DIZZY, NO APPETITE

Since Taking Black-Draught This Man is Eager For His Meals and Feels Much Better.

Harrisburg, N. C.—Mr. M. F. Pink, of this place, says: "It must have been fully twenty-five years ago that I began taking Black-Draught regularly. It wasn't so long after I married. "I was in town one day, and while talking to a friend I stooped over to pick up something. When I straightened up, I felt dizzy. I spoke to him about this and how I had not felt like eating. "My friend told me to take some Black-Draught. I knew my mother had used it, and so I bought a package. When I got home, I took a good, big dose, and the next night, another. In a few days I felt much better. I was hungry and the dizziness was gone. "A good many times I have had this dizziness and a bad taste in my mouth, or headache, and then I take Black-Draught and get better. I do not have to take it very often. We buy from five to seven packages a year."

Therford's Black-Draught has been found to relieve sick headaches in thousands of cases that were due to constipation. Containing no mineral drugs, it acts gently, yet promptly. Try it. HC-125
