

ROBERSONVILLE SCHOOL NOTES

New Teacher for High School English Has Arrived

The Robersonville High School is very fortunate in having as a recruit to its high school faculty Miss Ruth East of Stantonburg, N. C. Miss East comes to the school with the necessary credentials, having graduated from a standard A-grade college, Meredith, and having taken as her major work the subject she is teaching. She is room-teacher for the eighth grade girls and teaches eighth grade English, ninth grade English and ninth grade algebra. Because of the large number of students enrolled in these grades she has her English classes divided into two sections. Such will effect more easily supervised groups, rendering individual help more possible.

School opens regularly at 8:25 o'clock. The second bell rings at 8:40. From 8:40 till 8:55 morning exercises are held in the school auditorium on Mondays, Wednesdays and Fridays and in the grade rooms on Tuesdays and Thursdays. The first recitation period begins at 9:00 and continues until 9:45. At the conclusion of this and all other class periods a five-minute period is observed for change of classes. Thus four class periods are possible during the morning session. At 12:15 the morning session closes and the afternoon session begins promptly at 1:00 o'clock. Three class periods with the corresponding five-minute intermissions are observed during this session. At 3:30 school closes.

The following courses are offered in High School: English, 1, 2, 3 and 4; Latin 1, and 2; French 3 and 4; history 1, 2, 3, and 4; science 1, 2, 3, and 4; mathematics 1, 2, and 3; commercial course and music.

The English department offers rhetoric, literature and spelling in the eighth and ninth grades, and rhetoric and literature in the tenth and eleventh grades. Beginner's Latin is given in the eighth grade and Caesar in the ninth grade. Two courses of French are offered, first and second years given in the tenth and eleventh grades. Four courses of history are given, elementary civics and economics in the eighth grade, Ancient and Medieval history in the ninth grade, Modern European history in the tenth grade and American history in the eleventh grade. General science is given in the eighth grade; biology in the ninth grade; physical geography in the tenth grade, and chemistry in

the eleventh grade. Arithmetic is taught in the eighth grade; algebra in the ninth grade, and algebra in the tenth grade. The commercial course is given in the eleventh grade.

The senior class of '27 gave the school a monetary donation of \$64.10. A part of this amount has already been expended for the purchase of a steel flag pole and an army post flag. The pole has not been erected yet but will be placed on the top of the building. The remaining part of the money will be used to purchase a memorial tablet for Norwood Highsmith, who was a member of the class.

New equipment for the general science, physical geography and chemistry laboratories has been ordered. The physical geography and chemistry courses are recent additions to the high school curriculum and equipment for them is very essential.

Supt. R. A. Pope and Mr. John E. Pope, of Williamston, were welcome visitors to the school on Wednesday morning, September 21.

Two other typewriters have been ordered and are expected shortly. This order and the number already in use total six typewriters for use in the commercial course.

Tuesday, September 27, will be given as a holiday. All school children are requested to use the day in attending the County Fair at Williamston. Many of the exhibits will be worthy of close study, and such is educational.

FORTY REGISTER FOR HOME-MAKING COURSE

Forty ladies have enrolled for the two-weeks home-making course to be held at Robersonville next month, beginning Monday, October 3.

Mrs. Anna Grimes, of the North Carolina Department of Vocational Education, will instruct the ladies and classes will be held each afternoon at 2:30 and at 8 o'clock in the evenings. No classes will be held on Saturday.

ROBERSONVILLE CIVICS CLUB MET THERE LAST TUESDAY

The civics department of the Robersonville Women's club met last Tuesday afternoon in the club rooms in the old bank building.

The meeting was the first to be held since last spring, and an outline of the year's work was prepared. The ladies of the department are planning to enter petition with the Atlantic Coast Line Railroad, asking for a new waiting room at the station.

REGULAR MEETING OF THE EVERETTS CAMP M. W. A.

The regular meeting Everetts Camp M. W. A. will be held Monday night, September 26th. All members are urged to be present. At this time there will be one or two applicants up for initiation and it is hoped by the officers that many visitors will meet with the regular members that night.

Corn Fritters

Corn fritters may be made from left-over corn on the cob. To 4 table-spoons fresh corn add 1 teaspoon of melted fat, 1 teaspoon baking powder, 1 egg, 1-2 cup milk, 1 cup flour, 1-2 teaspoon salt. Mix to a batter and fry in deep fat.

Stuffing for Green Peppers

Try a stuffing for green peppers made of equal parts of fresh corn, cooked macaroni (in small pieces), and tomato, seasoned with butter, salt and pepper. Any minced cooked meat on hand may be added.

Don't Let Bottled Milk Remain Out of Doors

Bring in the milk bottles as soon as possible after delivery. Wash them, especially the mouth and cap. Place at once in the refrigerator, which should be 50 degrees F., or less, never more.

Night Hawk Is Insect Catcher of Great Value

The night hawk, formerly wantonly shot for sport, is really one of the most useful of birds, and an insect-catcher of great value. These birds scoop their prey out of the air on the

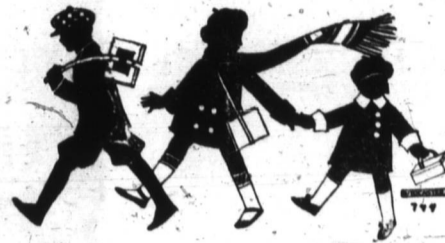

wing. Biological Survey experts have examined stomachs of night hawks and kinds of insects, representing thousands of individuals, in a single stomach have found more than 50 different

WE TREASURE YOUR CONFIDENCE

Two years have now passed since Stone & Webster, Inc., assumed the management of the Virginia Electric & Power Co.

During this time there has been accomplished a wonderful improvement in all the service rendered by the company and an enormous expansion of facilities, making our electric service available to practically all the cities and towns throughout the territory served by us in Virginia and Northeastern Carolina.

These accomplishments include the expansion of our territory by the acquisition of other properties; the construction of high-power transmission lines linking up our large steam-power stations and our various water-power developments; the construction of new power-station units; the lowering of our electric rates; and the reorganizing of the Employees' Benefit Association, under which benefits in time of need are practically doubled.

Through these achievements, the company is now in a position to furnish abundant power for any possible future growth, and is providing this entire territory with a public service of which all may be proud.

Practically \$20,000,000 has been expended by the company during this period for improvement and expansion. However, it would not have been possible to accomplish this had not the citizens of this section received the new management in such a fair-minded and cordial manner.

From the start those whom we are privileged to serve

showed their confidence in our organization and inspired in every officer and employee of the company a desire to merit these expressions of good will. There can be no doubt that this mutually beneficial good will is the most treasured asset of our company.

We have always felt that there is no surer way of maintaining this public confidence than by inviting the general public to become partners with us. We, accordingly, made two offerings of Preferred Stock—one in September, 1925, and a second in December, 1926, which resulted in large over-subscription to both issues; and we are very pleased that the results have proven most beneficial to the company, the public, and our new partners alike.

We are now pleased to announce that we are again able to invite you to participate with us in an additional issue of approximately \$2,000,000 of 6 per cent Cumulative Preferred Stock which we are placing on sale on Monday morning, September 19. Shares \$100.00 par value. Price, \$97.50 per share, yielding approximately 6.15 per cent. Delivery of stock to be made in October, 1927. Orders may be placed at any of the company's offices, through company employees, or any banker or broker.

Because of the popularity and success of our stock sales last year and the year before, this entire issue has been reserved for sale to our employees, our customers, and citizens of Tidewater Virginia, and Northeastern North Carolina.
