THE PRICE OF TOBACCO

Every year you can hear the price of tobacco being discussed. Some say it will be a little cheaper, and we all hope it will be higher. But what tobacco will sell for we don't know.

We do know, however, that the farmer who sells his tobacco with us will get the highest market price. He will get the best service possible on our floor, and last but not least he will get the personal attention of both of us.

We will again operate the Dixie Warehouse this season for the sale of tobacco at auction. We cordially invite everyone to visit us whether you have tobacco to sell or not.

How a Pennsylvania Farmer Uses Concrete!

Concrete Improvements on the Farm of Wm. R. Stover, near Greencastle, Penna.

Concrete Conveniences like those shown above make any farm a more efficient business place. They save the farmer's time, make his work easier, let him work quicker, and make his place more profitable. Concrete work on the farm does not cost a lot of money. First cost is usually very low because the farmer can do most of the work himself. But first cost is the only cost, because Concrete never wears out; never needs expensive repairs; never burns, rots, rusts or decays.

Plan now to put in those improvements you have always wanted. The few dollars you spend will be a small price to pay for the convenience and service they will give you. Ask any Security Cement dealer how you can do it yourself or write to the manufacturer for helpful information and practical working plans.
