REVIEW OF MARTIN COUNTY TAX **QUESTION FOR 25 YEARS PRESENTS** SOME VERY INTERESTING FIGURES

Sixteen-Year Period By Former Sheriff

RECORD FOR STATE

Martin county finance is now a subject much discussed by the people of this county. Naturally the rapidly growing tax rate arouses the people causing them to wonder where

All public money comes from the tax payers, and, of course, should go back to them in the most beneficial way possible. The school is, of course the greatest of all the public institutions built by public taxes. Then comes the public roads, the courts, the homes for the poor and the unfortunate

The taxing plan in this State is to have every property owner to come before the tax lister once each year and list his property for taxation. After all property is listed, it then goes into the hands of the County Commissioners, where a complete ab stract of the taxpayers is brought together and certified to the Sheriff of the County. Here is where the sheriff comes in with the big job of collect ing every item on the entire list.

Listening in on the general rabel one would think that there are large sums of money lost by the County each year because people do not pay their taxes. We seem to be living over, or on a crater of suspicion which ever flows with criticism Some, perhaps are just, but the mos part are without grounds.

It will interest the taxpayers of this county to know just how much has been lost by Martin during the past 25 years through the failure of the sheriffs who have served as tax collectors during that period.

Beginning with the first tax list collected by the late J. C. Crawford, we find that in 1899, he only lacked \$205.03 of turning in as much as he was charged with. During the year he found and collected in property and poll tax that had not been listed \$24.97. The insolvent list added to all errors and relief orders made a total deduction of only \$230.00 from which sum the unlisted taxes picked up by the Sheriff brought the net loss from the total tax list to the sum of

In 1900, he collected the full a ount certified to him except \$180.50. That year he picked up and collected the sum of \$77.03 from parties who had failed to list their property and poll tax, making a total net loss of where he lived. \$108.47 from insolvent errors in tax list and relief orders by the County Commissioners. In 1901, the total insolvent list, errors and relief orders by the Commissioners amounted to \$307.40 less \$68.14, leaving a net loss to the County of \$289.26.

In 1902, insolvents, errors in list and relief orders amounted to \$308.47. The unlisted taxes found and collected by the Sheriff were \$55.22, net loss to the County amounting to \$253.21. The year 1903, insolvents, errors and reliefs amounted to \$329.87. Unlisted taxes found and collected amounted to \$84.17, net loss being \$245.70.

For the year 1904, insolvents, re-liefs and errors totaled \$270.51 less unlisted items \$216.20. Net loss to the County being \$54.31. For the year, 1905, the total loss

FORD ANNOUNCES IMPROVED LINES

Goes to Colors in Closed Cars; Many Other Refinements Made; Brakes are Larger, More Powerful

Body changes and chassis refinements more pronounced than any made since the adoption of the model T chassis were announced yesterday by the Ford Motor Company. There will be no advance in price, it also was stated that production at the Norfolk branch should start by the first week in September.

Outstanding features of the im provements in both open and enclosed types are lower, all-steel bodies or a lowered chassis, complete new design in most body types, a change from black to color in closed cars larger, lower fenders newly designed seats and larger, more powerful brakes.

Longer lines, effected through higher radiator and redesigned cowl and bodies are apparent in all the improved Ford cars, but are especially pronounced in the open types. Wide crown fenders hung close to the wheels contribute to the general effect of lowness and smartness.

While runabout and touring car remain in black, the closed bodies are finished in harmonic schemes, enhanced by nickel radiators. The coupe and tudor bodies are finished in deep channel green, while the fordor -is rich Windsor Maroon.

Greater comfort is provided for driver and passengers in both open and closed cars by larger compart ments, more deeply cushioned seats and greater leg room.

Many new conveniences are also ncorporated in the improved cars. In the runabout, touring car, coupe, and tudor, the gasoline tank is under the cowl and filled through an ingeniously located filler cap completely hidden from sight by a cover similar in appearance to a cowl ventilator. One-piece windshield and narrowed pillars in the tudor and coupe offer the driver greatly increased visibility and improved ventilation.

Driving comfort is materially reased by lower seats, scientifically mproved back rests, and lowered steering wheel. Brake and clutch pedals are wider and more conveniently spaced.

Four doors are now provided on the touring car and two on the runabout permitting the driver to take his place from the left side of the car. Curtaions, held secure by rods, open with the doors.

Most important in the mechanical changes are the improved brakes. The transmission brake drum and bands have been considerably increased in size which gives the foot brake softas longer life. The real wheel brake A motion was made and seconded drums are larger and the brake of

MARTIN AND BERTIE **BEGINNING TO KNOW** EACH OTHER BETTER

Brief Sketch of Bertie County As Seen By Visitor

Many generations come and went in both Martin and Bertie counties, neith er knowing of the existence of the other. Yet like Columbus, the peoples of both counties seemed to have a faint feeling that something lay beyond the great yellow Roanoke and the wide swamp skirting its borders

Geographiers began to teache that he earth was round confirming the vague idea which had existed among the people that there was really a land beyond.

Then legends began to float across telling us of a people as good as we a people who daily viewed the same sun as we and women fair, who would sit and gaze at the same moon a they do everywhere.

The knowledge of each other be gan to increase and as we knew more we care more. As our cares increased our efforts extended until we said to transporting liquor and William Crew them and they said to us, "Let's ome together.'

Then grew the great Roanoke oridge, which united the counties and present and a judgment, nisi, scifa made us one.

We found our neighbor greater than counties of all North Carolina. Bermore than 3,000 greater than our own. greater than Martin.

The name of the County came from James and Henry Bertie, who were two of the lord proprietors, and they together owned one eighth of all court passed a verdict confirming

Carolina at one time... There are many good things that can be said about Bertie county, both appeal to visitors.

In a day's journey from the Spel ler's ferry farm, going southeasterly and skirting the Roanoke river may be seen some of the finest farms in all this State. The Cedar Landing farms, the Mooring farms and others hard to beat,, and though they have been farmed under the tenant system for more than fifty years they produce good crops now. They are oc cupied exclusively by negroes.

The inhabitants are honorable, substantial citizens, really an unusually churches and adequate schools.

Passing through the Roanoke section, you find yourself in the Cashie Oak City, H. M. Ainsley, principal, Neck neighborhood where may be neighborhood.

The center of this community is Woodard, where a post office and sev-Hamilton, J. L. Jones, principal, 7th. eral good country stores are located. Driving still east, we cross the open at various times next month, Cashie and pull down the gas until but not later than November 1, are: we reach the Chowan section. This is impossible with an enrollment in the first grade of about forty pupils. First grade students may enter in September and January in compliance with above.

Your County Health department has already called your attention to vaccination. Therefore, please do not allow your child to enter school without being vaccinated. All teachers in Martin county must be vaccinated or show reason why they should not be, and receive a health certificate from a well-known doctor. These matters aid in safeguarding not only your own health, but your neighbor's

health also. Give your boy or girl the implements with which to work. This not only means books, etc. but a room at nome where certain specified hours may be used in study, certain hours used in "helping around the house". and certain hours for recreation.
