Clay Williams' Attitude

And so Clay Williams is against the government's tobacco program.

We all know his reason is that his company and its allied interests do not want anything in the way when they want to run over the farmer and take his crop at their own price.

Mr. Williams must have won his points in our North Carolina legislature. Perhaps the sworn statements of the large sums they paid their lobbyists answer the question. They won, anyway. Now, Mr. Williams wants to destroy the power at Washington which has helped the tobacco growers of the country.

With whom will you take your stand? With a few tobacco companies which have made many millions, at least ten times more than was fair and legitimate, while thousands upon thousands of men, women, and children have gone hungry, ragged, and suffered back-aches and heartaches, worked night and day, most of the time without any profit? Frankly, we are with the people and dead against Mr. Williams and his policies, because they have not been fair in the past, and we refuse to trust them in the future.

Another Puzzling Question

And now another puzzling question arises, which we frankly admit we are unable to decide. That is, whether to make Currituck sound a salt or a fresh water body.

It is by nature a body of fresh water, making it one of the finest duck-hunting waters in the world on account of the wild celery which grows on the bottom and upon which the ducks and geese from the northland come to feed in winter.

However, more recently, since the Albemarle and Chesapeake Canal has become a part of the Inland Waterway, which drains the waters from the Elizabeth River, the salt is killing the celery and the ducks are without feeding grounds. But the salt water is bringing crabs in by the tons, and the contest is between the duck and the crabber, which brings the matter squarely up to us folks who cannot tell which dish we like best, duck or crab. We must choose whether to side with the crab industry around Norfolk or with our own Bruce Etheridge, who has charge of our fish and fowl industry as the head of our department of conservation and development.

Japan's Attitude

We know of no war in history so mean and low as that Japan is waging against China at the present time.

For some time, Japan has been going over to China, forcing the Chinese officers to resign and putting such persons as they wished in their places and then practically grabbing a slice of the country the size of one or two of our American States in the name of their puppet officials.

The vital question is: What shall we do to check that kind of procedure?

It is a well known fact that Japan has just as strong a desire for California as she has for China. The big trouble will come when Japan has had time to absorb China and put her to work to feed the Japs, giving them the opportunity of building up the most powerful fighting machine in the world. Then it will be dangerous to fly the American flag, the English Union Jack, or any other kind of cloth in the Pacific and Indian Oceans.

Our only danger of foreign war is with Japan. Something should be done, but when we start to say something, the Japs throw it up to us about stealing our land from the poor Indians, all except the land embraced in the Louisiana purchase, Alaska, and Texas—a part of which they charge us with stealing from Mexico. When England and France or Germany make a suggestion about fair play, the Jap says, "Oh, well, all you have you took by unfair trading or by cruel force. You gobbled up Africa, much of South America, and practically all of the islands of the sea." Of course, we all stand convicted of most of the allegations. Yet that does not solve the question.

Japan must be suppressed, or the world will have to bow the knee to Japan not so many centuries hence, unless—as has happened frequently in the past—they perish from their own greed.

It might be the proper thing to whip Japan immediately.

Federal Housing Program

For several years past, homes and small business properties all over America have been steadily going down hill. Many property owners have been unable to pay for normal upkeep and repairs. A far greater number have delayed the larger improvements which mean better housing and better living.

Now is the time to make those improvements. The National Housing Act was designed to help improve property and increase its value and usefulness. Through one of the simplest and most reasonable systems of financing ever devised, the act makes it possible to make delayed repairs and provide better home surroundings.

This program is unique in that it sets up a condition whereby private finance and enterprise can resume their normal functions in every community, with a feeling of complete assurance as to safety, liquidity, and reasonable profit. The government will make no direct loans. The value of the program lies in the fact that it provides the means of profitable use of the enormous amount of funds now available in practically every bank in the nation.

Magnetism and Power

President Roosevelt is evidently a man of great magnetism. Any man who can make Huey Long and Senator Borah take off their hats and eat out of his hand is evidently a man of power. And any man who can convert two as independent souls as Long and Borah must have magnetism.

It was not the force of fear he used, because they are not the type of men that you can scare. It is the power of truth and justice. The people need to stick to the President. Most of his critics have selfish motives.

Needed Protection

The increase in number of state highway patrolmen and the more rigid enforcement of the speeding clauses of the law should undoubtedly lower the death rate in auto accidents in this state. Also, the licensing of drivers should help, too.

It is good that the state has provided even that much protection.

A Long Time

It will be in the year 1980—45 years hence—before Harmon M. Waley, one of the kidnapers of the Weyerhaeuser boy, son of the wealthy lumberman in Tacoma, Wash., will be free again. Not only does his 45-year sentence bar him from the pleasure of using his ransom money, but it has gone further and divorced him from his young wife also for 45 years. We have always heard that love never dies, yet we wonder if it will not grow a bit cold in the term of 45 years. At any rate, it will be a long time for the transgressing husband. And, too, his young wife, who, it seems, is no less guilty, has not yet faced the court, and she may have to take a prison vacation also.

Easier To Find Jobs

Young men graduating from college this year find it much easier to find jobs than for some years. It shows things are better in the business world. Don't forget these things when the politicians begin to howl.

Be Thankful for the Weather

Many people have panted and declared this to be the hottest weather they ever saw in June, yet not one in a thousand can tell whether it is as hot as it was last June or not. Perhaps all of us who were born prior to last June have seen it just as hot.

Even if it is hot, why should we complain. We, for the most part, make our living in hot weather. We fill our barns and storehouses when it is hot to carry us through the cold gloomy winter months.

As for our part, we had rather see a person move to a climate they do like rather than to fuss and fume at the weather where they are.

Let us be thankful for the weather and the blessings it brings.

Human Values

Elkin Tribune

When news men asked President Roosevelt what is the social objectives of the administration he replied that he covets the cooperation of the people in trying to increase the security and happiness of a larger number of people in all occupations of life and in all parts of the country; to give them more of the good things of life; to give them a greater distribution, not only of wealth in narrow terms, but wealth in the wider terms; to give them places to go in summer time—recreation; to give them assurance that they are not going to starve in their old age; to give honest business a chance to go ahead and make a reasonable profit, and to give every one a chance to make a living.

That is a worthy ambition, and what is more President Roosevelt is not merely giving lip-service to this ideal; there are abundant evidences that he has been striving to this end, although through the fabric of the social program there are threads, not entirely in harmony with the whole. But these he would pluck out and throw away.

The relief program, inaugurated in emergency, admittedly has encouraged dependence on government, and discouraged individual thrift. But in the determination to make federal relief condition upon work, this would largely be corrected.

The President's appraisal of the importance of human values may seem like radicalism to some, but the objective that he subscribes to is one that eventually America must adopt if this nation is to hold its high place in the world.

July or August Best Time For Cultivating Alfalfa

Cultivation of alfalfa is often of very little value except under certain conditions. When the stand is thin and crab grass comes in late in the summer, the crop may be cultivated during July or August. This will destroy much of the grass. If any cultivation is done it should be made immediately after a cutting. A spring tooth alfalfa harrow is the best implement for this work. In no case should a disc harrow be used as it splits the crown and renders the plants more susceptible to diseases and freezing.

NOTICE OF SALE

Under and by virtue of the power of sale contained in that certain deed of trust executed to the undersigned Trustee by Ed Ormond and wife, Julia Ormond, dated 24th day of

LEGAL NOTICES

May, 1928, to secure certain notes of even date therewith, said Deed of Trust being of record in the Register of Deeds Office in Book Y-2, page 462, and the stipulations in said deed of trust not having been complied with, and at the request of the holder of said bond, the undersigned Trustee will, on the 22nd day of July, 1935, at 12 o'clock, noon, in front of the courthouse door of Martin County, offer for sale to the highest bidder, for cash, the following described land:

Beginning at a white oak in Kewarkee Branch, Jos. B. Ayers corner, running thence a NW course along said Ayers line to Ed Ormond and Jordan Hynna's line, a corner; thence a S course along Jordan Hynna's line to the Marsh Perkins line; thence a SW course along the Marsh Perkins line to the run of Kewarkee Branch; thence a North direction down the various courses of said branch to the beginning. Containing eight acres, more or less, and

LEGAL NOTICES

being the same tract of land deeded to Ed Ormond by J. L. Hassell, see Register office in Book SSS, page 593. Also, a house and lot in the Town of Williamston, N. C., bounded by the Old Williamston and Hamilton Road, Haberstadt property, a cemetery and others, and being the same house and lot occupied by said Ed Ormond.

This 21st day of June, 1935. B. A. CRITCHER, Trustee.

NOTICE OF SALE

North Carolina, Martin County. Under and by virtue of the power of sale contained in a certain deed of trust executed to the undersigned trustee by William Henry Purvis and wife, dated the 15th day of December, 1925, and of record in the Public Registry of Martin County in Book Q-2 at page 464, said deed of trust having been given for the purpose of securing a certain note of even date and tenor therewith, default having

LEGAL NOTICES

been made in the payment of same, and the stipulations contained in said deed of trust not having been complied with, the undersigned trustee will on the 23rd day of July, 1935, at twelve o'clock, noon, in front of the courthouse door of Martin County in the Town of Williamston, North Carolina, offer for sale to the highest bidder, for cash, the following described real estate, to-wit:

A tract of land and improvements thereon in the town of Williamston, N. C., on the North side of Main Street, beginning at a stone, Ben Scott's corner on Main Street, running thence a straight line along Ben Scott's line to a ditch; thence up said ditch to Brown and Shade's corner; thence along Brown and Shade's line to Main Street; thence down Main Street to the beginning, containing 1 acre, more or less.

This 22nd day of June, 1935. WHEELER MARTIN, Trustee. je-25 4t-w Elbert S. Peel, Attorney.

YOU ALWAYS GET BETTER QUALITY AT NO HIGHER PRICE WHEN YOU BUY A FIRESTONE TIRE WITH FIRESTONE NAME AND GUARANTEE

Tires may look alike on the outside, but on the inside where blowouts start, they are different. Firestone Tires are made blowout-proof by Gum-Dipping, a patented extra process which soaks every cotton cord and insulates every strand with pure liquid rubber. In fact, every 100 pounds of cotton cords absorb eight additional pounds of liquid rubber. This special process prevents internal friction and heat, the main cause of blowouts. No other make of tire is Gum-Dipped, yet you pay no more for Firestone blowout-proof protection than you are asked to pay for tires built without this patented safety construction feature.

The make of tires you buy for your car becomes a matter of vital importance when you realize that there were 882,000 automobile accidents in 1934 injuring 954,000 people and killing 36,000 and that 43,000 of these accidents were caused by blowouts, punctures and skidding.

Firestone High Speed Gum-Dipped Tires hold all world records on road and track for safety, speed, mileage and endurance. These records emphasize the undisputed evidence that Firestone Tires are not only blowout-proof but give greatest protection against skidding.

THERE ARE THREE QUESTIONS AND ANSWERS THAT WILL SOLVE YOUR PROBLEM OF WHAT TIRES TO BUY

1 "Will the tread give me the greatest traction and protection against skidding?"

Recent tests by a leading University show that Firestone High Speed Non-Skid Tires stop a car 15% quicker than any other of the leading makes. For eight consecutive years Firestone Tires have been on the winning car in the dangerous Pike's Peak Race where a skid means death. This is undisputed evidence that Firestone gives car owners greatest protection against skidding.

2 "Are they blowout-proof?"

Firestone Gum-Dipped Tires have the most amazing records for being blowout-proof of any tires ever built. In the gruelling 500-Mile Race at Indianapolis, May 30th, every one of the 33 cars was equipped with Firestone Gum-Dipped Tires. Kelly Petillo won the race and broke the record over this 26-year-old rough brick track without tire trouble—in fact, not one of the 33 drivers had tire trouble of any kind.

Ab Jenkins drove his 5,000-pound car on Firestone Gum-Dipped Tires over the hot salt beds of Utah, 3,000 miles in 23½ hours, at an average speed of 127.2 miles per hour, with temperatures as high as 120°, without tire trouble of any kind. These are most amazing proofs of blowout-proof protection ever known.

3 "Without sacrificing these two important safety features will they give me longer mileage, thus making them the most economical tires I can buy?"

Firestone High Speed Tires not only give you more than 50% longer wear, but also lowest cost per mile. This is made possible by the tough, wear-resisting tread built with higher shoulders and a wider, flatter contour. This thick, rugged, scientifically designed tread is held securely to the Gum-Dipped cord body by Firestone's patented construction of two extra layers of cords under the tread. This is a special construction feature not used in any other tire. Unequaled mileage records by thousands of car owners add undisputed evidence of the longer wear and greater economy of Firestone High Speed Tires.

SAVE ON AUTO SUPPLIES

BRAKE LINING As low as \$3.30 Four Wheel Shoe Exchange	BATTERIES As low as \$5.55 Buckeye	FIBRE SEAT COVERS These covers will save your clothes and your upholstery. There is nothing cooler for summer driving. They are easily cleaned. Made in conservative patterns, with sizes to fit all cars.
GARDEN HOSE \$1.38 25 Feet	SPARK PLUGS 58c Pack of Six	Kool Fibre \$1.79 Coupe
Tool Chest . . 65c	Kool Koolshion \$1.99	Sea Breeze \$2.35 Coupe
Sun Goggles . 29c	Sun Visors . . 59c	
Luggage Racks \$1.99	Electric Fans \$1.99	

UNIVERSITY TESTS SHOW FIRESTONE HIGH SPEED TIRES STOP CARS 15 TO 25% QUICKER.

GUM-DIPPED CORDS GIVE GREATER BLOWOUT PROTECTION. GUM-DIPPING IS NOT USED IN OTHER TIRES.

WIDER, FLATTER TREAD GIVES MORE THAN 50% LONGER NON-SKID WEAR.

MASTERPIECE OF TIRE CONSTRUCTION

HIGH SPEED TYPE Gum-Dipped

Made with the highest grade of rubber and cotton. Accurately balanced and rigidly inspected and we know it is as perfect as human ingenuity can make it.

SIZE	PRICE	SIZE	PRICE
4.50-21	\$7.75	4.75-19	\$10.05
4.75-19	\$8.20	5.00-19	\$11.05
5.00-19	\$8.80	5.25-18	\$12.30
5.25-18	\$9.75	5.50-17	\$13.75
