The Expected About To Happen

The expected is now about to happen. It has been known for years that our North Carolina educational system was in danger. The big interests are evidently against an efficient system of public education. They figure that they can do all the planning needed and that they can hold an ignorant laborer in subjection easier than they can an educated man. Therefore, they have growled for years over the liberal democratic course pursued by the University of North Carolina. They have worked hard to get a plastic trusteeship which they might control. The Governor for a number of years has chosen trustees largely from members of the legislature, too many of whom have had the imprint of big business stamped in big letters on their backs.

It is time for our State University to operate as a true educational institution and not be used as a political football to be kicked around and bossed by a bunch of grafters.

The University can run without the donations of a few selfish interests, and will do far more good without the grip of selfishness around its throat.

The meanest thing in the whole round-up is the fact that they have sought the aid of the athletic department, of the alumni association and of students to raise a row of dissent against Dr. Frank Graham and cause his resignation from the presidency which he has so ably held for several years. This was bound to have been a trick advanced by certain people possessing more knowledge than the athletic association possesses.

Our athletics are doing the same sad thing in America that cock fighting did in Spain and bull fighting in Mexico. Unless our American educational system subordinates athletics to some more mature and higher principles of life we, too, are doomed. Regardless of how much fun we get out of seeing "our" team beat the other fellow, we have to admit that life is built on a more substantial footing than on all fun.

Greece has her great coliseum and Olympics, but was unwilling to live under the rule of a president of the people's choosing. It may be that we will have the same trouble some day. At least that is the turn

athletics seems to be taking in our own State. University by letting the money power rule.

If our people are not very cautious, our entire educational system will soon go into a state of collapse. We are drifting from one system to another, finding it easier to study something simple and get more time to play. Then when bad weather comes, we find it to hard to get to school, but it scarcely gets too cold or muddy to break up a play.

Now the fight on Dr. Graham seems, to a great extent, to be founded on the stand he has taken for honest athletics. Our State University has considerable income from land grants, endowments and state appropriations. This income is used largely for advancing loans to young men and women who seek an education. The colleges generally have similar incomes. The all-powerful athletic associations want to govern the loans, and go out to the high schools of the country and find the best ball playing prospects and assign them loans regardless of how rough their necks or how thick their heads are. Dr. Graham says that is not right, that every young man and every young woman in the State has the same right to the loans, and he demands that all applicants be examined without regard to physical strength. If the applicant be a cripple with a sound mind and good character he is entitled to a loan just as much so as a physical giant. And to this principle we subscribe because it is honest. North Carolina citizens should raise up against any clique that fights a man because he is honest and true.

Poor Economy

It seems that sawmill men sometimes use very poor economy. A Washington mill is now hauling logs from the Aulander section, nearly 60 miles, passing not less than four sawmills that are located from 25 to 40 miles nearer the standing timber. Since no business can operate without some profit and moving logs a long distance is expensive, it would seem that the mill getting its timber 60 miles away can make no profit without charging too much for its output.

The type of logging that mills are following now means that there is not going to be a tree of any size standing within a few years. You hardly ever see a fair-sized log going to the mill these days, and from every indication the saw mill will soon be a thing of the past in these parts.

Another Hoover Promise

Three Greensboro men evidently took Hoover's claim too seriously when he advised killing the new deal and putting a chicken in every pot, or if may be that they did not take the saying seriously enough. At any rate, they decided to make the job sure, so far as they were concerned, and began raiding their neighbors' chicken coops. Now they are eating food from the jail kitchen.

They might have known that the Hoover promise of a chicken to everybody could not be depended upon, because his promise of prosperity "just around the corner" never materialized until he was put out and a good man put in his place.

Divorce Needed

There seems to be some friendship between Jim Farley and Al Smith. There also appears to be very little difference between them, and we expect to see them some-day grazing in the same pasture.

We have had our Shouse as a leader in our Democratic party; we have had Raskob to boss our party. Both have disgraced us. And, as much as we are against divorces generally, we would honestly like to see a decree of separation between our party and our national chairman, Mr. Farley.

NOTICE
Having this day qualified as executrix of the estate of Kathleen Wallace Lilley, late of Jamesville, N. C., notice is hereby given to all persons holding claims against said estate to present the same to me on or before the 28th day of January, 1937, or this notice will be pleaded in bar of recovery of same. All persons indebted to said estate are requested to make immediate settlement of same.
This 28th day of January, 1936.
ANNIE WALLACE FLEMING.

ALSO SELECTED SHORT SUBJECTS

An Open Letter to the Citizens of Robersonville and Adjoining Territory

We have orders for many new 1936 Chevrolet automobiles from people of this section who wish to trade in their present car as part payment. We have a large number of used cars on hand that prevents us accepting these new orders. We are forced to make a decision and accept a certain loss—either lose new car sales and profit—or sell our used cars at low prices necessary to quickly dispose of them, prices below cost. We have decided to take our loss on used cars and, beginning this week we are starting a real and genuine used car sale. Our prices have been slashed to the bone, costs and values completely ignored. Our loss is your certain gain. Many of these cars have been reconditioned and will certainly give you excellent service. Our stock embraces all makes and models with a price range to meet every purse. Our terms are the best. We are not quoting prices, so come and see for yourself that this is one sale you have looked for, a sale where your dollar will do double duty.

BEWARE OF IMITATIONS!

IF YOU WANT THE KIND OF TOBACCO THAT ORANGE GROWS, YOU CAN GET IT ONLY FROM ORANGE!

There are now many imitations of Orange. Success breeds imitation. But, there is still only one Orange, as every tobacco grower knows who has used it.

Orange is the only goods that has proved its worth in the severest kind of accurately conducted competitive tests. Over a period of many years Orange has been challenging all comers. During the past four years 37 growers have tested it against 71 competitive plots, using every well known competitive brand on the market.

What happened? Orange's 4 year average in these tests shows that it produced \$49.40 per acre more—nearly \$100 per ton extra!

Do you wonder that we say "beware of imitations"?

Do you wonder that we say—Orange will outgrow, out-produce, outqualify and outdo in every way any tobacco fertilizer known.

Do you wonder that we say—if you want the kind of tobacco Orange grows, you've got to buy Orange!

The next best tobacco fertilizer you can buy is S-D JAMACA. Thousands of satisfied users prefer it to any other tobacco goods made.
