Tax for Cleanliness Paid In New Jersey

A new study reported last week by one of the numerous Emergency ners Tax Councils of New Jersey formed in the last year to protest hidden taxes and the rising cost of living shows not only how many taxes exist on a cake of facial soap but how a calculation is reached. When a housewife pays for ten cakes of facial soap, the report says. she actually receives only nine for the tenth is consumed by hidden taxes. Fourteen of these unseen levies are placed on the tallow producer, 14 on the perfume maker, 15 on the chemicals manufacturer, 17 on the wrapper factory, 14 on the soap company, 10 on transcortation companies, 10 on the soap wholesaler and 10 on the retail store, making an almost unbelievable total of 104 taxes, of which the average consumer is completely unaware even

Farmers Combine To Buy Equipment

More than 1,000 North Carolina farmers are taking advantage of the community services of the Farm Se curity administration to make loans from \$25 to \$2,000 to purchase farm equipment ranging from corn planters to harvester-thresher combines and tractors, according to Robert S. Curtis, State Supervisor, Community Services.

"Under this plan farmers organize into groups of from three to 50 or more participants and appoint a master borrower," Mr. Curtis said. The Farm Security administration then makes the loan to the farmer selected, who must be a man of outstanding character and good reputation in his community.

Small farmers are combining their efforts to purchase farm machinery ordinarily too expensive for a small though they take a toll of 10.3 per Ten Carloads Of Phosphate pensive farm tools are frequently Used By Mitchell County bought by three or more farmers. Stringent enforcement of regulations governing ownership, licensure muzzling and leashing of dogs would have prevented the bites they as-

The extent of the problem is evidenced by the fact that in Illinois alone 18,466 dog bites were reported to the state department of health in 1936 and there were 10 deaths from rabies in that period.

The closer the site of the bite to the central nervous system the shorter was the incubation period of the disease, the Cook County doctors found.

More than 50 such groups have made purchases since the first of the year. Many applications for cutting and discing plows, registered stallions, sorghum mills, mowing machines, rakes and other valuable farm equipment are pouring into the county supervisors. Mr. Curtis has pointed out that loans are safe since all the master borrows have been selected with care and they are good, dependable farmers

OU DON'T believe it? We don't either.

And it's equally hard to believe that some families are still fuseing with water-heating methods that are as old-fashioned as bathing stockings . . . as out-of-date as a long-sleeved bathing suit! . . . And so needlessly.

Hot water by wire—the modern way-is more economical than you now think. Economical in operation, economical to acquire. The new automatic Electric Water Heaters give you an abundant supply of hot water, when and where you want it, with no fuss. no muss, no bother. They require no attention—just connect it and forget it!

Let this be YOUR time—to get modern with an automatic Elec-tric Water Heater! Prices are low -terms are easy—and the operating cost is a pleasant surprise.
