

DAIRYING - AT HOME AND ABROAD

Amsterdam, Holland
Thousands of tons of Dutch cheese like those in the picture are consumed annually. A big percentage is exported. Holland is one of the most productive dairy countries, size considered. The most intensive and scientific methods are practiced. Cow feeding associations are numerous.

Chile, South America
A South American Milkman
This picture was taken in Ancon, Chile Island, Chile. A can of milk along on either side of a milk or some other native beast of burden and a quart measure are all this milkman needs to serve his trade. The quart measure has seen hard service. The lady customer wears an insect look-on the lookout for short measure.

Lawville, N. Y., U. S. A.
This Cheese Dairy Growing at Great Loss
It took \$7,388 lbs. of milk to make it. They do things in a big way in the U. S. A. You may be sure that it is good to eat too, because scientific methods, up-to-date housing facilities and complete sanitary measures all enter into the production of milk in America's greatest dairy state.

Seattle, Washington, U. S. A.
Septa Fictoria Prospect's Best Champion
Her home is on Carnation Milk Farms, Seattle, Washington, N. A. Trust Manager says: "We furnish sterilized milk especially for babies. It is necessary to keep our milk in the very best of condition." Clipping increases productive capacity and decreases bacterial count. Septa Fictoria Prospect is one of a herd of 170 milk cows.

New Zealand
Early in the Morning the Milkman Arrives
Wellington, N. Z. milk supply is all under the control of the City which permits no milk to be sold except that which has been inspected and certified by the Health Officer. The City buys the milk from the farmers and allows peddlers to sell it at a fixed price—no profiteering here.

Antwerp, Belgium
The Lady Milkman Makes Her Daily Trip in Her Dog Chaise
In Belgium, you know, as well as in Holland, it is a very common thing to see a team of dogs hitched to a milk wagon, but usually the owner of the team gives them a helping push. This lady must have been tired or she would surely have helped out her little team.

Dairying at Home and Abroad
The production of more milk, richer milk, purer milk starts months ahead where dairying is done on real business standards. Extreme care is given in rationing, housing and sanitation of the dairy farms.

State College Summer School Begins June 15

The State College Summer School begins on June 15 and closes July 24. The announcement of courses has been published and may be secured by those wishing to attend.

Eggs Closely Approach Being a Perfect Food

Eggs are valuable as a food because they contain protein, fat, minerals, and vitamins in a readily digestible form. According to Dr. B. F. Kaupp, of State College, they approach closely to being a perfect food.

132 Hours Man Labor Needed to Acre Cotton

It takes 132.5 hours of man labor and 59.6 hours of mule labor to produce an acre of cotton, according to findings secured by the United States Department of Agriculture in Georgia.

Small Garden Shows Net Profit of \$47.38

One experiment station kept a record for three years on a garden plot, one-twentieth of an acre in size. The average net profit was \$47.38.

TOM TARHEEL SAYS—
"The life of an expert must be a hard one, because he is always expected to make some big change."

Returns to Tarboro
Mrs. Clyde Anderson returned to Tarboro yesterday after spending several days here with her parents, Mr. and Mrs. J. H. Britt.

EVER TRY PHOSPHO LAND PLASTER on sweet potatoes? It improves quality and increases the yield. For sale by C. B. Hassell.

Your Baby

Summer months are difficult months for the mothers of young children. Great care should be taken to prevent little ailments from developing into serious sickness.

A little precaution is all that is necessary. Prompt attention and administration of mild and harmless remedies (which we will prescribe) will keep baby well. Stock your cabinet now and be ready for little overnight complaints.

For Baby's Summer Comfort

This 15th day of April, 1925.
ELBERT S. PEEL, Trustee.

Concrete for Appearance

as used on the farm of Dan Leshner, Waynesboro, Pa.

Concrete on the farm indicates progress, success, and prosperity. It helps the farmer make more money; makes his work easier and lets him work quicker. It makes a farm a more attractive and more efficient business place. You may not desire a "show place," but you must admire the permanency, economy and freedom from repair expense which come with Concrete Improvements on the farm.

Build with Concrete, and you need build but once. Concrete never rots, rusts, burns or wears out. It is the farmer's easiest-to-work, least expensive and most lasting building material. When you think of new farm improvements, ask any Security Cement dealer how to make them with Concrete; or write direct to the manufacturer for helpful information.

WHOLESALE DISTRIBUTORS, WASHINGTON, N.C.

Don't Trust to Luck

You've worked hard—and saved long for that home you are going to build—so exercise as good judgment in your choice and selection of materials that are to go into it.

When you buy lumber and other building materials at home—from a home dealer—you do not have to trust to luck in what you get.

Come to our yards and let us submit plans or go over the plans you have and help you decide just what you want. All of our experience in materials is at your beck and call. You can personally inspect materials and have the right to exchange (without expense) all deliveries that do not please you.
