Electric Refrigerator Has Been Greatly Improved

Household electric refrigerators embodying a revolutionary advancement in construction that permits one-fourth more food storage space within the same sized cabinet has been placed on display by the Electric Supply Company, local Frigidaire dealer.

Coincident with the display, genuine Frigidaires, carrying a General Motors warranty, now are available in this city for as little as \$112, plus freight. This new low price, according to the local dealer, includes delivery, installation charges and the federal tax.

"The engineering achievement that provides greater storage space and additional economies in manufacturing makes possible the hitherto unheard of price levels for a quality refrigerator built by a long established and reputable manufacturer," the local dealer said.

Plant Much Hay To Take Care of Shortage in Corn
