

## SLIGHT DROP IN STATE REVENUE

### Decrease Noted in General Fund and Auto Tax Collections

A slight decrease in all State revenues, both general fund and automobile taxes for highways, was shown in August, as compared with August of last year, the monthly report of Commissioner of Revenue A. J. Maxwell shows.

August general fund collections were \$1,977,824.25, as compared with \$2,099,319.73 in August last year, while \$3,308,376.60 was collected in the first two months of the present fiscal year, as compared with \$3,387,645.11 for the same period last year. Automobile taxes for August were \$125,504.11, as compared with \$132,371.12 for August last year. The drop in automobile taxes last month were less than the drop in July, as compared with a year ago.

Elder Newsome H. Harrison, of Washington County, visited here for a short while today.

## GRAPE PRODUCT RECIPES TIMELY

### Home Agent Suggests Preserving Grape Flavor by Various Methods

By Miss LORA E. SLEEPER

With grapes ripening many housewives will wish to make juice, jelly stock, and other grape products. The recipes follow:

#### Cold Pressed Muscadine Grape Juice

The muscadine family includes the following well-known varieties: Scuppernon, Thomas, Mish Eden, James, Mamory, Smith, Flowers, St. Augustine and Luola. Those grapes make excellent juice of fine flavor and do not require the addition of sugar.

#### Method of Making Juice

Crush grapes, strain through cheese cloth, and let stand 1 hour. Strain through a flannel bag. Pour the cold juice into sterilized jars, seal tightly and place on rack in hot water canner (a covered preserving kettle or wash boiler will be satisfactory). Add water until it reaches the shoulders of the jars. Remove when the water around the jars is boiling (212 degrees), the juice inside the jars will be only 185 F. This is pasteurizing temperature and will not injure the flavor of the juice.

#### Marketing Juice

If cold pressed juice is to be marketed, it should be siphoned off, after standing in jars for about six months, and bottled. After bottling it should be repasteurized at the same temperature as solids will form if a higher temperature is used.

#### Muscadin Paste Stock

Remove hulls from the grape pulp left after extracting juice. Cook the pulp until the seeds separate. Use potato ricer to remove the seed. Pour the hot pulp into hot sterilized jars and process 20 minutes. This pulp can be made into jam by using 3-4 as much sugar as pulp.

#### Grape Paste

For every measure of paste stock (pulp), add one-half measure of sugar. Cook in a large flat pan, stir constantly with a wooden spoon. Cook until thick and clear. Pour on marble slab or wax paper and cut into squares. Roll in sugar and pack in air-tight boxes. This makes an excellent confection.

### Finds Hidden Cash, And Then Loses It

Louisburg.—Howell Wester, Franklin County farmer, searched for several months for a sum of money be-

lieved to be \$5,000 which he knew his father had received for a sale of timber.

A few days ago, Wester located the large roll of greenbacks, but lost it instantly in the hands of a fleeing negro.

Wester's father became paralyzed shortly after the sale of the timber and tried to tell his son where he put the money, but never could make himself understood.

Recently Wester and a negro tenant, Gray Davis, were tearing down an old barn on the Wester farm. Davis found the rolls of bills secreted in the walls. Waving it at Wester he called out, "You can have my crop if

you want it, but what I find is mine."

The negro dashed out of the barn and disappeared into the bushes. Wester gave chase but was unable to overtake him.

## POPCORN GROWN BY KINSTON MAN

### Expects To Make Profit on Sixteen Acres Planted To New Crop

Kinston.—R. Thornton Hood, of this city, has contributed his bit to the diversification of agriculture in North Carolina this year. Sixteen acres of popcorn are being harvested on his farm near here.

The corn is of better quality than that grown in Kansas and Iowa, Hood stated today. "I have found a ready market. I will make a fair profit on the crop. I have learned that nearly everything can be grown in this state." Drought damaged the popcorn crop but the yield will be satisfactory notwithstanding.

Hood said he was able to undersell western growers because of the nearness of eastern markets. He plans to increase the acreage next year.

## CO-OP COTTON IS OF HIGH QUALITY

### Growers Using the Coker-Cleveland Strains Sell Staple at Premium

Raleigh.—Regardless of the drought prevalent in some sections of the state during the growing season, cotton being delivered to the North Carolina Cotton Growers Cooperation Association is "of very good grade and staple."

## WANTS

PIANO—WE HAVE A BEAUTIFUL upright piano in this community that will be returned to us. For lack of storage space, we will transfer this account to some responsible party, allowing all that has been paid on same. Terms if desired. Quick action necessary. Address Box 478, Concord, N. C. \$9.38

according to Benbury Haywood, head cotton classifier.

As an example, Mr. Haywood cited that eleven bales, delivered by a member who lives in the southern part of the state, all classed strict middling 1-1-16.

This member, who grows one of the improved Coker-Cleveland strains, received from the cooperative a grade and staple premium of more than 1 cent per pound on the 11 bales.

Mr. R. S. Price, of Route 2, was a business visitor here today.

## Get 200 to 250 Bushels Of Potatoes Per Acre

Farmers in Jackson County who planted the Canadian Green Mountain variety of potatoes this year will harvest from 200 to 250 bushels an acre. The plants are unusually free from disease, reports County Agent Vestal.

Mr. Joseph Griffin, of Bear Grass Township, was a business visitor here this morning.

## NELLY DON DRESSES

Put your collar on intimate terms with your neck this fall... it's a smart new idea... adapted by Nelly Don in this white pique, gold-buttoned bib collar. There's newness, too, in the spongy web-knit wool and waist-hugging girle belt... yet it's only

# There is only ONE 5-STAR MOTOR OIL

QUALITIES	PARAFFINIC OILS	NAPHTHENIC (ASPHALTIC) OILS	Essolube (HYDROFINED)
KEEPS BODY	★		★
WINTER FLUIDITY		★	★
LOW CARBON		★	★
LOW CONSUMPTION	★		★
LONG LIFE	★		★

The perfect motor oil must excel in five qualities—ability to keep its body, winter fluidity, low carbon, low consumption, and long life.

The best Paraffinic oils rate well in three of these qualities. They are deficient in two. Naphthenic (Asphaltic) oils rate well in two of these qualities—are deficient in three.

There has been no commercial method—before hydrofining—which could combine the good qualities of these two types of oils.

Essolube, the hydrofined oil, combines these qualities for the first time. It keeps its body under tremendous engine heat and at extremely low temperatures. This means protection for your engine at all temperatures—less wear on your motor and fewer repair bills for worn-out parts—less wear on your

battery. It has winter fluidity. This means it flows freely in cold weather and reduces wear on your motor during winter. It has next to no carbon—this means fewer repair bills for carbon cleaning jobs. It gives you low consumption. This means it lubricates longer, reduces bills for worn-out bearings, reduces oil bills. It has long life. This means it doesn't sludge—fewer oil changes, further savings on oil bills.

Essolube—the Esso of motor oils—is on sale at all dealers and stations of the following companies at no extra cost: Standard Oil Company of New Jersey, Standard Oil Company of Pennsylvania, Standard Oil Company of Louisiana, Standard Oil Company, Incorporated in Kentucky, Colonial Beacon Oil Company, Inc.

# Essolube

FREE BOOKLET—"Essolube, A Five-Star Motor Oil," gives you the story of the great hydrofining invention which makes Essolube possible. Ask for it at your "Standard" station.
