**TEXACO LETTER**

Dear sir:

The more you put into anything---the more you get out of it.

It's the same with Texaco Motor Products. We put more into them; you get more out of them.

This is true of every Texaco Product dispensed to you from any service station where you see the well-known Texaco Red Star with the Green "T" Trademark.

The New Texaco-Ethyl Gasoline will give you a new conception of gasoline performance. You will never really know what quick starting is, until you put Texaco-Ethyl into your tank. It is a lively gas! And when it comes to pick-up and power on the hills---why, it just runs away with the car. It's better because it is a "dry" gasoline.

One man tells another. Motorist after motorist tries Texaco-Ethyl---and sticks to it. Try a tank-full today.

Drive up where you see the Texaco Red Star with the Green "T." Then you will be a booster, too.

Very truly yours,  
HARRISON OIL COMPANY.
