## STATE DAIRYMEN FIND LESPEDEZA IS IDEAL LEGUME

Has Three Points of Value Long Sought by State Cattle Owners

Because lespedeza has a three-point value long sought by dairymen of this State, the legume is destined to become of great economic importance to the dairy industry of North Carolina. Dairymen of North Carolina have been searching for many years for a legume which would—reseed itself, could be used for producing both hay and pasturage and would grow on an acid soil. They have found such a crop in lespedeza, says John A. Arey, dairy extension specialist at State College. Arey points out that most soils in the State are acid and it is a waste of money to sow a lime-loving legume on an acid soil. Yet dairymen must have legumes because cows can not produce a profitable milk flow on grass hays or grass pastures. Therefore, if the dairyman can not sweeten his soil by an application of limestone he must grow those legumes which tolerate an acid soil. Lespedeza does this and it takes a high range among the legumes. Mr. Arey says it will furnish an abundance of grazing of a high protein content during July, August, and September when grass pastures are drying up and furnishing little nourishing feed. The four lespedeza varieties commonly grown in North Carolina are the common, Korean, Kobe, and Tennessee 76. Common and Kobe are the two most used for grazing and either of these may be sown on the small grain about the middle of February at the rate of 15 to 20 pounds an acre and will furnish grazing by the time the small grain is cut.

## BUILD FUTURE BY 4-H CLUB WORK

Every Rural Community Should Encourage Organization

Every rural community that would build for the future and that desires to cultivate its greatest asset will encourage the organization and development of 4-H club work. There is no other rural organization which will help to develop the social, moral, physical and economic phases of rural life to a greater extent. These are the rather startling claims made by committees of farmers and farm women who have been attending the regional agricultural conferences held by the State College extension service during the past two months. The committee reports said that by organizing 4-H clubs, the community would provide an opportunity for all the boys and girls to participate in the live-at-home movement; would offer a means of developing a spirit of co-operation and organization; training in the economical production of crops and livestock; an organized program of wholesome recreation for the home and community groups; training in home making also training in thrift, leadership, and citizenship. At each of the gatherings, the committee appointed to study and make recommendations about 4-H club work gave the project unanimous approval and requested the home and farm agents and medical leaders to promote the movement wherever possible. The projects recommended to club members, however, should be big enough to challenge their best efforts and any financial return from them should go entirely to the members.

## FARM LEADERS OUTLINE PLANS FOR EMERGENCY

Provision Must Be Made For Producing Food And Feed

By GUY A. CARDWELL  
Agricultural and Industrial Agent, Atlantic Coast Line Railroad Co.  
The North Carolina Department of Agriculture Economics suggests the following plan of action in 1932 for farmers who are facing an emergency, and many of them are in this dilemma: First, provisions should be made for producing all the food and feed needed on the farm. Farmers in this State have greatly increased the acreage of food and feed crops. But there must be further expansion of the live-at-home program. Prices of livestock, dairy, and poultry products have suffered no such collapse as have crop prices. Second, a farm and family budget should be made to determine the minimum amount of cash that will be needed until this time next year. Third, cash crops best suited to the particular farm should be grown on the best land only on the acreage that, supplemented by income from poultry, livestock, and livestock products, will return the necessary amount of cash as indicated by the budget. Fourth, crop land not otherwise needed next year should be seeded down in some legume crop for soil improvement, or planted to forest trees. If such procedure is impossible because of financial reasons, such land could lie idle. Fifth, available power and labor could profitably be used in building good terraces, draining wet land, building fences, straightening field lines, clearing, or other things need-

ed on many farms to make them more economical of operation in the future. Sixth, to improve living conditions, leisure time and home resources may be used for making many of the furnishings and conveniences necessary to a more satisfactory home life. On farms where cropper-tenants have been employed the problem is more complicated. Such a program as itemized above would doubtless reduce the number of such tenants needed. Two alternatives are open to the farmer; the unnecessary tenants can be evicted, or they can be permitted to stay on the place. Probably many farmers will find it best to permit the tenants to stay in the tenant-houses available, let them raise a garden, even using the owners mules and equipment to do it. They may even be employed as cash laborers at times throughout the year, so that they may receive some cash for clothing, etc. At any rate, such a plan would reduce the number of families that would have to be "furnished" if the usual amount of cash crops were to be grown. According to all the information that we have been able to assemble, the outlook for 1932 holds little in store for money-crop farmers. We will, of course, work out of the present crisis; but to accomplish this we are going to have to continue to dig in and fix a firmer foundation before

we can hope to successfully advance from our present unstable position to one of firmness. But even though cotton, peanuts, tobacco and truck crops should bring larger returns in 1932 than is anticipated, we should continue still to struggle for a balanced system of agriculture that will bring about our complete economic independence.

trustee will, on Friday, the 4th day of March, 1932, offer for sale to the highest bidder, for cash, the following described real estate at public auction at the courthouse door of Martin County at 12 o'clock m., said land being described as follows, to wit: It being the same tract of land de-

ed to said parties of the first part by William P. Moore, this date, containing 40 acres, more or less, and same known as the Thomas P. Moore land. This the 1st day of February, 1932. JOHN D. BIGGS, Trustee. Elbert S. Peel, attorney.

### EXECUTRIX'S NOTICE

Having this day qualified as executrix of the estate of C. A. Askew, deceased, late of Martin County, North Carolina, this is to notify all persons holding claims against said estate to present them to the undersigned for payment on or before January 30, 1933, or this notice will be pleaded in bar of their recovery. All persons indebted to said estate will please make immediate payment. This 30th day of January, 1932. Mrs. DELLA F. ASKEW, Executrix.

### NOTICE OF SALE OF REAL ESTATE

Under and by virtue of the power of sale contained in a certain deed of trust executed to the undersigned trustee by G. W. Duggen, William B. Duggen, and Horace Duggan, on the 25th day of March, 1929, and of record in the public registry of Martin County in Book Y-2, at page 598, default having been made in the payment of the indebtedness thereby secured, and at the request of the holders of the said notes the undersigned

## LAST CALL

### ENTERPRISE SUBSCRIBERS:

- What are the birth and death rates in your community?
- What about the political situation—in Nation, State, County, and Township?
- What are the problems confronting the County Commissioners and County Board of Education each month?
- How many people marry each month in Martin County, even though there is an alleged depression in our midst?
- What are Martin County farmers doing this year?
- Will Martin County Schools operate their full terms?
- How many parcels of land will be advertised for taxes this year?
- Will there be another poultry car operated in the County this year? If so, when, and what prices will be paid?
- Will there be available relief for farmers in Martin County this year?

These, and many other, questions that should be of interest to every citizen in Martin County will be answered in THE ENTERPRISE during the next few months. But, out of necessity, the answers will be limited to those subscribers whose subscriptions are paid up to date or where some arrangement has been made to keep your name on our mailing list.

Something is surely to "turn up" this year. Be sure and see about your subscription. If you pay between now and February 5, the paper will cost you only \$1 a year. If you fail to pay by that time, we will be forced to drop your name from our list.
