"I Date My Start from that Day I HAD"

How many times have we heard customers of ours say that—referring to the day they first began saving something regularly.

"I never got ahead until I learned to save," they tell us. "I was always behind, discouraged, and seemed to be getting nowhere.

"But as soon as I got something saved up, things got better—partly because I had more money, and partly because of the confidence and self-respect I had gained."

Saving sows the seed of success. The time to plant is now, the place is here—in a Savings Account at 5 per cent compound interest

The NEW and BETTER TEXACO GASOLINE DRY GAS

A Laboratory Triumph Becomes a Commercial Achievement

THE NEW AND BETTER TEXACO

THE new Texaco forms a "dry gas," and it is significant that The Texas Company should have been the first to make it possible. The successful manufacture of this new and better gasoline is the greatest motor fuel development of recent years.

The new Texaco vaporizes completely in the engine manifold at a much lower temperature than any other on the market.

At once, cylinder flooding has been overcome, manifold distribution equalized and fouled spark plug troubles eliminated.

The new and better Texaco is a pure unadulterated gasoline with non-detonating qualities achieved without the addition of any poisons.

If you will empty your automobile tank entirely of other gasolines and fill with this new Texaco, you will notice the improved operation and condition of your engine. Your crankcase oil dilution will be materially reduced, and as a result, both the compression and the lubrication of your engine will be materially improved.
