T life large demand for both feeder and fat cattle, finds the sears-Roebuck Agricultural Foundation in its cattle marketing investigations, has inspired a much greater confidence in the future of the industry. The first recovery of the beef cattle market came early in 1925 with a steadily progressing trend of prices from February to August. The average prices paid to formers, states the Foundation, in the first ten months of the year ran 65 cents higher than the prices of last year and the highest since 1920. Chicage prices were also the highest for that period for the last five years.

Liquidation of western cattle herds was much less noticeable in 1925 than in any year since 1919, showing that the cattle industry is gradually getting back to a state of normalcy. The total number of cattle, slau, federal inspection in 1925, was 5 per cent greater than in 1924. The total number of cattle, slaughtered under

recertion in page, was a per cert greater than in 1953. Baby beef, made from young gattle that have been pushed to a desirable market weight of around 1,000 pounds at an early age, brought the highest prices. Public denand for smaller cuts of choice beef have made the half-too baby, beef popular on the market.

SAVAGE EVOLUTION. ELECTRICITY'S BABYHOOD. POOR OLD BEELZEBUB. A BOOMING NATION.

Some African savages believe that gorillas and chimpanzees can talk, but hide their knowledge, lest they be put to work.

Other savages have an evolution theory of their own. The Batagni, Congo natives, tell the Rev. H. C. Graham that monkeys are descended from men that have been disgraced.

"We are better and prouder than the apes," say these practi-cal black men, "therefore we cat them."

Samuel Insull tells the world that electricity is only beginning its work. We are a little way, but not far, from the savage that fell

not far, from the savage that fell down and worshipped an unknown malignant devil when the light-ning flashed. Railroads will soon change from steam to electric power, and that will call for twenty-four billion more hours of kilowatt energy, says Mr. Insull. Farms will be "wired" for electric light and power.

Most encouraging is the pre-diction of Elmer Schlesinger, Louis Levy's intellectual and dashing young law partner. Elmer Schlesinger says electricity, in this century, will do for the world's troubles and debts what steam did for the world in the last century, after Waterloo, Europe and the nations were called "hope-lessly" bankrupt. In proportion, their debts were greater than they are today. Steam came and debts wave paid with the greatest case.

11.12

so easy, simply prove that when you try to regulate human nature, you invite trouble. "The cat will mew and the dog will have his des".

Milwaukee supplies an account of miraculous exorcism, believed by many, deeply religious, to have been the actual driving out of a devil from the body of an un-fortunate insane woman.

The account of the miracle runs as follows: A woman whose mind had become unbalanced was carried to the Chapel, of St. Joseph's Hospital, where the "exorcism ritual" was performed, in Latin, not understood by the nation.

patient. The question "Who are you?" was answered, apparently from the throat of the woman in a deep masculine voice, "BEELZEBUB." Asked why he had taken posses-sion of the woman, Beelzehub re-plied, "BECAUSE OF MALEDIO-TION." The fiend promised to leave the woman at 2 vicesk that afternoon, but did not actually leave until half-past 5, which is about what you would expect of a demos. The woman then relaxed and is getting bettes.

This miracle, not as yet vouched for by church authorities, was an everyday occurence in the mid-
