

We say
"There never was a better gas"...

"There never was a better oil"...

"Super-this", "anti-that"—"special-this", "premium-that", compare the performance of any gasoline with that of the *new and better* Texaco. Then you will understand why Texaco is so popular not only right here but all over the U. S. A., from Coast to Coast, from the Border to the Gulf!

The *new and better* Texaco Gasoline is spe-

cially refined to form a full-powered vaporized mixture of gasoline and air, a dry gas, which ignites instantly and burns completely.

Texaco Golden Motor Oil is refined from carefully selected crudes only. It is full bodied as it feels, pure as it looks, free from gritty-carbon-forming elements which cause an engine to falter and lose power.
