## Peanuts Need Nitrogen Peanuts Need Lime

You get both in

# CALCIUM NITRATE

(Nitrate of Lime)  
15% Nitrogen 18.2% Ammonia  
28% Lime (56% limestone equivalent)

The peanut is similar to a bean growing under ground. It is a legume and needs lime. It is a high protein crop and must have nitrogen. Peanuts will take some nitrogen from the air, but they are more profitable as a cash crop if you give them enough nitrogen fertilizer to make a strong, early growth. 150 pounds of Calcium Nitrate per acre as a side dressing is the standard application. Apply at time of first cultivation.

Use Calcium Nitrate this year—it pays!  
Made by the World's Largest Nitrogen Producers
