

CLUB WOMEN IN FIELD MEETING AT EVERETTS

Favor Extension of Light Lines To All Homes In Rural Sections

(By Miss L. E. Sleeper, Agent)
 Martin County Home Demonstration Club women in their regular business session held at the annual field day in the Everett community yesterday went on record favoring Governor Ehringhaus' plan for the extension of electric lines to all rural homes, and instructed Miss Viola Grimes, acting secretary of the county council, to write the Governor informing him of the whole-hearted support the women have toward any undertaking of this kind. The State Grange has also gone on record and instructed all folks in rural sections to voice their approval by writing to the Governor. As it is now North Carolina is 38th among the States having rural electrification.

Mrs. Bettie Higdon, Mrs. Hattie Daniel and Mrs. G. A. Peel compose the nominating committee and they will report the council officers appointed at the October meeting. Mrs. A. B. Ayers, Mrs. J. E. Smithwick and Mrs. Lucian Hardison are the place committee to decide where the field day events are to be held next year. Mrs. Eason Lilley, Mrs. Ione Holliday and Mrs. J. S. Ayers were appointed program committee to have charge of the October meeting.

Approximately fifty club members were in attendance at the field day yesterday, representing five clubs in the county. The Everetts women and the Macedonia women proved to those in attendance that they believe in doing their part. An interesting pantomime worked up by the Everetts women, illustrating methods to increase the heights of work surfaces, and a playlet, written by Mrs. Eason Lilley and worked up by club members of the Macedonia club proved to be very interesting. The Macedonia club staged a quilting party and incidentally told, during that time, what they had gained as club members.

LICENSES ARE DISTRIBUTED

Combination Hunting and Fishing Licenses Put on Sale; Much Cheaper

The division of game and inland fishing of the department of conservation and development is distributing this week the state combination hunting and fishing licenses to the various agents in Eastern Carolina.

Combination hunting and fishing licenses expired on July 31, 1933, and according to Culpepper hardware company, local agents, licenses will be placed on sale here some time this week.

Resident hunting license will be 60 cents, state hunting license will be sold for \$2.10, and a non-resident hunting license will cost \$10.10.

Charles J. Moore, assistant state

PLAN TO SUBMIT A NEW PLAN TO COTTON FARMER

Assure Parity Price Would Limit Acreage to 25 Millions Next Year and

Washington, Aug. 24.—The approval of Secretary Wallace and President Roosevelt was virtually all that was necessary today to put before the growers for acceptance a new cotton plan to limit acreage to 25,000,000 next year.

One of its important features would assure a parity of price to the cotton farmer on about half his average production during the last five years. It is to be put into effect under a modification of the domestic allotment plan.

The parity price for cotton is the figure at which it must sell to have the purchasing power it had from 1909 to 1914. Present farm prices are about five cents below parity.

Some details of the long-time program for the staple upon which the agricultural South depends remain to be worked out, but officials expect its principles to stand. The plan is to be announced September 1, or shortly thereafter.

As in this year's emergency reduction campaign, which took more than 10,000,000 acres out of production, the farmer would receive cash rentals on the land he turned to other purposes or let remain idle.

The cash payments would be based on the average rental value of the acres, but probably would not be the full figure, since he could use the land to grow food or pasture crops.

A suggestion that the payments range from \$3 to \$11 an acre is under consideration.

game warden, has recently received reports from all counties in this section under his supervision that game is more plentiful this season than for the past five years. With this increase in game, more sportsmen will be taking to the fields and woods this season than have in the past several years.

MUCH DAMAGE BY STORM IN EARLY PART THIS WEEK

(Continued from page one)

millions of dollars is believed to have resulted to the crops. Cotton was blown and twisted, so badly that its roots will not develop the bolls. Young corn was leveled. Peanuts have suffered during the past few days, the main development period for the goober. As a result the crop will be from 10 to 20 per cent shorter than estimates indicated two or three weeks ago.

Pecan and all kinds of fruit trees were left almost bare. Even small acorns were twisted from the mighty oaks by the millions.

Twenty-five trees fell in the town here, damaging one or two homes, tearing up a portion of sidewalk in New Town and breaking a telephone cable. The packhouse of Farmer Joe Cherry was blown down, and a porch was torn from a home on West Main Street. Many panes were blown from windows.

The storm is said to be the worst experienced in this section since 1913. It was said to be the worst ever recorded at Virginia Beach and other points.

The toll of death along the Atlantic Coast and property damage piled to disastrous heights last night as the east cleared away the debris from its most terrific tempest in years.

The death list stood at 34 lives lost, twelve of them in Virginia. The destruction, impossible of approximate calculation in such wide-spread devastation, mounted into many millions of dollars.

While the sun peeped through storm-blackened skies sporadically yesterday, many localities were still in distress from the gale and deluge that battered the Atlantic seaboard.

BUILDING AND LOAN TO OPEN A SERIES SOON

(Continued from Page One)

tin County. During the last ten years the association has made loans amounting to more than \$150,000 on homes, and on improved property purchased by its stockholders. At this time, it has more than \$25,000 loaned on its own stock, and during the 10-year period referred to above, it has matured and paid out on stock nearly \$300,000. During this time more than 50 houses have been built by the organization, besides aiding stockholders in purchasing improved property. During this same period, the association built 85 per cent of the new buildings in the town of Williamston.

At no time during the existence of the association has it failed to pay the stockholders 6 per cent net on their investment. And up to this date it has not taken advantage of the time-notice clause, as is allowed by the by-laws, and has not required its stockholders, who wanted to withdraw their stock or who wanted to make loans on their stock, to wait, but it has paid them on demand, and made stock loans upon application. No stockholder has lost one cent that has been invested in this Association.

The Martin County Building and Loan Association is one of the best assets of the community, and has been of more substantial assistance in helping to build up the town of Williamston than any other one institution.

have been handled in a hurry, and the handler could hardly distinguish it from a regular one.

It was unofficially learned here that there were several handlers, of counterfeit money in this section two or three months ago and that a number of worthless bills were passed off on unsuspecting people. Two or three arrests have been made in other sections of Eastern Carolina recently,

but it is believed there are many worthless bills still in circulation. It is understood that prisoners in Federal penitentiaries learned the engraving art, applied it to their own use when they were given their freedom. The professionals up north would make the money and sell it at bargain rates to others whose acquaintance was made while serving time in prison.

DRINK CRAZY WATER CRYSTALS

Crazy Water Crystals are a natural mineral water product, containing minerals which are extracted from mineral water from famous Texas wells. Thousands each year journey to the Crazy Wells in Texas to drink the natural saline, alkaline mineral water, restoring their bodily functions to normal, and promptly bringing themselves to health.

Those of us who have neither the time to travel nor the opportunity and wealth to go to the wells, may still enjoy the benefits of this wonderful natural mineral water in the form of Crazy Crystals.

Crazy Crystals have been used successfully in the treatment of the following disorders and ailments: Constipation, Rheumatism, Neuritis, High Blood Pressure.

NEGRO IS BADLY HURT IN FIGHT WITH WHITE MAN

Struck Over Head By Piece Of Scantling, Probably Fatally Injured

A negro named Gaynor, living in the Gold Point section, was seriously and probably fatally hurt last Sunday morning when he attempted to assault Alonzo Grimes, white man, there. Gaynor was struck on the side of the head with a piece of two by four timber in the hands of Grimes and suffered a fractured skull. The man was carried to Robersonville, where his condition was considered grave by doctors.

According to information received here, Gaynor went into a colored church in Gold Point and interrupted the sexton, who was calling the church flock to services. A row between the two followed, and Grimes, passing near the church at the time, is said to have remonstrated with Gaynor. Resenting the good advice offered by Grimes, Gaynor ended the row with the sexton and turned on Grimes with a piece of scantling. Grimes moved away, but Gaynor followed him. After evading Gaynor for some distance, Grimes picked up a piece of two by four timber and warned the man to stop, adding that he was not going to run further. Gaynor failed to heed the warning, and when he advanced, Grimes applied the timber and ended the disturbance with a swift blow to Gaynor's head, causing blood to flow from the man's ears and nose.

It was reported that there was evidence of liquor, but this report could not be verified. Very little direct information could be had in connection with the affair, witnesses having been declared unwilling to discuss the trouble.

Small Merchants Can Obtain Blue Eagle

Some question has arisen in regard to the status of the small county merchant. In a bulletin sent to Mrs. W. C. Brewer from Roy M. Brown, technical supervisor of relief, he says that a merchant in the country who owns his own business and employs no clerks has no restriction on his hours, and he may secure a blue eagle by applying to his postmaster.

The county welfare agency is also instructed to stamp all orders for relief "good only at stores showing the N. R. A. blue eagle in their places of business."

Saves 44 Lives
 "Biddy" Stoneham, 58 of London, Eng., has saved 44 persons from drowning during his 23 years of coast guard work.

Were Their Faces Red?

When a newly married couple were leaving the church in Warsaw, Poland, a woman handed them a basket which was opened at the wedding breakfast and found to contain a live baby.

New Lease Form

The State of New York has a new kind of household lease that becomes void if the renter loses his job.

SPURIOUS BILL IS PASSED OFF ON MERCHANT

\$10 Note Is Found To Be Counterfeit; Others May Be in Circulation

Robersonville, N. C., August 24.—In the course of business last Saturday, Mr. Silas House, local merchant, received a counterfeit \$10 bill, but the worthless bill went unnoticed until Monday morning, when the merchant realized he was \$10 poorer than he was the Saturday before.

Recalling the transactions of the day, Mr. House remembered he received the bill from George Andrews, a colored man. It is believed that Andrews was the victim of another, and that he did not intentionally pass the bogus bill on to Mr. House.

The face of the bill was nearly a perfect reproduction of Uncle Sam's bona fide bills, but the back was not so perfect. However, the bill could

If your elephant wants to ride on top
IT'S ALL RIGHT WITH A CHEVROLET

CHEVROLET We didn't actually plan on elephants when we chose the bodies for the new Chevrolet. But we did choose bodies rigid enough, and strong enough, to support six tons of elephant, or anything else you can name. . . Fisher bodies . . . steel bodies plus a hardwood frame . . . exactly the same type of bodies used on all 12 and 16-cylinder cars. Steel alone is not enough to make you as safe and secure as we want you to be in a Chevrolet. A steel body, welded into a solid wall of protection plus resilient hardwood reinforcing to take up stress, absorb

shocks and prevent the steel from following its natural tendency to buckle under pressure makes the sturdiest body of all—the kind used on the Chevrolet, and on no other low-priced car. Remember that when you buy a car. Be sure to get all you pay for . . . the super-safety of a steel-plus-wood Fisher body.

CHEVROLET MOTOR CO., DETROIT, MICH.
