

RID POULTRY OF LICE AND MITES

Surveys Show More Than 53 Per Cent Infested With Pests

Surveys made by the poultry department of State College show that more than 53 per cent of all poultry flocks in North Carolina are infested with either lice or mites.

These pests multiply very quickly during the hot months and for that reason control measures should be taken now before the summer sets in, says Dr. B. F. Kaupp, head of the department. The hen house should be given a thorough cleaning with a 4 per cent coal-tar dip. All cracks and crevices should be sprayed and the perches painted with a pure dip or creosote. New scratch litter and nesting material should be put in before the hens are allowed to use the house. If these precautions are not taken the setting hen will be killed and the small chicks will weaken and die.

The adult towel should be dusted with sodium fluoride. This should be used sparingly, as there is some danger of injuring the skin. A pinch of the material should be held between the thumb and finger and worked among the feathers. This operation should be continued until the entire body has been covered and should be repeated in five days if all the lice were not killed.

All brooder houses, hen houses, or any place that the chickens' roost should be gone over with the 4 per cent solution of coal-tar and where possible the hens transferred to another house during the cleaning.

Dr. Kaupp recommends that new houses be built, especially where the old houses have been in use over a long period and are thoroughly infested with the pests. The old houses should then be torn down and burned, he says.

FORD MAKING MODEL T PARTS

One-Third Capacity of Ford Plant Used in Supplying Old Models

Detroit, April 16.—The manufacture of replacement parts for the millions of Model "T" Ford cars still in daily use continues to demand nearly one-third the production capacity of Ford plants here.

Ford officials estimate, from reports of dealers all over the country, that there are still approximately eight millions of the Model "T" cars in constant use in the United States. Some of these cars are many years old. Every now and then there are reports of Ford cars of the old brass-bound radiator types of twelve or fourteen years ago, still running after thousands of miles of service.

The newest of the Model "T" Fords is now nearly a year old, for the production of assembled Model "T" cars was suspended in May 1927 to make way for the new Model "A". This suspension of assembled Model "T" cars did not affect the production schedule of Model "T" replacement parts, however. Throughout the past year the manufacture of Model "T" parts continued to occupy about one-third the production capacity of the Ford plants.

A few days ago newspaper correspondents here asked Henry Ford how long he expected to continue

CANDIDATE'S CARDS FOR SENATOR

I hereby announce my candidacy for the office of State Senator of the Second District and will appreciate the support of the Democratic voters.

making parts for Model "T" cars. "Until the last Model "T" is off the roads," Mr. Ford replied promptly. Then he added: "That may be ten years, but we do not intend to allow any Ford car ever to become obsolete as long as it can be made useful with reasonable replacements." Ford engineers, from tests and observations made over a long period of years, have estimated that the average useful life of a Model "T" Ford car is about seven years.

Card of Thanks

We wish to express our sincere thanks to the good people of Williamston, assisting us in the funeral of our mother, Mrs. Elizabeth Tucker, on March tenth. We especially thank those who were so nice in extending to us invitations to dinner, and all other services rendered our party.

J. S. TUCKER and FAMILY.

Pays To Inoculate Seed Of Legumes Second Time

Even though legumes have previously been grown on the land, it will often times pay to inoculate the second time before planting.

secure the payment of certain notes of even date and tenor therewith, and default having been made in the payment of said notes, and the terms and conditions in said deed of trust not having been complied with, and at the request of the holder of said notes, the undersigned Trustee, will on Monday, the 7th day of May, 1928, at 12 o'clock noon at the courthouse door of Martin County at Williamston, N. C., offer at public sale to the highest bidder for cash the following described real

estate, to wit: All that certain tract of land lying and being in Goose Nest Township, Martin County, on the Oak City to Hobgood road, containing 147 acres, more or less, and commonly known and commonly known and called the John T. Highsmith home place and more particularly described as follows: Bounded on north by the lands of Primus Lynch. On east by the lands of Tom Savage and Joe Long, deceased. On the south by the lands of

Smith and Green, and on the west by the aforesaid Smith and Green, and J. C. Ross, and being the same tract of land conveyed to F. O. High by J. A. and P. H. Davenport and wives, and which said deed is of record in the public registry of Martin County, in book M-2, page 583, reference to which is hereby made for a more perfect description. Dated this fifth day of April, 1928. CLAYTON MOORE, Trustee.

Did you ever figure

that if a mechanical refrigerator costs \$300.00 and lasted ten years, then—

Your investment cost would be \$ 30.00 per year
Interest on cost at 6 per cent 18.00 per year
Taxes in Williamston, 4 per cent 12.00 per year
Electric current, average cost 43.80 per year
Installation cost, recharges, and repairs, estimated 10.00 per year

Total yearly cost \$113.80

An average large family uses 6,000 pounds of ice per year, at 60c 36.00 per year

Yearly saving in favor of ice \$ 77.80

Would you rather have a handful of milky-looking cubes or a 50-pound cut of crystal clear ice?

Do you like your tea cold and sparkling with crushed ice, or are you content with a few white chips?

A mechanical washing machine is a fine proposition, but most ladies had rather let the "washer-woman" do it, and most ladies find it cheaper, better, and more satisfactory to let the ICE MAN look after their ice.
