CAPITAL BEING TIED UP IN IDLE SECURITIES

Tax exemption seems to be shifting much of the money of the country to idle securities instead of business activities. It is said there is being added to the tax-exempt list \$100,000,000 each month.

The United States Treasury Department estimates that there are \$14,380,000,000 in tax-exempt securities outstanding today, which simply means that much wealth is exempt from paying taxes.

FORCING THE TOBACCO FARMER TO THINK

The question, "Can the farmers be organized" seems to have been answered "no" by the tobacco farmers.

The elements that hold the farmer down are, first, poverty; and, second, the want of business intelligence. From the present outlook, his poverty will increase rather than decrease. There is hope for his intelligence, since necessity is rapidly driving him to think.

The farmer is mortgaging his farm to the manufacturer at a rapid rate. The guano factories are buying in lands here, there, and everywhere. The tobacco manufacturers are buying land-bank bonds, secured by tobacco farmer's lands. So the farmer, after all, is very little above a tied servant, with a few exceptions. He has to both beg and thank the world for about everything he gets.

With the present outlook, the farmer should go into the manufacturing business. Suppose each tobacco farmer in Martin County should manufacture one-fourth of his tobacco into cigarettes or smoking tobacco and compare the profits from the one-fourth grown and manufactured with the profits of the three-fourths grown and turned over to the other fellow to manufacture. It is safe to say he would make far more profit on the one-fourth than he makes on the three-fourths.

Can it be done? First, the farmer would have to do it for himself. Every financial and speculative institution in the country would fight him,

which would make it difficult. He would have to find a reasonable amount of finance to build factories and carry some stock. The factories are not expensive in proportion to value of goods turned out, and there is no article manufactured in North Carolina so cheaply as tobacco.

The farmer, if he would use enough wisdom not to hire a trust tobacco man to attend to his business, might easily build his own factory, manufacture a portion of his own product and make handsome profits.

His selling would be easy. Poverty has forced a brotherly feeling among men everywhere. The man in the mine, in the factory, and at the foundry would use his product in preference to the trust-made goods—quality being equal.

Wealth is fully organized in this country, and folks can organize if they will use the same good sense that wealth uses.

As it is now, the rich are simply the guardians of the poor. Certainly, there are some good guardians, but there are many bad ones.

ATE TOO FAST

South Carolinian Took Black-Draught For Indigestion, and Says He Could Soon Eat Anything.

Ballentine, S. C.—Mr. W. B. Bounknight, of this place, gave the following account of his use of Theford's Black-Draught.
"Just after I married I had indigestion. Working out, I got in the habit of eating fast, for which I soon paid by having a tight, bloated feeling after meals. This made me very uncomfortable. I would feel stupid and drowsy, didn't feel like working. I was told it was indigestion. Some one recommended Black-Draught and I took it after meals. I soon could eat anything any time.
"I use it for colds and biliousness and it will knock out a cold and carry away the bile better and quicker than any liver medicine I have ever found."
Eating too fast, too much, or faulty chewing of your food, often causes discomfort after meals. A pinch of Black-Draught, washed down with a swallow of water, will help to bring prompt relief. Bloating sensations, eructations, bad breath and other common symptoms of indigestion have disappeared after Black-Draught has been taken for several days. NC-164

BRINGING THE WORLD'S BEST VALUES TO YOUR DOOR

Newspaper advertising is of vital importance to every man or woman who spends money for the necessities or luxuries of life. By making a practice of reading the newspaper advertisements, you keep in close touch with the latest offerings and lowest prices.

Well-advertised brands of merchandise are not only dependable in quality, but are also, as a rule, the most economical. Here is a very concrete case of why this is true:

Mr. Warren Wright, president of the Calumet Baking Powder Co., is the authority for the statement that they spend millions of dollars in newspaper advertising. This tremendous volume of advertising creates a gigantic demand for Calumet—a demand that is maintained by the quality of Calumet.

As demand grows, manufacturing costs are reduced, and the price of Calumet to the user is brought down to the low point of economy.

Calumet advertising, like all other advertising back of a meritorious product, goes on record in black and white as to the value of Calumet Baking Powder. It promises the housewife better bakings at lower baking costs, and the Calumet Company must live up to their printed pledge.

Newspaper advertising is localized advertising. Consequently, it benefits the dealer as well as the consumer, because it reaches buyers who can transact business with him. It moves the goods from his shelves. It keeps his stock fresh and clean. It enables him to sell the highest quality merchandise at the lowest possible prices.

The very fact that a dealer carries and features heavily advertised brands is clear evidence of his sincerity in serving his customers to the best advantage. He might temporarily make a bigger profit through the sale of unadvertised brands, but he could not give his trade the values made possible by advertising that decreases costs through increased demand.

If you want reliable merchandise at reasonable costs—if you want goods that are backed by the faith, the integrity, and the printed pledge of the manufacturer—read the advertisements and remember the millions of dollars spent by prominent manufacturers as a mighty factor in giving you money greater buying power.

NOTICE OF SALE

Under and by virtue of the power of sale contained in that certain deed of trust made and executed by W. A. Hilliard and wife, Chelsey Hilliard, to the undersigned trustee, and bearing the date of the 22nd day of May, 1923, and of record in the public registry of Martin County in book N-2, at page 391, said deed of trust having been given to secure the payment of a certain note of even date therewith, and the terms and conditions contained therein contained not having been complied with and at the request of the holder of said note the undersigned trustee will on Monday, the 24th day of May, 1926, at 12 o'clock m., in front of the court house door of Martin County at Williamston, N. C., offer for sale, at public auction, to the highest bidder, for

THE COST OF THE FUNERAL DIRECTOR'S SERVICE

It is an established principle with F. L. Edwards that the funeral service should conform to the circumstances of the family.
For several years F. L. Edwards has been called to serve hundreds of families of every position in life. I have never knowingly recommended the purchase of funeral merchandise or other materials that would place an unfair burden on the living.
Giving the best I know how to give wherever called, I feel is nothing short of what should be expected of me.

SIDE DRESS WITH NITRATE of SODA

For Quick and Sure Results Use Only NITRATE OF SODA
You Can't Afford to Lose Your Season's Work by Experimenting

With a late Spring and many weevils expected, a Nitrate of Soda side dressing of 100 to 200 pounds per acre is absolutely necessary to set squares before drouth or weevils can hurt them. A Nitrate of Soda side dressing insures yields and increases profits.

QUICK: To be effective a side-dresser must be quick acting. Official results in this country and abroad show conclusively that only in Nitrate of Soda is the plant food 100% available immediately it is applied. It leaves no acid residue.

SURE: Henry Greene, Horton's Grove, Herford County, N. C., used Nitrate of Soda as a side-dresser. His County Agent, Mr. C. A. Rose, writes:
"On the acre where he used the Soda, he produced 184 pounds more seed cotton than where he used no Soda."

County Agent Anderson reports that on the farm of B. W. Weeks, Holly Springs, N. C., 100 pounds of Nitrate of Soda applied June 10 increased the yield of seed cotton 248 pounds. An additional 100 pounds applied July 15 made a total increase of 704 pounds of cotton.

Years of actual results show Nitrate of Soda the best side-dresser

Ask your county agent or send a postal card with your address to our nearest office for our free bulletin which have helped thousands of farmers to grow bigger and more profitable crops.

"A rolling stone gathers no moss"

"It's always seemed to me that these motorists who go shopping around and always buying any old gas never get anywhere at all. They never accumulate any dividends of motoring satisfaction. Instead, nine cases out of ten, they just bring a lot of grief home to roost: no pep in the old bus; no pull on the hills—always a chatter and a complaint from the engine.

"In the long run, it pays to stick to "Standard" Gasoline—always dependable."

says Dealer Dan

"STANDARD" GASOLINE

ALWAYS DEPENDABLE
