Why Are Women Such Fools?

In a recent raid on a den of thieves, hi-jackers, and vandals, by officers, three women were found with three men of that type whose only business was to break in and steal, and to murder and destroy. Two of these women were said to be married—one with a husband who had a good job and a home to go to. The other was an attractive young girl who had left a home of loved ones to lead a life that has but one ending—destruction.

We can understand why men, with their spirit of adventure and daredevil principles, will form gangs for the purpose of getting a living by such unlawful acts, but when it comes to a woman throwing her virtue to the four winds and burying herself body and soul in oblivion—it is too hard to understand.

When we properly evaluate earthly things, the most valuable jewel is a woman's virtue. Yet there are tens of thousands taking the fatal plunge every year, never to see home nor meet friends again.

Why are women such fools? Cannot the home give a little more warning along these lines?

Listen With Confidence

One time Vice President of the United States, General, "Hell and Maria," Councillor Charles G. Dawes says the depression is over.

Lots of folks remember Charles Gates Dawes as Coolidge's Vice President and inverted-pipe banker, and almost everybody likes him; and his word comes with the appreciation of the general public, more especially the Democrats. One thing may be said about Mr. Dawes, and that is he has always held the respect of the American people, regardless of party, and now when he comes out with the flat statement that the depression is over, most folks are going to listen with confidence.

Self-Pity

There are many sad things in this world we live in. Perhaps the saddest of all is the man or woman who gives much time to pitying himself or herself. Yet there are many people who are always whining about their troubles, their poverty, their misfortunes, or their diseases. A soul that is so afflicted shuts out most of the sunshine of life and never draws any dividends from such investments. It is a great blessing to be a man or a woman who is able to look at the bright side of life. They, like the busy bees, are able to obtain honey from the flowers of life, while the spider gets poison from the same flowers.

We need to be of good cheer.

The People Should Rejoice

How that airplane stock has tumbled since President Roosevelt has cut in on their dividends. Under Postmaster General Brown's contracts, the government paid large and sure dividends. Now the Government has found it was being defrauded and has canceled the contracts, which has helped the people but hurt the airmen's dividends. The people should rejoice.

Dr. Poteat Declines To Serve

Dr. W. L. Poteat did the noble thing when he, as a stockholder in a public utility company, refused to serve as an associate on the utilities commission. Not that the learned doctor would have failed to honestly serve the state, but on the grounds that some who do not know the doctor might not understand the practice of governmental servants passing on matters in which they hold personal interests. Such practices have proved very disastrous in the past.

Dr. Poteat would serve his own business and the government's business, too, when both are affected by questions on which he must pass judgment.

Publishing Crime News

The question of what a newspaper should publish has never been definitely determined and perhaps never will be.

It is the same way with almost every other kind of business or profession. Some lawyers think it best to be kind and very considerate in the examination of witnesses, while others think it pays to grill them in almost a vicious manner.

The same applies to preachers. Some preach strong on the heat of hades, while others preach of the sweetness of the things to come if we prepare ourselves to open the gates eternal.

Some newspapers say a lot of things about the pleasures surrounding us, most of them being very questionable, but they get pay for such, either directly or from outside methods.

Coming down to the very bedrock of the problem the question is: Should the public know about crime? Of course, the only public value to the question is whether crime will be increased when people know more or less about it.

It is doubtless wrong to overstress crime news, yet why should the community not know of the lawbreakers in their midst that they may lock their doors against these evil-doers?

TOBACCO GROWERS Here's why you should use Field Tested Fertilizer GOOD quality tobacco is hard to grow. It takes hard work, experience, favorable weather, proper soil, and the right kind of fertilizer. It means a real investment in money and plenty of worry. Yet all this means nothing if the fertilizer is not right. Why run this risk? Why not play safe? Protect your investment. Trust your tobacco crop to Royster's—the fertilizer that has been tested out right in the tobacco field. Remember this: Royster's is made in one quality only—the best. You can pay more or you can pay less, but you cannot buy better fertilizer for growing tobacco. Royster experts are continually studying tobacco, learning all there is to know about fertilizing it. They never stop experimenting and improving. They test every fertilizer in the laboratory, then field-test it in the tobacco field. Only refined materials are used to make sure that the purest obtainable go into Royster sacks. As a result, we know that Royster Tobacco Fertilizer will give you the results you want. See your Royster dealer today and let him know how many tons you need. F. S. ROYSTER QUANO COMPANY, NORFOLK, VIRGINIA
