Several Case Typhoid Are Reported Along Roanoke

Scotland Neck, June 24.—Dr. Z. P. Mitchell, county health officer, with the aid of Dr. C. H. Neville, vaccinated 292 people on the James G. Shields farm on the river Tuesday as a result of the outbreak of 13 cases of typhoid fever over the week-end.

It is reported that the typhoid germs were spread among a number of the tenants from one sick woman on the Hall farm, who was ill with the fever. Water from a well has been sent off for examination, but Mr. Shields has not had a report on it yet.

There are 13 cases of fever now reported on Mr. Shields' farm, and one woman died on Wednesday from the disease.

As soon as it was discovered by Mr. Shields that his tenants had typhoid fever, the county health officials were summoned and vaccine was given 292 people.

Miss Mary Anne Chase is in Greenville this week visiting Mrs. W. A. Lillycrop.

Mrs. O. Cone, of Richmond, is here visiting her son, Dr. P. B. Cone, and Mrs. Cone.

WOMEN'S HATS MADE OF SHUCKS

Braiding of Shucks May Be Developed into New Farm Industry

Corn shucks, disgarded in the barn lot as supplementary roughage for cows have been received in polite society as finished hats for ladies due to the efforts of Miss Glenn Caudle of Gibson Mill in Richmond County.

Some months ago, Miss Caudle attended a demonstration given by the home agent of Richmond County, Mrs. Anna Lea Harris, and there learned the art of braiding corn shucks and making these into attractive hats.

Miss Caudle is gifted in the use of her hands and within a month had mastered the art and had made a hat for her own use. She accompanied Mrs. Harris to a meeting in Wilmington and there taught a group of home agents and demonstration club women how to make braids of shucks and model these into stylish millinery.

Some of these whom Miss Caudle taught are now making both hats and bags to match, Mrs. Harris says. The hats are light in weight and are very comfortable. The color is natural shucks which blends nicely with any color.

"The color, braid and texture of the shuck gives a charming effect and the hats are being enthusiastically received all over the State," says Mrs. Harris. "Miss Caudle has personally received a number of orders from Raleigh and other places. She charges one dollar for a hat, finished and blocked. It may then be lined and trimmed according to the taste and desire of the purchaser."

No one will object to such use of shucks, Mrs. Harris says, unless it be some of the undered eastern Carolina cows. At any rate, the hats are becoming fashionable and many a shuck will be used in their manufacture in the future, she believes.

PREPARE SOIL WELL FOR ROSES

Also Necessary To Keep Bushes Well Protected With Spray

The principal factor in having a successful rose garden lies in preparing the soil carefully and keeping the bushes protected with spray.

In the spring of 1932, Glenn O. Randall, floriculturist at State College, decided to have a rose garden on the agricultural campus. Using student labor largely, he set some 300 plants of about 30 different varieties both as a test of the varieties and as a test of growing conditions.

The plants were set in early spring in soil that had been carefully prepared. A good applications of decayed

Umpires: Wyatt and Stubbs.

manure was mixed with the soil before the plants were set. Later, a small handful of a 7-5-5 fertilizer was applied around each bush. The first application was carefully worked into the soil about the first week in May. A second application was made in the same manner in early July. This treatment, he said, made a healthy, vigorous growth.

However, Randall found that he must protect the roses with the right sort of spray. The Bordeaux mixture and the sodium thiosulphate were used. The latter material, known commercially as Hypo, was used at the rate of one tablespoonful to three gallons of water and gave protection from rose mildew and other leaf diseases. The Bordeaux mixture was used for control of blackspot, mildew and other diseases. The only drawback to using the Bordeaux is that it will discolor the buds. Hypo does not do this.

Randall protected the roses from plant lice and aphids by spraying with a solution of nicotine sulphate made by mixing one tablespoonful to three gallons of water. As a result the college rose garden has presented a beautiful sight this season.

Mr. W. W. Griffin is very ill in a Rocky Mount hospital following an operation there last Wednesday morning.

Trough Creek, in Huntingdon county, Pa., covers a distance of only 2 miles, yet its course is so crooked that it is approximately 70 miles long.

At York, S. C., Wm. Sanders, colored, was arraigned for murder, tried, convicted and sentenced to death—all in 77 minutes.

Question: How soon after farrowing should a sow be put on full feed?
 Answer: The pigs should be at least two weeks old before the sow is put on a full ration. No feed at all should be given the first day after farrowing with a small amount of shipstuff fed as a slop, on the second day. The ration is then gradually increased each day with the animal getting a full ration on the fourteenth day.

WANTS

CRAZY CRYSTALS CAN NOW be secured in Williamston from Mrs. Emma Thomason, 608 W. Main Street, or phone 145 and a representative will call. Ask your neighbor about this wonderful health-giver. Fine for all stomach complaints. je23 6tpd

NOTICE
 Notice is hereby given the public that on the 10th day July, 1933, application will be made to His Excellency, J. C. B. Ehringhaus, Governor of North Carolina, for the parole of Jafus James.
 The said Jafus James was convicted in the Recorder's Court of Martin County on the 6th day of December, 1933, for an assault with a deadly weapon and sentenced to term of two (2) years upon the roads of the state under the supervision of the highway commission.
 This 27th day of June, 1933.
 P. H. BELL,
 Attorney.

WILLIAMSTON STORES WILL CLOSE

Tuesday, July 4th

But Not On WEDNESDAY, AFTERNOON July 5th

HOWEVER, THE REGULAR WEDNESDAY HALF HOLIDAYS WILL BE CONTINUED THE FOLLOWING WEEK & ON THROUGH THE SUMMER MONTHS.

The patrons of the following stores are asked to do their trading on Monday of next week, so no inconvenience will be experienced by them, as their places of business will be closed on Tuesday, July 4th.
