Tobacco Rental Payments Are Being Made Again After Long Wait

Farm benefit payments, received Kinston a bit irregularly during the past few Williamston months, are expected to start arriving in larger numbers ere long, ac- New Bern to beliefs expressed by the Goldsboro Martin County farm agent's office this week

Eleven of the last 35 1935 tobacco rental checks were received Monday, and the remaining 24 are ex pected shortly. The 11 checks totaled only \$187.53, but the others now due are likely to average \$30

each, it was said. The main checks are expected within a short time, when approximately 200 farmers received their 1935 tobacco price adjustment payments. The checks will average around \$50 each, it is estimated, make ing a total of \$10,000. Each of the 200 farmers will be notified direct-

ly when to ask for their payments Under the terms of the contract in effect last year, the farmer sell ing only 85 per cent of his base poundage will receive 6 1-4 per cent of the price his tobacco sold for up to a certain figure. Year before last that figure was around 21 cents. The percentage decreases in proportion to the increase in pounds sold over his right to participate in the ad 85 per cent of the base. In other justment payments. words, the farmer who sold 95 per

An Appreciation

I am sincerely appreciative of the confidence and trust imposed in me by the people of this county and the Second Senatorial District as indicated by the vote in the primary on Saturday. If I can be of any real service in the Legislature to the people of this section and to the State, my desires will be fulfilled.

Birds More Than Earn Fruits Eaten

The value of the robin and blue bird as the farmer's friend has been proven by exeprimentation showing hese birds more than earn the few fruits they steal from the farmer's orchard, according to S. Z. Pollock, junior biologist of the Soil Conservation Service.

Experiments conducted by the U. S. Bureau of Biological Survey, using 1236 stomacs of robins, show that 42 percent of the robin's food is animal matter; 16 percent beetles; 5 percent grasshoppers; 9 percent caterpillars, and 11 percent various

In the experiment using 244 stomachs of bluebirds it was found that the contents were 58.51 percent animal matter and 41.49 percent vege-table, demonstrating that the bird is of economic as well as aesthetic value, said Pollock.

Where wild food is not abundant, a few fruit-bearing shrubs and vines planted in favorable 'orations will serve the triple-purpose controlling erosion, providing orna-mentation, and furnishing food and cover for the robin and other valuable birds fond of purloining the

IN COOPERATION WITH THE STATE BOARD OF HEALTH, IS

FREE Protection Against Typhoid Fever & Diphtheria

AT THE PLACES AND ON THE DATES MENTIONED BELOW

Typhoid fever is gradually being reduced, but there must be no let-up in vaccination. Now is the time to protect yourself against it. The season is at hand. Take the treatment every third year.

Diphtheria can be prevented by taking Toxoid. Have your children over six months of age immunized against it. It takes about five months to get the protection, so now is the time to take the treatment to be protected this fall.

There is no excuse for even a case of typhoid fever when perfect immunization for two years at a time may be obtained through attendance at the clinics scheduled below. It is the duty of every intelligent citizen to become inoculated toward all preventable diseases, especially Typhoid Fever-for their own protection as well as the protection of their neighbors. It is also their duty to do all in their power to persuade others to take preventive measures. Typhoid Fever, being frequently fatal, is a useless economic waste, as it is so easily preventable. Remember the schedule below and visit, without fail, the point nearest you on the dates mentioned.
