HINTS FOR HOMEMAKERS
 By Miss Johnnie Camp, Home Service Director Virginia Electric and Power Company

Consider the Cooky

Just a wee toothsome drop—a Thoughts of the cooky jar revive many happy childhood memories for the grown-ups and bring a wistful smile to the face of the youngster. Let's renew the custom of our grandmother's day and keep a cooky jar on the pantry shelf. Every child loves cookies, not too rich and yet full of flavor. Even if there aren't children in your home, a cooky jar filled with crisp, delicious cookies is an asset to every pantry, and it may so easily be kept filled with a variety of cookies. When friends drop in for an afternoon chat, serve cookies and tea, it will soothe your own tired nerves and there is something about this age-old custom that brings friends closer together, and gives all a sense of well-being.

Cookies have been called "informal cakes," although they are not usually treated under the subject of cakes. They contain more flour than cake, usually less liquid, and are always small in size. We have two classifications for cookies, sponge and butter. Under sponge cookies, we have meringues, kisses, and macaroons, and under butter cookies we have all cookies containing shortening, whether they be dropped or rolled.

It is just as important to have a good cooky recipe as a good cake recipe. Sometimes your recipe may leave you in doubt as to the amount of flour to be used, because some flour requires more moisture than others, but every other measurement should be given in accurate detail. Be sure to choose a recipe with little or no liquid, the more liquid you use, the more flour required, and the more flour used the tougher the cooky becomes.

The electric refrigerator is our friend and co-worker in our cooky making. In the past, only ice-box cookies have called for chilling; we now know that this is an excellent idea for all cookies. Only the amount that can be rolled at one time is removed from the refrigerator. This aids in rolling, and removes the necessity of using too much flour. There is an advantage to making ice-box cookies, one can bake cookies as she needs them. These recipes are usually exceptionally large.

There are several ways of combining cookies, but the one most commonly used is the conventional cake method. The old-fashioned method of baking cookies on inverted drip pans, or in various sized cake pans, all of which had to be heavily greased and perhaps floured, was a tedious one, and prevented the making of cookies as often as one would like to make them. It is now no trouble at all, for aluminum cooky sheets or baking sheets may be bought in sizes best fitted to be used in your oven. Do not buy one that "just fits" it should not come nearer than an inch and a half to the sides, front or back of your oven, regardless of the type range.

Delicious Ice Box Cookies
 1 cup butter, 1 1/4 cups flour, 2 cups brown sugar, 1-2 teaspoon soda, 1 cup chopped nuts, 2 eggs.
 Cream butter and sugar, add eggs, and mix well. Sift salt and soda with flour, add nuts, mix into first part. Roll out into a round roll, wrap in waxed paper, put in refrigerator over night, or until needed. Turn out on floured board, slice very thin, bake at 350 degrees seven minutes. They are delicious.

Boston Fruit Cookies
 1 cup butter, 2 cups sugar, 3 eggs, 1 teaspoon soda dissolved in 1 tablespoon hot water, 1 teaspoon cinnamon, 1-2 teaspoon salt, 3 1/4 cups flour, 1 cup chopped nuts, 1 package puffed raisins, 1 teaspoon vanilla.
 Mix as butter cake, drop by teaspoons on cookie sheet, 2 inches apart. Bake 350 degrees for eight minutes.

Ten Cakes
 1 cup shortening, 3 eggs, 1 teaspoon vanilla, 2 cups sugar, 1-4 teaspoon soda, 1-2 cup buttermilk, 2 teaspoons baking powder. Enough flour to make soft dough.
 Mix as any butter cake. Roll one-fourth inch in thickness. Cut in fancy shapes, or with biscuit cutter; make nice Christmas trees, Santa Claus, etc. May be decorated with icing or with fruit and nuts. Bake at 350 degrees (time depends on size of cooky) about eight minutes.
 Select your favorite recipe, gather the ingredients and utensils to be used, measure accurately; place your mixture in the refrigerator to chill—smile, and consider the cooky!
