doors NOW, as we expect a rush on these items soon, and you save money by buying them now, as screens, especially, will be in great demand soon. We have found it difficult to fill orders for these during the summer and would suggest you getting yours now and have them hung and painted.

We want everyone who contemplates building to come to see us, and see how we are prepared to give you service and quality goods at a much lower price.

Soliciting your inquiries and patronage, we are,

Yours to serve,

ROANOKE SUPPLY COMPANY.

"EVERYTHING TO BUILD ANYTHING"
