## Urge Planting Fall And Winter Garden

With living costs on the increase particularly as related to food items, it becomes increasingly necessary that each individual be self-sustaining. Nothing could be more appropriate than the planting of a fall and winter garden. No one can prophesy or foretell just what affect the war will have on this country but it is a known fact that a large section of the universe will be dependent upon the Americas for food. Do your part, plant a garden. It will be of inestimable value to you and your family and at the same time you will be supplying the needs of America and the world.

### Leader

G. Tom Scott, of Johnston County, chairman of the State AAA committee, has been chosen to head the U. S. Department of Agriculture's defense board in the State.

### Hitler

Military gains are reported as constituting Hitler's strongest hold on South American respect.

## What Women Are Doing In Defense

How about women's place in the defense program? In Britain, women have taken over many actual army duties ordinarily handled by men, in addition to civilian jobs like driving buses, making munitions and farming. Many Britishers fear the distaffers will not readily surrender their new jobs after the war, and it might mean an economic and social upheaval. "Over here," the American Women's Voluntary Services is speeding up its organization, college girls are studying defense work and many volunteer ambulance units are being formed. At the Frankford arsenal in Philadelphia several hundred women have been trained for jobs ranging from packing munitions to adjusting time fuses. Even though there's been talk of conscripting women, most observers believe American intervention in the war would not cause so much upheaval as it has in Britain. Ambu-

## People Earning Record Incomes

Well, we finally made it. After 12 long years it is now possible to say that the people of the United States are earning more money than ever before in history. Income payments to individuals reached a record high during May, equal to an annual rate of \$86,000,000,000. This compares with total income payments last year just under \$76,000,000,000 and a peak figure in 1929 of just over \$82,000,000,000. Let's take a quick look at some of the places this earning power is coming from. Railroads, for example. Every day nearly 13,000 freight cars are being loaded with commodities and merchandise of all kinds. Down at the shipyards the Navy's construction program involves more ships than have been turned out in the last 25 years. In the construction industries business is humming. Residential building alone is at the best pace since 1928, when 750,000 new dwelling units went up. The steel industry in the first half of 1941 produced a record-breaking total of 41,000,000 tons. That's within 20 per cent of steel output in all 1917, peak year of World War I. And so it goes throughout the warp and woof of our present national defense economy.
