

# Never before have we seen such a swing-over to any Gasoline

*One after another* they're driving up to our Texaco-Ethyl pumps—drivers who used to use other premium or special gasolines. They're telling us that Texaco-Ethyl is the finest premium anti-knock gasoline they can buy! We knew that—that's why we're selling it! **Texaco-Ethyl is different.** It's a "dry" Ethyl! And this is something to remember—All Ethyl gasolines are not the same. The Ethyl compound is always the same but the gasolines to which it is added are not! The *gasoline you start with* makes the difference in Ethyls. **And in Texaco-Ethyl** you start with the famous *new and better* Texaco Gasoline, the original "dry" gas. When Ethyl is added to *that* you've got Ethyl Gasoline at its best! Because this "dry" gas vaporizes instantly and allows a *complete and uniform* diffusion of Ethyl Compound through the manifold into the cylinders. Here's anti-knock *and* performance that only Texaco-Ethyl can give you! Try it today.

**TEXACO** + **ETHYL** = **TEXACO-ETHYL**  
*the original "DRY" GAS*      *nationally famous ANTI-KNOCK COMPOUND*      **THE "DRY" ANTI-KNOCK GASOLINE**
