College Teams Will Play in Rocky Mount

Rocky Mount — Two undefeated freshmen eleven's will meet here Friday night at Municipal Stadium in the annual Rotary club charity game. William and Mary Papooses will oppose the Wake Forest Baby Deacs in a game scheduled to get underway at 7:30.

Last year the Baby Deacs won in one of the most thrilling games ever played in the local stadium. Approximately 4,000 spectators are expected to be on hand for the annual charity game.

The Baby Deacs whipped fros eleven's of Duke, Carolina, and N. C. State to win the North Carolina freshman title with ease. The little Indians from William and Mary have had an easy time with all their opponents this year and have been recognized by Virginia sports writers as the best freshman team in the Old Dominion.

Many former high school stars well known to eastern Carolina sport fans are playing for the Baby Deacs this fall. They include Russ Perry, of Durham, Tom Herring and Billy Brooks of Wilson, and Bill Webb of Tarboro.

Entire proceeds from the game go to the Rotary club charity fund for work among the needy in this vicinity.

Cotton Ginnings Pushing Toward 5,000-Bale Mark

Few believed it, but it is fairly apparent now that the 1941 cotton production in this county will exceed that of a year ago. According to a Bureau of the Census report released by Special Agent Vernon Griffin this week 4,852 bales of cotton had been ginned up to November 14th this year as compared with 4,175 bales ginned in the corresponding period in the county last year.

Artillery Having It Tough In Maneuvers

Camden, S. C. — Artillery men in Lieut. Gen. Hugh A. Drum's First Army will sweat and groan as they handle shells for the big guns during the November battles in the Carolinas, and their exertions will be real and not simulated for maneuver purposes. Ten thousand tons of sand have taken care of that.

Since August 5th, ordnance companies, the 50th, 51st, 54th, 56th and 58th, have been pouring the sand in to 200,000 ammunition containers and dummy shells in order that all concerned with ammunition supply may know at first hand the difficulties involved in feeding the weapons without which the infantry could not advance.

Col. Lucian B. Moody, First Army Ordnance Officer, long has been dissatisfied with practices in past maneuvers in which it was often assumed that ammunition fell like manna from the skies. Realism was what was wanted in the First Army Maneuvers, 1941, and its realism Colonel Moody is going to have.

Actual-truck columns will rush the ammunition cases to the gun emplacements. The cases will approximate as nearly as possible in actual and volume those which in actual combat contain the live ammunition. Maneuver umpires have explicit instructions to allow no fire credit unless the real quantities of ammunition containers required are on hand at the game.

These rigid ammunition regulations will necessitate a steady stream of supply trucks and combat trains flowing to and from front and rear areas. Real ammunition-dumps will be constructed. To further instill realism any shortages in ammunition-carrying vehicles will be considered the result of battle losses. Thus, some units will be forced to send their ammunition trucks on three or four trips to the supply source before the needed requirements have been obtained.

relieve Dutch forces who have been guarding aluminum mines where this country gets 60 per cent of its raw material. The move is a protective one, and one that was branded as robbery by Germany. There is some talk about taking over French Guiana and possibly the French island of Martinique in the Caribbean Sea.

In Berlin today, Nazi leaders are trying to set up their "new order" under anti-communistic flag, but France was said to be missing at the vassal states are represented, and some kind of a pact will be proposed for a five-year period.

In this country attention still centers on the labor front, and some legislation is now definitely in the making to assure uninterrupted progress in the defense program.

A mass movement of troops—some 800,000—has been announced by the War Department, but the boys will be coming home from the Christmas holiday. It is understood that the Coast Line has been ordered to make available more than 100 trains for moving the soldiers in this section of the country during the Christmas season.

Odd Names But 100 Per Cent American

There are Yanks in the R. A. F. and all nationalities in the famed French Foreign Legion, but it is seldom that you will find the singularity of interest developed in the Quartermaster Motor Transport School, Fourth Corps, Area, Fort McPherson, Ga.

A quick look at the roster of the students in the Motor Transport School reveals at least 11 different nationalities of men who are learning to become vital cogars in Uncle Sam's defense program. They are being instructed in the special mechanical and allied technique that will keep thousands of motor vehicles rolling in all branches of the service.

Into the Army melting pot of the Motor Transport School at Fort McPherson, Ga., have come Poles, Czechs, Slovaks, Lithuanians, Yugoslavs, Hungarians, Greeks, Poles, Checks or Italians, they are 100 per cent Americans working side by side, learning to forge an important link in the moving chain of Uncle Sam's motorized vehicles.

Somebody has figured out that if you, as an average American householder, used enough candles in your home to get the same amount of light you now get from electricity, your monthly candle bill would be \$350.

ROUSE YOUR LIVER BILE

Sleep sounder—Get up feeling great More ready for a good day's work To be normal your liver should discharge about a full quart of digestion-aiding bile juices every day. A scanty flow—a slowing up may mean sick headaches, biliousness, poor digestion, that half-sick, half-alive feeling.

Snap out of it. Get a bottle of Kruschen Salts tonight. Start right in tomorrow morning and take 1-2 teaspoonful in a glass of water (hot or cold) half an hour before breakfast, and keep this up for 30 days. Do this and you too may know what it is to get up feeling fit and ready for a real day's work. Try Kruschen for the next 30 days and see what it means to you when bile flows freely on your guarantee of satisfaction or money refunded. Clark's Pharmacy.
