YOUNG PEOPLES' SERVICE LEAGUE PICNIC WEDNESDAY

The Young Peoples' Service League of the Episcopal Church enjoyed a picnic at Riverside Park Wednesday afternoon. After a delightful swim a bounteous lunch was served. Chaperones were Rev. and Mrs. C. O. Pardo, Messdames P. H. Brown, Della L. Carson, Clayton Moore, and Miss Anna Crawford.

Here From LaGrange

Messrs. John Phelps and J. E. Measley, of LaGrange, were visitors here yesterday.

Here On Business

Messrs. Timberlake and Willard who will run Timberlake's Warehouse here this season, were in town yesterday attending to business matters.

Here From Hamilton

Mrs. J. P. Boyle and Mrs. Fannie Matthews, of Hamilton, were visitors here yesterday.

Guest of Mr. Norman

Mr. H. B. Mask, of Raleigh, is the guest of Mr. Milton Norman.

Attorney Cooper Here Yesterday
Attorney George Cooper, of Kinston was a business visitor here yesterday.

Mr. Taylor in Town

Mr. Henry D. Taylor, of near Bear Grass, was a pleasant visitor in town this week.

Joe Carroll Here Yesterday

Mr. Joe Carroll, of Aulander, was in the city yesterday.

Here From Hamilton

Mr. B. F. Hughes, of Hamilton, was in town Wednesday night.

Dr. Pritchard Here Yesterday

Dr. Pritchard, of Windsor, was a business visitor here yesterday.

Here Yesterday

Mr. John Phelps, of LaGrange, was a business visitor here yesterday. Mr. Phelps will auctioneer for the Roanoke and Timberlake's Warehouses the coming season.

Here From Greenville

Mrs. R. F. Heydenreich, of Greenville, was here yesterday, visiting relatives and friends.

To Spend Week End in Spring Hope

Mr. Charles Godwin, jr., will spend this week end in Spring Hope visiting friends.

Messrs. Leslie Powden and Bill Watts made a business trip to Aurora yesterday. They report the crops in that section as being very good.

Mrs. L. B. Wynne, Mrs. J. A. Manning, Mrs. Roger Critcher, jr. and Mr. Bruce Wynne are visiting relatives in Robersonville today.

Mr. Tom Crisp of Conetoe is a business visitor in town today.

Mr. Harry M. Stubbs made a trip to the State farm yesterday.

Mr. N. K. Gurganus of Spring was a business visitor in town this morning.

Messrs. Lyman Britt and Bruce Wynne will visit in Windsor this evening.

NOTICE OF ADMINISTRATION
Having this day qualified as administrator of the estate of Mrs. Martha D. Roberson, late of Martin County, all persons holding claims against said estate are hereby notified to present same for payment on or before June 13, 1926 or this notice will be plead in bar of their recovery. All persons indebted to said estate will please make immediate payment of debts. This June 13, 1926. W. M. Harrison, administrator of the estate of Martha D. Roberson. 6-16-6

NEVER BE WITHOUT IT for it immediately cures sudden, severe, colicky pains and cramps in stomach and bowels, deadly nausea and vomiting diarrhoea. For children and growing men.
CHAMBERLAIN'S COLIC AND DIARRHOEA REMEDY
A very necessary home remedy.

Get your lolly-pop "icebergs" from "Harry" at Clark-Bennett's.—Adv.

Here From Goldsboro
Mr. H. L. McAllister, of Goldsboro, has been in the city this week attending to business.

Leaves for Richmond Tomorrow
Mrs. Al Clapp will leave tomorrow for her home at Richmond, after visiting her mother, Mrs. Myrtle Harris.

Leaves for Richmond Sunday
Miss Pattie Harris will leave Sunday for Richmond, after spending her vacation at home.

Spend Wednesday in Wilson
Messrs. T. B. Brandon and Bruce Wynne spent Wednesday in Wilson.

In Wilson Wednesday
Messdames J. O. Manning, R. F. Pope, and C. I. Hunt spent Wednesday in Wilson.

IN LOVING MEMORY OF OUR LITTLE BABY, DOLLIE RAYNOR

(Printed by request)
On June 6th, 1925, angels came and took her;
With her eyes of azure blue,
Took her to our Father's home in heaven,
Where all's so good and true.

Dolly left us in our anguish,
With our hearts filled with despair;
But we're sure we shall see and know little Dolly
Waiting on the golden stair.

Dolly's life was just a tiny bubble
In this sad world of ours.
Now we know she's safely resting
In that holy land of flowers.

Oh, how hard we tried to save her;
Prayers and tears were all in vain.
Angels came and took her
To that land where all is joy and there's no pain.

On that bright and glorious mansion,
With the God who gave us life,
We can almost see little Jack and Dolly
As they play beside the river of life.

When our life on earth is ended
And our trials here are o'er,
If we'll only live right we shall see them,
We shall meet them waiting on the golden shore.
(By her mother.)

IN MEMORY OF GEORGE DANIEL GURGANUS

(Printed by request)
In love memory of my dear father, who died July 1, 1916, just about nine year ago.
As I travel this world over
Friends I find wherever I roam;
But to me there's none like father,
None like father dear and home.
Precious father, how I love him,
How my heart abounds with joy!
For there's none more true or tender
Than a father to his boy.

I remember well how father
Used to soothe the slightest pain;
With his tender words and kisses
He'd soon make me well again.
They may treat me very kindly,
Give me welcome everywhere;
Yet 'tis not, but just reminds me
Of my loving father's care.

Oh, how oft I wept and pondered
O'er my life when far away;
Far from home in sin I'd wandered,
Still my father dear would pray.
Precious father, how I love him;
As I think of him so dear;
Oh, there's naught more true and tender
Than a Christian father's care.

AN OUNCE OF PREVENTION IN BOLL WEEVIL CONTROL

"Noah was six hundred years old before he knew how to build an ark—don't lose your grip."—Elbert Hubbard.

By G. A. CARDWELL
(Agricultural and industrial agent Atlantic Coast Line Railroad Co.)
Soon reports will be coming in telling of the formation of squares and of the first blooms on this season's cotton plants. Year after year the business world at home and abroad awaits, with the deepest interest, information as to preparations made for growing and the condition of the new cotton crop.

Effects upon the growing plants due to land preparation, seed and weather conditions, fertilization, cultivation, etc., are closely studied, and any variations from normal conditions are very quickly reflected on the cotton exchanges at New Orleans, New York, Liverpool, and in the business offices of thousands of mills and business houses all over the world, for the people of all nations must be clothed over and over again with cloth made from the snowy fibers of the cotton plant.

In advance of square formation and bloom information official reports as to the emergence this season of boll weevils indicate an unusually heavy emergence of hibernated weevils. In other words, many more adult weevils lived through the winter and have come out to feed on the young cotton plants than was the case last year. As soon as squares form, the female weevils will begin puncturing them and laying eggs in the punctured squares, from which will be hatched millions upon millions of weevils whose chief business it will be to destroy the 1925 cotton crop.

If arrangements for pre-square poisoning have not already been made, do not put this off. Get your machine or machines and your calcium arsenate, and make ready to fight to save your crop. Do not let the weevils beat you to it.

The value of last year's cotton crop to Virginia, North Carolina, and South Carolina was \$172,770,000, exclusive of the value of the seed, quite a large part, 25 per cent, of the agricultural wealth produced. This wealth is well

worth protecting by direct as well as indirect control methods.

Pre-Square Poisoning
It is important that a pre-square poisoning application be given wherever hibernated weevils appear fairly abundant on the young cotton (20 or more weevils per acre). Treatment should be applied at the first indication of squaring. The treatment should be repeated if appreciable numbers of weevils are evident before the first blooms appear. At this time and for this particular treatment the grower may use either of the following:

(a) Home-mixed molasses-calcium arsenate mixture (usual formula one pound of calcium arsenate, one gallon of molasses, one gallon of water, or with extremely heavy infestation and with frequent rains, a stronger and more expensive mixture, containing 2 pounds of calcium arsenate, one-gallon table quality of syrup and one-half gallon of water, which may give quicker killing and better control). In syrup mixtures the syrup must always be sweet and unfermented, and should be applied within 24 hours after being mixed. The usual application required is about one gallon per acre, and is applied by using a home-made mop to sprinkle a few drops into the tip of the plant, or—

(b) Straight calcium arsenate applied by machine, or at the pre-square stage only the dust may be shaken from a bag with equal effectiveness while the weevils are feeding in the tips of the plants. The flag treatment is not effective on lace, fruiting cotton.

Any pre-square treatment may need to be followed up by later dusting to secure maximum profit through protection against reinfestation, such as will always be liable to occur.

Poisoning Fruiting Cotton
For the treatment of fruiting cotton generally and especially on soils capable of producing one-third bale or more per acre normally, the calcium arsenate dusting method is the most reliable and profitable and is strongly recommended in preference to late season applications of any syrup mixtures or other liquid poisons yet tested.

Dusting should begin when 10 per cent of the squares show weevil punc-

4. The infestation count will tell you when to use poison.
5. Any county demonstration agent or other agricultural field worker will show a farmer how to make an infestation count and poison weevils.
To make an infestation count select an average looking row and examine every plant as you come to it; look in every square big enough to be attacked by a weevil. Pull back the three leaflets that surround the bud and examine the bud carefully for the weevil, punctures, either egg or feeding punctures. Count each square as you examine it and pick off all which are punctured and hold them in the hand or put them in the pocket until you have counted one hundred. Then count the number of punctured squares in your hand or pocket and this number will be the percentage of infestation. When 10 or more squares out of each hundred are punctured begin poisoning.

3. Any county demonstration agent or other agricultural field worker will show a farmer how to make an infestation count and poison weevils.
To make an infestation count select an average looking row and examine every plant as you come to it; look in every square big enough to be attacked by a weevil. Making A Hit!

Enterprise printing is the kind to put your message across so that it will yield the maximum results at minimum cost. Whether you want the cheapest handbill or the highest type of circular printing, we want you to come in and see our samples. We are better equipped now than we have ever been, and we are more interested in turning out printing that will get results than we are in producing slipshod work that is expensive at any price. For all that, our prices are as reasonable as are consistent with good printing.

That Enterprise printing is making a hit is evidenced by the large amount of better printing that we are turning out for our customers every day. Before you have your next job printed come in and talk it over with us.

We are in a position to offer you unparalleled service. In addition to printing, we will prepare your copy and do the mailing for you, as well as take care of the other details of the work.

We are prepared to put on entire advertising campaigns for you, either newspaper or direct-by-mail. Call 46 and a representative will call.

Concrete Improvements
that are Making Work Easier for Farmers Everywhere

Permanent, expense-proof Concrete Improvements like those shown above, save time, trouble and money which would otherwise go to keep ramshackle buildings fit for use. Concrete is the farmer's safest, most satisfactory and least expensive building material. Concrete lasts forever; it never rots, rusts, burns or wears out.

Any farmer can put in needed Concrete Improvements because the things that make Concrete are the easiest materials for the farmer to work with. The few dollars he spends will not be one-tenth what his finished job will be worth in added value to his place, in time, trouble and work saved, and in greater profits from land and stock. Ask any Security Cement dealer how you can use Concrete; or write direct to the manufacturer for helpful information.
