Little Miss Brownie Roberson, the daughter of Mr. and Mrs. E. H. Roberson, celebrated her ninth birthday anniversary near here last Saturday, when a large number of her friends gathered at her home and enjoyed an Easter egg hunt. Games and con-ests were enjoyed by the guests un-til late afternoon, when Mr. Rob-erson, assisted by Misses Esther and Louise Roberson, served refresh-ments.

**Narrative Summary Of March Work by County Home Agent**

**Refinishing of Furniture Is Topic at Club Meetings During Month**

By LORA E. SLEEPER  
**Home Furnishings**  
Eight of the home demonstration clubs during the month had as their subject and demonstration of the meetings, 'Refinishing of Furniture.' Three other clubs which the home agent could not get to during the month of February held their meetings during March on Selection of Furniture. Refinishing one piece of furniture is one of the requirements for an award of merit for the two-years work. One club woman sup-plied an old table for demonstra-tion in one meeting. The table cov-ered with old paint was made very attractive with the removal of the paint, exposing the grained oak wood. There were 15 meetings held during the month with the women.

**Clothing**  
It was impossible to hold only one club meeting in February with the girls. This month every effort was made to make up meetings missed. There were 23 held with girls and with joint clubs. Four hundred and

twenty-one attended. Younger girls are making laundry bags for their rooms and the older girls are mak-ing undergarments. Nearly all girls have completed at least two pieces of work of the required four.

**Home Beautification**  
Home beautification is being car-ried as a minor project by all adult clubs. A portion of the meeting is given over each time to the project. The meetings have been planned to give the women help in planning and planting of shrubs for the home grounds; types of shrubs, flowers, etc., suited to the farm grounds. Seed were given out and exchanged in some of the meetings.

**Community Meetings**  
There were three community meet-ings during the month and each unit in the county representing the farm and home in any way were given a place on the program.

The meetings were held at night in the high school auditoriums of Robersonville, Oak City and James-ville. There were -14 in attendance. The home agent's part on the pro-gram was the "Farm Food Supply." The home agent traveled 1,129 miles during the month, held 38 project meetings and was on the program for four other meetings, spent 4 1-2 days in the office, 21 1-2 days in the field, wrote 206 individ-ual letters and distributed 1,590 bul-letins.

**Potatoes with Discolored Centers Suitable for Seed**

Sweet potatoes that have discol-ored or brown centers will produce good plants. This is what is known as an internal break down. The center cells become discolored and cause the potatoes to have a bitter unwholesome taste. However, the disease is not caused by an organ-ism and therefore there is no germ present that can be transmitted to

the plant and the potatoes will pro-duce good plants. Early transplant-ing on light sandy soils and the use of potash fertilization will, in some cases, correct the trouble. Avoid the use of fertilizers carrying excess nitrogen.
