Over a Billion Deadly Germs in a Single Drop of Water

Germs are so small that there may be as many as one billion, seven hundred million of them in a drop of water. And just a few of these tiny germs, if they get into your blood through a cut in your skin, may make you so sick you will be in bed for weeks—may cause the loss of a limb through blood poisoning—may even infect you with that most dreadful and fatal of diseases, lockjaw.

Just because you can see no dirt in

Just because you can see no dirt in a cut does not mean that it is clean. You cannot see germs. The only safe and sane thing to do, is to thoroughly wash every cut, no matter how small, with Liquid Borozone, to kill the germs, and then dust it with Borozone Powder, to hasten the healing. Liquid Borozone costs 30 cents, 60 cents, \$1.20 and \$1.50; Borozone Powder, 30 cents and 60 cents, and can be had at Clark's Drug Store.
