

BANQUET HELD AT FARM LIFE LAST THURSDAY

Faculty Members, Students And Few Invited Guests Enjoy Affair

An enjoyable event was held in the Farm Life school last Thursday evening when faculty members, pupils, and a few invited guests met there for their annual junior-senior banquet. Up to the minute in every detail, the affair was declared the most successful so far held there.

Aside from an appetizing dinner, consisting of several courses, the students had arranged a very entertaining program. They sang together, played together, and incidentally thought together of the great breadth of the work and the many roads leading into the future. Even though located in a strictly agricultural community, only two of the pupils expressed their wishes to become farmers, the others choosing flying, dancing, nursing, teaching, music, and one or two other vocations. Only four want to marry (so they say), making a very, very unusual record of desires. But their whims were offered in fun, and no doubt will change in time. The Farm Life school is the only

ALL HOG RAISERS ELIGIBLE TO SIGN 1934-35 CONTRACT

Previous Ruling Barring Certain Producers Is Modified

All hog producers, regardless of their past hog production, now are eligible for hog reduction payments under a new ruling on the 1934-35 reduction contract, it was announced by W. W. Shay, swine extension specialist at State College.

A previous AAA ruling specified that if the 1932-33 hog litter average was less than three, the contracting producer was not required to reduce hog production in 1934, and in any event was not eligible to receive any hog reduction payments.

Under the new ruling, Shay says all producers will be entitled to reduction payments of \$5 per head on a number of hogs equal to 75 per cent of their past average of market hog production, provided their litter average and production of hogs for market is reduced not less than 25 per cent. In cases where the litter average is less than four, this means that the contracting producer will have to reduce by one litter in order to comply with the contract, even though this will constitute more than a 25 per cent reduction from the litter average.

The change in ruling was made in consideration of an unexpected interest in the corn-hog program among small hog farmers. These farmers will now have an opportunity to share in the proceeds of the processing tax being collected on the slaughtering of all hogs for market, regardless of by whom sold.

NORFOLK GIRL SETS FARM STYLE

Miss Theima Twiford, of Norfolk, Virginia, an employee of the Smith-Douglass Company, makes good use of the cotton bags in which her company packs fertilizer. For work around the house, she has designed a neat apron, as well as a work suit. Many farm women are doing the same.

FERTILIZERS FOR USE IN GARDENS

Stable Manure Best, But Other Kinds May Be Successfully Used

Stable manure is one of the best forms of fertilizer for garden crops. It furnishes plant nutrients in a reasonably-balanced form, and it helps to keep the soil in good condition by furnishing organic matter. On soils of average fertility, manure should be applied broadcast at the rate of 10 two-horse wagonloads per acre. For best results, it should be applied in fall and winter. If applied near planting time, manure should be in a well-rotted condition, and should be thoroughly mixed with the soil.

Poultry manure is also an excellent garden fertilizer, but because of its concentrated nature it must be used with caution. For general garden purposes, 3 or 4 tons per acre is sufficient. If applied near planting time, poultry manure should be in a thoroughly rotted condition.

If manure is not available, then it will be necessary to use chemical fertilizers. For general garden use, the mixture should contain ammonia, phosphoric acid and potash in a well-balanced formula. Standard 5-7-6 or 5-8-6 formulas are generally satisfactory for garden purposes. On soils of average fertility complete fertilizers may be used safely at the rate of a ton per acre if applied broadcast. If applied in the furrow, the application should not be greater than 1,000 or 1,200 pounds per acre.

In addition to the complete fertilizer, side dressings of readily available nitrogen fertilizers are usually advisable, especially for leafy vegetables such as cabbage, collards, lettuce, and kale.

CROPS TO PLANT IN MONTH MARCH

Number of Garden Vegetables Should Be Started During This Month

In Beds—Start seeds of tomato, and eggplant in cloth-covered frames the second week in the month. Sow the seeds in rows 10 inches apart, dropping 25 to 30 seeds per foot of row. Cover the bed with tobacco cloth or a light grade of sheeting. Have a pile of pine straw handy, and cover the bed with 6 inches of straw if freezing weather occurs.

A few early hills of cantaloupes, cucumbers, squash, and watermelons may also be started in the same bed. These plants must be transplanted without disturbing the roots. A few early hills for the home garden may be transplanted with a spade or shovel.

For an early crop of sweet potatoes, bed the seed early in the month. Cover the bed with cloth as suggested.

Outdoors—Plant Irish potatoes, beets, radishes and carrots early in the month if they have not already been planted. Make succession plantings of radishes every week until the first of April. A late planting of cabbage may also be made with reasonable assurance of a crop if strong plants are available. Take a chance on a few rows of corn and a row of snap beans during the third or fourth week of March.

NOTICE OF SALE

Under and by virtue of a deed of trust executed to the undersigned trustee on the 15th day of January, 1925, to secure a note of even date therewith, of record in the register of deeds office in book S-2, page 73, and the stipulations not having been complied with, and at the request of the holder of said note, the undersigned trustee will, on the 31st day of March, 1934, at the courthouse door Martin County, offer for sale to the highest bidder, for cash, the following described land:

Being that certain tract or parcel of land in Martin County, State aforesaid, beginning at the mouth of a ditch on Wild Cat road, runs thence along said ditch N. 41 1-2 E. 109 poles; thence N. 20 3-4 E. 6 poles to a stake; thence N. 4 1-4 E. 123 poles along a line of marked trees to the run of Everett Swamp at a stake; a corner; thence down the swamp to Beaver Dam Swamp, thence up Beaver Dam Swamp to the mouth of a small branch, near the spring, thence along J. E. Barnhill's line to the Wild Cat Road; thence along the said road to the beginning. Containing 110 acres, more or less, and being the same premises described in a deed of trust of record in the public registry Martin County in book U-1, page 128, and better known as the Teel farm.

This 27th day of February, 1934.
PAUL BAILEY, Trustee.

Two Methods for Treating Worm-Infested Poultry

There are two methods for treating worm-infested fowl. One is to place worm-removing ingredients in the mash and the other is to treat each individual bird with medicated tablets or capsules. The individual treatment is best, however, as in this way the poultryman is sure that each bird gets the medicine. These tablets are sold at practically all drug stores and may be bought for both chicks and adult birds. Place the tablet or capsule deep in the bird's mouth and rub the throat downward to make sure the medicine is swallowed. Follow this treatment with Epsom salts at the rate of one-half pound of salts to three gallons of water for every 100 adult birds. The day following clean the house thoroughly and burn all refuse.

NOTICE
Having this day qualified as administrator of the estate of A. T. Crawford, deceased, late of Martin County, North Carolina, this is to notify all persons holding claims against the estate of said deceased to present same to the undersigned on or before the 14th day of February, 1935, or this notice will be pleaded in bar of any recovery thereon. All persons indebted to said estate will please make immediate payment.
This the 14th day of February, 1934.
ASA H. CRAWFORD, Administrator.

NOTICE OF SALE

By virtue of the authority contained in a certain deed of trust executed on the 1st day of December, 1927, by W. J. Bryan to Southern Trust Company, trustee, and recorded in book X-2, at page 526, of the office of the Register of Deeds for Martin County, default having been made in the conditions of said deed of trust, the undersigned trustee will, on the 29th day of March, 1934, at 12 o'clock noon, at the courthouse door of Martin County, N. C., offer for sale at public auction to the highest bidder, for cash, the following described property:

Those certain lands containing 89.7 acres, more or less, situated on the Hobgood-Oak City road, about 3 miles from the town of Oak City, in Goose Nest township, Martin County, state of North Carolina. Bounded on the north by D. Davis; on the east by D. Cavin; on the south by Jose Bryant; on the west by L. B. Bryan and beginning on the Hobgood-Oak City road, L. B. Bryan's corner, thence N. 65 E. 1680 feet; thence N. 89 E. 277 feet; thence N. 65 30' E. 315 ft.; thence S. 31 30' E. 114 feet; thence S. 66 30' E. 100 feet; thence S. 47 30' E. 233 feet; thence S. 26 30' E. 200 feet; S. 36 30' min. E. 189 feet; S. 18 E. 330 feet; thence S. 34 40' E. 328 feet; thence S. 27 30' E. 75 ft.; thence S. 47 W. 56 feet; thence S. 59 30' W. 470 feet; thence S. 66 W. 418 feet; thence S. 30 W. 370 feet;

WILLIAMSTON, N. C.
ELECTRICITY IS CHEAP

CLIMB! CLIMB! CLIMB!

THREE times a day, 1095 times a year, many women tread their stairs to have a little hot water for household cleaning and for bathing. Such climbing and attention is the constant demand of an old-fashioned water heater.

Why should YOU toil and moil for a little hot water when you can have plenty at the turn of the faucet?

An automatic electric Water Heater will provide you with plentiful gallons of it instantly, any time of the day or night—automatically.

It will end needless stair climbing and all the time you spend in waiting for hot water. It will add joy to bathing, shampoos, shaving, and every household cleaning task.

Yet, the original cost and the operating cost will be a pleasant surprise. Decide now to stop being a slave to an old-fashioned water heater. Ask us, or your dealer, for full details regarding hot water by wire.
