

### FSA Increases Funds For Tenant Purchase Loans In This State

North Carolina will have a 250 per cent increase in funds for tenant purchase loans, to help tenants become owners, for the new fiscal year beginning July 1, according to Vance E. Swift, State Director of the Farm Security Administration. Mr. Swift says he has been advised by Regional Director George S. Mitchell that \$1,318,965 has been allocated to this state as compared with \$527,586 for the fiscal year ending Thursday.

The funds are this state's share of nearly \$4,000,000 allocated to this 5-state region from the \$25,000,000 appropriated for this purpose by the last Congress. The distribution by regions and by states was determined by the secretary of agriculture on the basis of farm population and prevalence of tenancy. Swift said.

For economy in administration, tenant purchase loans this year have been limited to 17 counties in this state where it was considered good farms could be had at fair cost and where a high degree of tenancy was found. The program now will be expanded into additional counties on the same basis, Swift said, adding that the opening of applications for these loans will be announced later through the press by county FSA supervisors. The farm tenant program is being carried on, along with FSA's regular rehabilitation program, by the farm security administration, in co-operation with a State FSA advisory committee; and applications for these loans are passed upon in the counties by a county committee of three farmers who certify as to applicants' characters and ability to own and manage a farm. Mr. Swift pointed out.

### Prevention In Spread Of Mosaic In Tobacco Fields

Care should be taken in topping, worming and suckering the tobacco plants to prevent the spread of mosaic in tobacco. Be sure that the healthy plants are worked first as indiscriminate handling will spread the disease. It will also aid in preventing the spread if all diseased plants are removed before each cultivation. After the diseased plants are removed, the hands and all clothing should be carefully cleaned before additional work is done in the field.
