

Green Wave Falls Before Attack Of Scotland Neck, 32-0

The Green Wave of Williamston High lost its first home game of the season here last Thursday night at the hands of Scotland Neck, 32-0. The visitors were forced to take to the air in all their scoring attacks as the Williamston line played a whale of a game in holding off any running thrusts.

Williamston looked good at the opening of the game gaining a first down on the first three plays, and forging to mid-field when Wynne's pass to Sullivan was intercepted. Scotland Neck pushed down to the 15-yard marker on ground plays and passes, but Williamston took over on downs. Quarterback Sullivan played safe by kicking on third down to put the ball back in mid-field. Scotland Neck scored from here on a short pass after which the pass receiver stepped through the whole Green Wave secondary to go on over for the touchdown. Williamston was in possession of the ball as the first period ended 6-0.

In the second period the Wave threatened when runs by Sullivan and Wynne and a pass to Cunningham put the ball on the 12-yard line. But the locals gained nothing through the line and their passes fell incomplete. Scotland Neck took over on their own 12 yard marker but didn't stay there long. They raced 40 yards on the first play, and then completed two long passes for their second score.

The half ended 12-0. The visitors came back strong in the third period to score on a pass and run by Keel which netted 80 yards. Again in the fourth period Scotland Neck scored twice on passes to Keel who played either end. Williamston threatened once in the second half when they drove down to the 10-yard line.

The Green Wave, sparked by the running of Jack Sullivan and fine play by the entire line, tallied 11 first downs to the visitors 13.

Outstanding for the Green Wave was the entire line sparked by Reg Griffin, J. B. Taylor, Getsinger, Billie Peele, Cunningham, and Kemp Peele. Jack Sullivan starred on the offense by his consistent runs. Keel, a big blonde, was alternated at tackle and end and did some excellent pass receiving, was outstanding for Scotland Neck.

The Green Wave plays the B team at Rocky Mount Thursday afternoon.

Things To Watch For In The Future

Special cement floors for shower rooms treated so that, when wet, they give off minute quantities of copper which kills "athlete's foot" germs (though you probably can't see the bactericide any better than you can the germ) . . . Pretty close to the long-sought "perpetual motion" machine are new clocks so delicately adjusted that they are "wound up" by changes of temperature . . . Roof shingles in strips of four, for speedier installation, but so marked as to avoid a too-regular or "artificial" appearance . . . An electric heater made to be built into a wall, with safety grill and fan to distribute the warmed air . . . A wrist watch that can be set right to the second; pulling the stem stops the second hand while the other hands are being set . . . An apple beverage closely resembling freshly-pressed cider, but "keeping" indefinitely because of a flash pasteurizing process . . . All plastic goggles for workers engaged in grinding and similar tasks—with no frames or sidepieces to obstruct "horizon" vision.

AAA Soybean Loan Program Is Offered

A loan program for soybeans, the first ever offered under the Commodity Credit program and designed to aid orderly marketing of the 1941 crop, has just been announced by the U. S. Department of Agriculture. David T. House, AAA state committeeman and widely-known farmer of Eastern North Carolina, said soybean production has been stimulated greatly by defense demands. Although the crop is concentrated in the eastern part of the State, some soybeans are grown in practically every county.

Loans will be made through the Commodity Credit Corporation and will be administered in the field by county committees of the AAA, in a manner similar to that now used in connection with loan programs in effect for wheat, corn and other grain. Grades to serve as basis for determining the loan rate will be established according to the official grain standards of the United States for soybeans.

Loans at the rate of \$1.05 per bushel for No. 2 or better soybeans of all classes, stored on farms, will enable farmers to retain their crop for marketing at a later time. By providing

a regular flow of soybeans to the mills all during the year it is hoped to avoid overcrowding the limited facilities of the crushing mills and the capacities of the commercial warehouses.

All notes on loans will mature on demand, or June 30, 1942, but loans on farm-stored soybeans may be extended for one year. Loan values for the beans stored in approved warehouses will be at 7 cents per bushel less than for farm-stored beans. This difference represents the estimated average of storage charges the Commodity Credit Corporation would be required to pay to the warehouseman should the producer fail to pay his note.

Loans for farm-stored soybeans will be on a note and chattel mortgage basis, and warehouse loans will be on a loan and loan agreement basis with warehouse receipts as collateral. Loans on the 1941 soybean crop will be made until January 31.
