

### NEW FEATURES OFFERED DAILY IN RADIO TALKS

Discussion Timely Topics Will Be Included In Future Programs

A discussion of the preparation of turkeys for the Thanksgiving and Christmas markets will be included in the schedule of Carolina Farm features, a daily broadcast of farm and home information over several North Carolina stations.

C. J. Maupin, extension poultryman at State College, will give the talk Friday in which he will point out the most approved practices for handling the holiday birds.

Judging from requests coming into State College, more and more farm people are listening to these daily programs, which are sent out by the State College Agricultural Extension Service. The talks on home demonstration are proving especially popular.

Included in the program for the week of October 28 to November 2 will be talks on "Getting Ready for Hog-Killing" by R. E. Nance, Monday, October 28 and "Poultry Improvement" by R. S. Dearstyne, on Friday, November 1.

### Lone Farmer Refuses His Tobacco Contract So Far

So far, only one tobacco grower in Columbus County has refused to sign the new adjustment contract.

### Bacteria Needed by All Legume Crops

When legumes are planted for soil building purposes on a field where they have not grown for several years, the field should be inoculated with nitrogen-forming bacteria.

Without these bacteria, the legumes cannot absorb nitrogen from the air and are, therefore, of little value as a soil builder, said I. V. Shunk, professor of botany at State College.

The bacteria which affect some legumes will not affect others. Hence it is essential to inoculate the soil with the right kind of bacteria, he added.

One method is to take surface soil from a place where there have been legumes like those to be planted in the new field, and broadcast this soil over the field at the rate of 300 to 500 pounds per acre.

This had disadvantages, since the new soil may spread weeds or plant diseases. A good method is to introduce the bacteria through the use of commercial cultures, Professor Shunk pointed out.

The cultures are inexpensive and may be obtained in liquid form, or solidified agar, or in soil or peat. The cultures can be placed in the soil where they will be near the roots of the legumes.

Even if the new field has grown legumes in recent years, the amount of bacteria left in the soil may be small, and it is economically unsound not to inoculate the soil, the professor stated.

He also pointed out that when legume crops are cut for hay, the nitrogen in the plants is removed. Plowing under the remaining roots and short stubble will not help the soil very much.

### Lincoln County Farmers Plant Alfalfa This Fall

Lincoln County farmers have planted over 1,000 pounds of alfalfa seed this fall. Most of the land so seeded has been well limed, inoculated, manured, fertilized and had a perfect seed bed.

### Ford V-8 Streamlining Steps Ahead

THE IMPROVED streamlining of the front end of the Ford V-8 for 1936 is well illustrated by this camera shot. Note the horn set into the fender apron behind a chromium grille and the way the graceful contour of the fender is carried to the edge of the new radiator grille. A glimpse of the new hood louvers is caught behind the headlamp. The V-8 insignia on the prow of the car is of new design.

### 4-H Club Exhibits Were Featured At Recent State Fair

Club Leader Says Boys and Girls Made Big Showing For Themselves

The 4-H club boys and girls made a good showing for themselves at the State fair recently, according to I. R. Harrill, club leader at State College.

The dairy calf club exhibits, a feature of the fair, were the best ever staged by 4-H club members in this State, Harrill declared.

The corn club display and the team demonstrations by the 4-H club girls were also on a high plane, indicating the strong position of club work over the State.

Ray and Dempsey Morrison, Iredell County boys, captured top honors in the Jersey calf club show. Calves entered by these boys won prizes in individual contests and also won the junior, senior and grand championships.

Iredell County also stood first in the county group exhibits, with Caldwell taking second place and Catawba third.

In the Guernsey calf club show, Armandie Trons of Burke County won the junior championship and Bud Rice of Buncombe won the senior championship and the grand championship.

In the Guernsey county groups, first place went to Buncombe, with Davidson second and Burke third.

Wilkes County took first place in the corn club show, winning the sweepstakes for the best county exhibit and the best entry of 10 ears of any variety. Brice Hayes, of the Furler club, entered the latter exhibit.

If the quarantine is invoked in this state, all shipments of nursery stock outside the state will have to pass Federal inspection. Cars moving out of the State will also be stopped and any nursery stock or earth will be inspected. During the summer months, or what is termed the flying season for the beetle, all interstate shipments of fruits, vegetables and other farm crops will likewise be subject to Federal inspection. A similar provision is made for shipments inside the State to keep down the spreading of the pest, but this must be handled by state agencies.

In 1933 a similar meeting was held in Washington, but the number of beetles found in the traps in this State were not sufficient to justify a quarantine. Areas in Virginia, as well as in 14 other states, have been under quarantine for some time.

### Lespedeza Again Proves Its Worth

Lespedeza has scored one of its greatest successes as a soil builder on the farm of Charles A. McCall in McDowell County.

A one-year crop of lespedeza, plowed under last fall, gave the biggest increase in corn yield this year that has ever been witnessed by E. C. Blair, extension agronomist at State College.

In 1934, McCall sowed lespedeza on his wheat field and allowed it to grow through the summer. Both weeds and lespedeza were plowed under in the fall.

One is insured, the other has allowed his policy to lapse. To own your own home makes you one of life's privileged characters. However, you jeopardize this privilege by not carrying adequate insurance.

Let this agency protect your home

### Harrison and Carstarphen

BILL CARSTARPHEN NORMAN HARRISON Branch Bank Building WILLIAMSTON, N. C.

This year he planted corn on the field, with the rows running from the lespedeza area into a section where only weeds had grown. No fertilizer or manure was applied, but the corn was cultivated well.

On the two areas there was so much difference in the corn that J. Gordon Blank, county agent, measured the yields. On the area where no lespedeza had grown, the yield was 24.8 bushels to the acre. Where lespedeza had been plowed under, the yield was 59.4 bushels.

Since both areas were cultivated alike, Blair stated that the increased yield of 34.6 bushels per acre may be attributed directly to the lespedeza.

McCall's farm is in a valley at the foot of the Blue Ridge mountains, in a region that until a few years ago had been considered too cold for lespedeza.

He has used lespedeza regularly in a three-year rotation of corn, soybeans, wheat and lespedeza.

### WANTS

FENCED AT MY LOT: 2 FEMALE hogs. Owner may get same by paying costs. A. F. Lilley, Williamston, N. C. R. F. D. 3.

WANTED TO RENT: ROOM AND bath or cheap apartment. Write, giving full details. Address "X," care Enterprise. 1t

ONE PONY FOR SALE: IS YOUNG. Will sell at a bargain. See Jimmie Lee, 2 miles south of Bear Grass. 1t

WE ARE AUTHORIZED DEALERS for the amazing Aladdin kerosene lamps and supplies. Come in today for demonstration. Brown's Service Station, Bear Grass, N. C. o22 4t

FOR SALE: CAR GALVANIZED roofing. Prices lower. C. L. Wilson, Robersonville, N. C. o1 8t

### Japanese Beetle Is Prevalent In Nearly All Sections of State

To Hold Public Meeting To Discuss Extending Quarantine

With tests showing the dreaded Japanese beetle prevalent in all sections of North Carolina as well as in other states, the Secretary of Agriculture has called a public hearing on November 16 to discuss extending the quarantine.

Alternatives to be considered are extension of the quarantine to cover North Carolina and all affected areas, or abandonment of the quarantine on the ground that it has proven ineffective.

A full discussion of the Japanese beetle control problem will take place, and North Carolina officials, as well as those from South Carolina, Illinois, Indiana, Ohio, Michigan and Missouri, along with nurserymen, truck growers, florists, gardeners, golf club managers and park officials from these states, where quarantines may be invoked, have been invited to attend the meeting.

## Tobacco Is Selling Higher

AT THE

# Roanoke - Dixie Warehouse

Williamston, N. C.

Our warehouse sold approximately 125,000 pounds of tobacco Monday. Our customers said it was one of the best sales they had seen anywhere this year. Many excellent sales were made and some piles sold as high as 60c. If you are not selling with us, make a change, for we firmly believe it will be to your advantage financially. We list a few of the many good sales made on our floor this week:
