Visit At Farm Life
Misses Rena Grey Wheeler and Frances Cherry spent the week-end with Mr. and Mrs. John Wells near Farm Life.

In Robersonville
Rev. Charles H. Dickey will preach in Robersonville tonight.

In Washington Thursday
Mr. and Mrs. John Wier visited in Washington yesterday.

From Hamilton
Mr. C. C. Rawls, of Hamilton, was in town yesterday attending court.

In Town Thursday
Mr. R. L. Smith, of Robersonville, was a business visitor in town yesterday.

Here Yesterday
Mr. and Mrs. John A. Hardison, of Williamston Route 4, were in town shopping yesterday.

Home Betterment Club
Due to the weather, the Home Betterment club did not hold its regular meeting this week. A few of the members met with Mrs. Dick Wynne. There was no business to transact, so the members joined in a quilting party. Mrs. Wynne served apples and a variety of candy. The next meeting will be held with Mrs. Velma Randolph.

LEADER SCHOOL HELD THURSDAY BY HOME AGENT
Every Club in County Is Represented by One or More Leaders

By Miss Lora E. Sleeper
The second leaders' school conducted for organized home demonstration clubs was held last Thursday in the office of the home agent, beginning at 10:30 a. m. Miss Mary E. Thomas, extension nutritionist, was in the county again to conduct this work. In spite of bad weather and bad roads, leaders were present from all clubs. This is the very first time there has been a 100 per cent representation from all clubs. Leaders in eight clubs assisted the home agent tremendously when they voluntarily conducted the February meeting. Leaders had most interesting reports to add to the interest of the meeting. The subject of the demonstration for this leaders' school was "Dried Fruits and Vegetables." Miss Thomas urged the leaders to use more dried fruits and vegetables to reduce the cost of the food supply and add to the better nutrition of the family. Suggestions for adequate storage space for such products were made to the leaders and if interest is an indication the leaders will have a more varied food supply as a result of the information received through the leaders' school. The recipes were enjoyed during the noon hour by all present. Leaders came in from the following clubs: Ange Town, 2; Poplar Chapel, 2; Jamesville, 2; Holly Springs, 2; Everetts, 2; Parmele, 2; Poplar Point 1; Bear Grass, 1; Macedonia, 2; and Williams Chapel, 1. One recipe enjoyed by the women follows:

Bean in Tomato Sauce
2 cups dried beans, 4 cups water, 1 cup diced salt pork, 1 onion, 2 cups tomatoes, 1-2 teaspoon salt. Wash the beans and cover with water, soak overnight. In the morning, discard the water. Cook them in 1 quart of salted water until tender but not broken. Drain off liquid and reserve for soup. Brown the onion with the salt pork in a skillet, add the beans, tomatoes, and salt. Heat to the boiling point, then simmer until the tomatoes have thickened. Serve at once.

CANDIDATES FEES FOR NUMBER POLITICAL JOBS MUCH HIGHER

Final Dates for Filing Were Also Changed at Last Session of General Assembly; Costs 1-2 of 1 Per Cent Of Annual Salary for County Offices

Filing fees for a number of candidates in primary elections in North Carolina have undergone material upward revision by virtue of an act of the General Assembly of 1933. The schedule embraces the following filing fees: For representative in Congress, \$100; for judge of the supreme court, \$75; for judge of the superior court, \$65; for solicitor \$39; "for any other state office, 1 per cent of the annual salary of the office." Attorney General Dennis G. Brummitt has ruled that the statutory salary schedule must control and not the percentage to which salaries have been reduced temporarily. Each candidate for county offices, including membership in the general assembly, both senate and house, under the new law, must pay at the time of filing notice as an aspirant in the primary, 1-2 of 1 per cent of the annual salary. However, there are several exceptions; namely, candidates for surveyor, coroner, county commissioners, and members of the county board of education; also any and all township offices. In each of these cases there is a filing fee of \$1. Attention also is being called to the fact that the 1933 legislature changed the filing time of candidates for state offices from the sixth to the seventh Saturday before the primary, "therefore the notice, with filing fee, must be in possession of the board of elections by 6 o'clock p. m., on Saturday, April 14, 1934, to be used." The filing fees are paid to the state board of elections. April 14 is the deadline for filing of judicial and congressional as well as state-office aspirants. The primary will be conducted Saturday, June 2. Candidates for all county offices must file their notices by 6 p. m. Saturday, May 5.

EXPECT FIGHT FOR REDUCTION CIGARETTE TAX

Determined Drive To Be Made On Congress This Year
Washington.—The first determined drive to reduce cigarette taxes from the high levels they reached during the World War will begin shortly after the house complete consideration of the tariff bill, which may be this week. Hearings on the cigarette tax, which is the only war-time tax which has never been reduced, were scheduled to begin this week before a subcommittee headed by Representative Fred M. Vinson, of Kentucky, and a new date will be set as soon as the house finished with the tariff fight. There are differences of opinion as to whether there will be action at this session and there are also differences of opinion as to whether the manufacturers, the farmers, or the consumers would be the greatest beneficiaries from the tax, which now amounts to 6 cents a pack, or about half the retail cost, and to \$1.08 a pound, or about six times the amount the farmer receives for the leaf tobacco. It will be argued that everybody concerned will benefit and that the government will not lose because of greater consumption. An effort will be made to reduce the tax by 25 per cent, to \$2.25 a thousand cigarettes, which will be substantially above the pre-war tax of \$1.25 per 1,000.

Leaf Exports To China Last Year Show Gain

Louisville, Ky.—The value of United States exports of leaf tobacco to China registered an increase of 27 per cent in 1933 over the preceding year, according to the Kentucky district office of the Commerce Department. Preliminary figures show that the leaf tobacco trade of the United States with China in 1933 amounted to 73,924,448 pounds, valued at \$9,728,525, compared with 74,780,896 pounds, valued at \$7,924,448 during 1932. United States cigarette trade with China during 1933 showed a slight increase in volume and a slight decrease in value compared with the preceding year. The 1933 figures show shipments of 81,460,000 cigarettes, valued at \$238,415, compared with 81,154,000, valued at \$225,226, for 1932.

PHILLIPS VERI-BEST FERTILIZER

It is very, very important that you thoroughly understand that the North Carolina Fertilizer Law changed your analyses of fertilizer completely this year. There is no more 8-3-3. The 3 per cent ammonia has been changed to 3 per cent nitrogen making it 3-8-3, and nitrogen is 21 1-2 per cent stronger than ammonia; therefore, the fertilizer analyzing 3-8-3 this year is entirely different from the old 8-3-3, and we do not think the new 3-8-3 is a balanced fertilizer. Since you have increased your nitrogen 21 1-2 per cent, you also should increase your potash. Use Phillips' Veri-Best EUREKA tobacco fertilizer analyzing 3-8-6. This is a balanced fertilizer, and if your land is in a high state of cultivation, you can use less pounds per acre.

Choose fertilizers made with better INGREDIENTS

Rich ingredients from sea, soil and mines are mixed together to make Robertson's Fertilizers. The three usual plant-foods are supplied in varied forms. Every bag also contains other elements necessary to growth.

PERUVIAN GUANO—the manure of birds—is the richest of all plant-foods. It provides needed elements in forms that man has never been able to duplicate.

PACKING-HOUSE products are generously used in Robertson's Fertilizers. Blood and tankage, rich concentrates of nitrogenous materials, supply Phosphoric Acid as well.

FISH scrap provides nitrogen that is instantly available, yet not easily leached away. In fact, fish are found in 31 different elements—some badly needed by plants and by certain plants.

THE bones of pre-historic animals are dug up and treated to supply the phosphoric acid that all crops need.

FROM mines in the Andes, we import Chilean Natural Nitrate—the only nitrogen that comes from the ground. It contains also other needed plant-foods—such as iodine, potassium, sodium, calcium, boron and magnesium.
