Hogs Get Barley Diet

(Sears-Roebuck Agricultural Foundation)

Approximately 50,000,000 bushels of barley will be fed to farm animals in the United States this year if the present crop outlook is fulfilled. Of this amount a trifle over one-half, or 50.9%, according to the figures compiled by the Sears-Roebuck Agricultural Foundation, is consumed by hogs. Next to them, horses eat the most barley, or 17.7% of all barley fed to farm animals. Then 11.9% is fed to cattle, mostly to dairy cows in the form of barley chop. Farm poultry flocks get away with another 10.5%; leaving 9% to be fed to sheep and used for miscellaneous feed purposes. Barley is the chief competitor of corn as live-stock feed and is especially important in the northern corn belt and Pacific coast states, according to the Foundation's experts.
