ing to the local Ford dealer. "The hard-used car of the so-called jalopy type keeps turning up with the frequency of the proverbial 'bad penny,' and right now there are too many of that type on the road for the safety and peace of mind of the careful motorist," he said, "but through a peculiar combination of circumstances the used car market today also offers many cars of exceptional value—cars with more miles ahead of them than behind them."

"The average motorist of today must of necessity keep closer watch on motoring costs than formerly. This has resulted in the trading-in of many cars of all sizes and makes that are still in good condition. Also, improvements in riding qualities of the latest cars, such as in the new spring suspension of the new Ford cars, have provided the low-priced cars with a riding ease that compares with that formerly available only in large and expensive cars. The results in more trading-in."

"Careful buyers, therefore, now have an unusual opportunity to acquire used cars with a future ahead of them. We call our better type of used cars "R and G Used Cars." This means they have been thoroughly reconditioned and guaranteed. "With spring already here, and the open road calling, those who feel this call of the road and can't afford a new car, will find it well worth their

### The Most Remarkable Development in Farm Machinery in Years

This Farmall Does in 6 Hours What 9 Men, 9 Outfits, and 11 Mules Do in 9 Hours

THIS McCormick-Deering unit is one of the most efficient pieces of equipment ever designed for the farmer. It is a combination cultivator, planter and fertilizer distributor mounted on the McCormick-Deering Farmall 12 Tractor. Taking two rows at a time, it opens the furrows, throws up the beds, puts down fertilizer, plants, and marks the rows all in one operation. When the planting season is over, the attachments can be removed and the tractor used for other work. Or if it is desired to use one of the attachments only, the others can be removed.

See us about this outstanding new equipment for planting cotton, corn, peanuts, and soy beans.
