

# Sectional Chamber Commerce Dinner To Be Held April 16

Speaker for Tarboro Event To Be Announced By Secretary Soon

The fourteenth annual dinner of the Eastern Carolina Chamber of Commerce will be held in Tarboro April 16th, at 7 o'clock p. m., in the Episcopal Parish House, according to a statement made by N. G. Bartlett, secretary of this organization, for this paper this week. "While we are not sure who the principal speaker will be, we are certain to have a man of outstanding national importance," Bartlett said. An orchestra featuring Miss Josephine Larkin, of Ziegfeld Follies fame, has been booked for the occasion. The meeting is open to the general public. Dinner plates will be \$1 each, and reservations may be made direct to Eastern Carolina Chamber of Commerce, Kingston, or to Merchants Association, Tarboro. It is considered by officials to be very fitting that the annual meeting this year is being held in the peanut section, for it was this organization that took the leadership in the campaign to get benefits for peanuts under the AAA and succeeded in getting definite results for the thousands of growers in Eastern Carolina within six months from the time the act was made into a law, while some other commodities that had the same opportunity did not benefit at all during the three-year life of the AAA. The peanut growers of the section owe a long debt of gratitude for this one achievement of the organization.

Currituck farmers are exhibiting interest in electrifying their farms. Contracts and right-of-ways are now being signed from Moyock to Coinjock.

# TOBACCO CROP IN 1935 SECOND LARGEST SO FAR

Average of \$20.34 Paid for 618,681,090 Pounds Sold in 1935

North Carolina's 1935 tobacco crop of 618,681,090 pounds, the second largest in the State's history, netted tobacco farmers an average of 20.34 cents per pound or a total of \$112,044,768, slightly less than the return for the much shorter production in 1934.

The Federal-State crop reporting service a few days ago released the final sales report for the 1935 crop, showing the price average well below the 28.44 cents per pound for 1934 when 395,135,924 pounds were produced.

For their 1934 efforts the farmers got \$112,376,628, or \$331,860 more than in 1935 despite the fact that their crop was 155,723,408 pounds less.

The service warned of "the seeming intention to increase the 1936 flue-cured crop in the face of existing record high stocks," and called attention to the low prices paid in 1931 on the heels of the record crop which totaled 563,327,065 pounds.

"The high price for the 1934 crop was due to several factors," the report reviewed, "AAA control, a low year's production and improved economic welfare. The low price of the 1931 crop was due to the record 1930 crop, tremendous decline in consumption, prospective record stocks or carry-overs and the serious depression existing at that time, even though the 1931 crop was greatly reduced.

"So we find 1936 largely repeating itself with phenomenally high stocks, the second highest crop production, absence of AAA control, no definite tobacco program, and low consumption," it stated.

Last year's high sales on North Carolina markets were 13,000,000 pounds more than had been estimated and, in addition, the reporting service estimated, there were about 20,000,000 pounds of North Carolina flue-cured tobacco sold in other states.

# HINTS FOR HOMEMAKERS

## Pastry

A very tender and flaky pie pastry can be made from the following recipe:

1 1-2 cups flour,  
1-2 cup fat,  
3-4 tsp. salt.  
Cold water to make dough, about 1-4 cup.

If a liquid fat is used no water is needed. Cut the fat into the flour with two knives until well distributed. Stir in only enough water to hold dough together. Knead very lightly to mix well. The pastry may be chilled before it is rolled. Rub just enough flour on bread board to keep pastry from sticking. Roll lightly with rolling pin to about one-eighth inch thickness. This makes enough for a double crust pie. In making a two crust pie, cut the top crust 1-2 inch wider than the lower crust. The edges can be sealed by moistening with milk or water, then folding the top crust under the lower, and fluting edge with fork or fingers. This prevents juices from running out.

When baking pastry shell on outside of pan, choose a pan with sloping sides. Prick a few times with a fork. After it is baked and cooled, the shell will fit nicely inside the pan.

Another way to insure a shapely pie shell is to use two pie plates of the same size. Fit rolled crust inside one of the plates; trim and flute edge. Place second pie plate inside the pastry-lined plate and bake. The weight of top plate keeps crust in place.

Individual tart crusts may be used for creamed meats or meat salads, as well as the sweet fillings.

In order to give the pie pastry a different and pleasing flavor, grated cheese can be sprinkled over rolled out pastry and pressed into it with rolling pin. This is especially good with apple fillings.

Any kind of chilled fruit juice may be used to moisten the flour for the dough instead of water. A cream custard filling would be palatable served in a crust like this.

For a festive looking tart shell, dip the edges, after baked, in slightly beaten egg white, then in crushed nuts. Allow nuts to dry on shell and fill.

## B. Y. P. U. Give Program Here Last Sunday Night

Religious activities of the town Sunday evening were centered in a program by members of the Baptist Young Peoples' Union in the local Baptist church. The only church service was that in the Pentecostal Holiness church.

The Robersonville orchestra appeared on the program and Mr. Cleve Taylor sang. Ray Goodman, jr., played a cornet solo, accompanied by Ben Manning at the piano. The program consisted of a study of South American missions and was greatly enjoyed.

## Seine Fishing Continues at A Standstill at Jamesville

With water more than a foot deep on the battery and another rise in the making, seine fishing at Jamesville continues at a standstill, reports from the fishing center today stating that it would hardly be possible to start operations there this week.

Operators of drift nets and fishing machines are catching more fish than they can handle to advantage, it is understood. However, very few shad and rock have been taken from the Roanoke so far, it was learned.

# Any Surplus Funds Of Highway Money To Maintain Roads

Extensive Sums Will Be Needed for Repairing Damaged Roads

Raleigh.—Those who are worrying about the highway fund are going to have another big surplus in it again at the end of this and next year, while the highway department is not going to have enough funds to repair and maintain the roads from the present appropriation, are unduly aroused, it is being pointed out by officials of the State Highway and Public Works Commission.

For the 1935 General Assembly, in the appropriations act made it possible for the governor to increase the appropriation for highway maintenance if the revenue should exceed the appropriation and if an additional amount should be needed for maintenance purposes.

The result is that "there ain't going to be no highway surplus," by the time the 1937 general assembly meets which means that there will not be the fight over the highway fund surplus such as took place in 1935. This means that if on July 1, there is still a surplus in the highway fund after all obligations have been paid and after the present appropriation of \$10,000,000 for maintenance has been expended, that the governor, as director of the budget, can release as much as he thinks is needed from this surplus for additional maintenance work between July 1, 1936 and June 30, 1937.

Already \$3,000,000 of the 1935 surplus has been used in additional maintenance work, while the present appropriations bill contemplates the using of all the remaining surplus by June 30, 1937, the end of the present biennium. But if it becomes apparent that the highway fund revenues are increasing faster than had been expected and that the surplus is getting larger instead of smaller, the highway department will be able to use some of this additional revenue for maintenance purposes, provided the governor approves of such use.

Any such surplus, however, will have to be in excess of \$2,000,000 since it is agreed that the highway department must maintain a cash balance of at least \$2,000,000 at all times in order to operate economically and keep from having to borrow.

## Add Mineral Mixture To Ration for Young Poultry

Home-grown feeds do not supply enough calcium and phosphorus and it is necessary that a good mineral mixture be provided, especially for growing and breeding animals. For good producers a mineral mixture composed of equal parts of finely ground limestone and steamed bone meal should be added to the concentrate ration at the rate of two pounds of minerals to each 100 pounds of ration. This, together with the minerals carried in the hay and grain will enable the cow to replace the calcium and phosphate taken from her body by heavy milk production.

## AILING ALL THE TIME?

Mrs. Hattie Creason of 314 No. Smith St., Charlotte, N. C., said: "Some time ago I was very thin, lacked strength and suffered badly from headaches. After using Dr. Pierce's Favorite Prescription a short while I began to feel stronger and could eat more. I regained my weight and became well and strong." All druggists. Buy now! New size, tablets 50 cts., liquid \$1.00. Large size, tabs. or liquid, \$1.35.

*"CURIOUS! I ALWAYS THOUGHT OF SILENT ELECTROLUX OPERATION SIMPLY AS A CONVENIENCE"*

**NOW I KNOW**

IT'S FAR MORE THAN THAT

... it's constant proof of the utterly different method of Electrolux operation—no machinery at all! Good reason why only Electrolux can offer all these big advantages:

- (1) No moving parts to wear
- (2) Lasting efficiency
- (3) Continued low operating cost
- (4) Fullest food protection
- (5) Savings that pay for it

### Camels Are Approved as Benefit To Digestion

Smoking Camels has been found a definite aid in promoting good digestion. This fact is announced in an extensive new campaign of newspaper advertising just released by the R. J. Reynolds Tobacco Company, makers of Camel cigarettes. It is the latest development in the constantly widening field of knowledge regarding the physiology of food assimilation, made especially significant by the fact that millions already smoke and enjoy Camels regularly.

Careful studies, now completed, show that smoking a Camel during or between meals gently stimulates and promotes the action of the digestive juices. This conclusion, the result of objective measurements made under controlled conditions, means that regular Camel smokers enjoy maximum benefits, since digestion goes on for approximately four hours.

These new facts are popularized in the campaign through the slogan "For digestion's sake—smoke Camels." The sheer smoking enjoyment obtained from smoking the choice tobaccos in Camels also contributes to their value in relieving the strain on digestion, since it is known that pleasure plays a major role in the proper digestion and utilization of food.

The Camel advertisements gain especial attention through using illustrations of scenes in famous American restaurants where Camels are in demand among those who are in a position to enjoy the finer phases of enjoyable living. Among those restaurants featured are Kugler's, famous old Philadelphia restaurant; the Gold Coast Room of the Drake Hotel in Chicago, and Keen's English Chop House in New York City. "Camels are a favorite here," reports William, of Keen's. "We've noticed that our guests who smoke Camels during and after meals seem to find more pleasure in dining."

The rush, strain and eternal hurry of modern living affects the digestion of people in every walk of life. The value of Camels in easing the effects of this unnatural stress and strain is reported in the new advertising by many Camel smokers who lead strenuous lives; such as Frank Buck; William LaVarre, the explorer; George Lott, jr.; Lester Stofen, the tennis champion, and many others.

### CARD OF THANKS

The Church at Skewarkee desires to express its appreciation to members and friends for their assistance in taking care of the large crowd at the union meeting Sunday.

## WANTS

**TWO HOGS, ONE RED, ONE** light spotted, each with split in right ear, have been at my home since January. Owner will please come for them. Wheeler Latham, Poplar Point.

**LOST: FAIR LOG GRABS ON** Hamilton road between Abbott's mill and Williamston, March 16. Finder please notify L. J. Hardison and receive reward. mar-17-1f

**FOR SALE: BILOXI AND TOKYO** soy beans. Reasonable price. See G. F. Godard at Hardison's Crossing. mr27 2f

**FOR SALE: PIANO. EXCEPTIONAL** bargain. Medium size. Will transfer this beautiful piano to some one in this vicinity for the balance. Terms given. Write Lee Piano Co., Lynchburg, Va. mr27 4f

**RELIABLE MAN WANTED TO** call on farmers in Martin County. No experience or capital needed. Write today. Mcness Co., Dept. B, Freeport, Ill. 1f

**WANTED: WOULD LIKE TO DO** washing and ironing for several families. Maggie Hagan, 226 Washington Street. mr31 2f

**HELP WANTED: TWO EXPERIENCED** and reliable men to drive truck and trailer. Must be energetic and sober. Farmville-Woodward Lumber Co. mr31 2f
