**STATE OF MIND  
 MAKES FAKE 'T B'  
 CURES SUCCESS**

**Proven Many Times That  
 No Drug Will Cure  
 Tuberculosis**

At one time or another almost every drug known to man has been exploited as a cure for tuberculosis. And this despite the fact that it has been proven time and again that there is no drug that will cure the disease. Perhaps more than any other disease mankind falls heir to victims of tuberculosis have been preyed upon by unscrupulous producers of fake remedies.

There is a mental element that enters into the cure of tuberculosis that makes these fake remedies for a time peculiarly successful.

A French physician, Albert Mathieu, scientifically demonstrated this peculiar mental element. He led his patients to believe that a wonderful

"serum" cure for tuberculosis had been discovered, and then gave small injections of the supposed "serum" to his patients, carefully noting their condition. While they were taking the "serum," which was only a solution of a small quantity of common salt, given hypodermically, the disappearance of symptoms in these patients was remarkable. On discontinuing the "serum" injections the old symptoms returned. Any change in the treatment itself for the tuberculous or even in the person giving the treatment is likely to result in a temporary improvement of the person ill with tuberculosis.

Thus makers of fake tuberculosis remedies can sell their vile so-called "cures" to the poor "T. B." at prices far beyond what the worthless remedy actually costs; and the "T. B." for a while, at least, will feel that the remedy is benefiting him. In the hope of a cure from the worthless "cures" that do not cure, the "T. B." often spends the small hoard of money he has, growing worse all the while. Some times as a last resort he will go to a reputable physician and may be sent by the physician to a sanatorium for treatment. But usually it is too late, and he goes eventually stricken to a tuberculous grave.

Gradually it is dawning upon the general public that "The Great White

Plague" is curable, but that it is not cured by drugs or concoctions sold at murderous prices under high-sounding names by fake concerns that grow rich upon the blood money of the consumptive. Sanatorium treatment under reputable physicians, rest, food, fresh air, with rest leading by far the other two, are the cures for tuberculosis. The earlier this cure is embarked upon and adhered to the greater the chance for a cure.

**How To Feed Salt  
 To Your Dairy Cow**

The best method of feeding salt to dairy cows is to mix 1 to 2 pounds of salt per 100 pounds of grain, or from 20 to 40 pounds of salt per ton of grain. In addition, have salt available so that the cows can get more if they desire.

**The Quickest Way to  
 Improve Herd of Hogs**

One way to improve a herd of hogs is to use a pure-bred sire with grade sows. "But why," asks E. Z. Russell, swine specialist of the United

States Department of Agriculture, "as a start, a good-sized herd could spend from 7 to 10 years of valuable time in breeding up, when a start can be made with the best there is? Hogs multiply so rapidly that if only one pure-bred sow were purchased as a start, a good-sized herd could be produced in a very short time. If one will take one good sow and keep her and save her sow pigs, breeding them regularly, he can produce more than 300 hogs in three years."
