RESOLUTION OF SYMPATHY
Whereas the death angel has entered the home of one of our brothers and taken therefrom a member of that family, to wit, his child; we, the members of the Junior Order of the United American Mechanics, do here and now extend to Brother W. B. Daniel and his family our heart-felt sympathy and point him to the Great Councilor of the Universe for further consolation. In contemplating the loss of his son he will find much solace in the never to be forgotten thought so truthfully portrayed by the poet:
"Life is real; life is earnest,
And the grave is not its goal.
Dust thou art, to dust returnest,
Was not spoken of the soul."

J. H. HARRELL,

STRONG HEARTS
There are many things that do damage to this wonderful little engine which pumps five quarts of blood every minute (and sometimes as much as twenty quarts per minute). Much of this damage may be avoided if we only know how to give our hearts a fair and square deal. As a matter of fact, all heart trouble could be avoided if it were possible to avoid all of the things which cause it.

After any of the contagious diseases of childhood, the heart should be very carefully watched by the physician until the system has gotten rid of all the irritating poisons (toxins) which these diseases turn loose in the blood. Until this time every precaution should be taken to avoid any undue exertion on the heart. The child should resume its usual activities very carefully, slowly and guardedly. Gradually increasing exercise is needed but never to the extent of feeling fatigue.

When the child has "growing pains" or a "touch of rheumatism" it is quite certain that somewhere in the body there is an infection which is eliminating a poison (a toxin) which is irritating the delicate membranes which line the joints and the muscle sheaths. This point of infection may be a bad tooth, bad tonsils, infected sinuses or any one of the many things which are usually thought of as being of little importance. If "growing pains" or "rheumatism" was all it would not be so serious, but at the same time these toxins irritate the joints, muscles and nerves, they are also likewise irritating the lining of the heart and the valves of the heart.

The heart has no feeling,—that is, it has no sensory nerves any more than the fingernails or the hair, and hence we do not suffer pain from this irritation of the heart like we do when the joints and muscles are irritated. But the damage there is even worse. The valves get out of shape and drawn with the scars and the heart can't do its usual work. When this happens it is then too late to correct it for the heart is permanently damaged.

There are now about two million people in the United States with damaged hearts, and in North Carolina fifty-five thousand, all because of not taking proper care after some contagious disease, or because of some neglected focus of infection or in a few cases improper habits of living. The average for each person dying of heart disease is seventeen years of partial or complete invalidism preceding death. While heart disease is most commonly noted in middle life, the cause was back in childhood or early adult life. Death from heart disease in middle life can be prevented by correcting infections in childhood.

A "Correct" Likeness of Washington

This heroic statue of the commander-in-chief of the first armies of the United States was made for the city of Portland, Oregon, though not yet delivered there by the artist. The western municipality has loaned it to the Sesqui-Centennial International Exposition, opening in Philadelphia June 1 and continuing until December 1, to celebrate 150 years of American Independence. At the foot of the sculpture is shown Pompeo Coppini, the sculptor. Dr. Henry Waldo Poe, of Portland, declares the face to be the most correct likeness of Washington ever modeled.

PALE & PEAKED

Texas Lady Was Advised by Her Mother To Take Cardui, Which She Did With Good Results.

Hamilton, Texas.—Mrs. Gladys Pottovint, of this city, says: "At times I suffered awfully with pains across my back and through my sides. I would have to go to bed and stay two or three days at a time. It was very worrisome. I managed to keep going, but ... did not enjoy myself at all."
"One day my mother remarked on how bad I looked. She said: 'You look so pale and peaked, why don't you take a bottle of Cardui?' She had taken it herself a number of times, and it had always improved her health, so she thought I had better try it."
"I got the Cardui and began taking it, and from the first dose or two I could see a change for the better. The first thing I noticed was that my appetite was improved. I began to be hungry and I enjoyed my meals. I slept better at night. My rest was so much quieter that I got the benefit from it. I kept on with the Cardui and took it for several months. The pains in my back and sides grew less until they finally quit bothering me."
Try Cardui for your case. At all drug stores. MC-170
