

Know the AMERICAS

PAN AMERICAN SANITARY BUREAU — AN INTER-AMERICAN VENTURE . . .

With the American people showing today a new concern for public health, it is timely to take a look around us and see what has been done on our own continent in the field of organized

sanitation. The Pan American Sanitary Bureau, an organization of long standing, has been in the light. "Many years before the Good Neighbor policy was heard of, the task of preventing the spread of disease in the Americas. Through such important and practical activities as improving international disease reporting, draining swamps for the eradication of mosquitoes, killing disease-carrying rats, disinfecting drinking water, rushing aid by airplane to an flood or earthquake, the bureau has created feelings of friendship and respect that are deep and lasting."

WILLIAMSTON, N. C.

FAITHFUL

Pfc. Shelbert Ores, the son of Ophelia Ores, RFD 1, Williamston, has been in the service for over three and one-half years, and has seen more than eight months service in the European theater. His commanding officer recently commended Ores on his outstanding service and fidelity as a member of his command.

The bureau itself was created primarily to protect commercial interests. At the turn of the century infectious diseases and consequent quarantines and closing of ports interfered with trade and business in such a way that it was thought advisable to establish an organization which would try to remedy such conditions. At the Second Pan American Conference, held in Mexico City in 1902, the Pan American Sanitary Bureau was created as an independent office, housed in the building of the Pan American Union and cooperating closely with its divisions, but distinct from it. Financed by contributions from each country in proportion to its population, the bureau has gone way beyond its original aims and is today the oldest international health body in existence. Not only does it seek to prevent diseases and thus eliminate quarantines, but it secures reports on sanitary conditions, educates the people to

Authorized To Wear The Distinguished Unit Badge

With the AAF Engineer Command in Italy—Pfc. Lyman L. Britt, of Williamston, was recently authorized to wear the Distinguished Unit Badge. His organization was awarded the citation for its untiring efforts and professional skill and determination in the rapid production of target charts and interpreted aerial photographs for the Mediterranean Allied Air Forces.

A company clerk and typist with the map makers of the 941st aviation engineer topographic battalion in Italy, he has been overseas about five months.

control scourges and diseases and acts as a consulting center in health matters. It strives, in one word, to develop efficient urban and rural sanitary services in the American republics.

With the aid of a competent headquarters staff including doctors, editors, writers, librarians, research workers and stenographers, a service of field experts among whom are physicians, public health hygienists, sanitary engineers, veterinarians, nurses, entomologists and laboratory workers, and with the cooperation of national and local officials, the Pan American Sanitary Bureau is waging a great battle for health. Thanks to its efforts and to the campaign it started in 1930 in Peru and Ecuador, plague, for instance, has almost disappeared from those two countries where it was more prevalent than anywhere else in Latin America. In accordance with its policy of aiding health departments to act independently in an efficient way, the bureau so well trained health officials in Peru that they were, in turn, able to assist other countries in plague research and control. The work done by the Pan American Sanitary Bureau in connection with the Concepcion, Chile earthquake in 1939 is another remarkable example of the excellent results achieved by this office. "While the radio in the city of Concepcion was still reporting the catastrophe, more than 5000 air miles from Washington, the bureau cabled its offer of services of doctors and engineers. Chile answered "What we need most is pure drinking water; send us chlorine." Within two hours the bureau had secured the chemical and a top priority to send it by plane. Meanwhile the bureau's engineer in Chile had left Santiago by air for Concepcion. Just four days after arriving, he reported that the emergency drinking water supply was safe and abundant." In the fight against malaria—the scourge which is said to cause more deaths than any other disease—the bureau has again proved most successful. The malariologists on its Malarial Committee have been active in both the theoretical and the practical fields. From detecting dangerous stagnant water, probable breeding site for mosquitoes, to making a complete list of the species of this insect that carry malaria in our continent, the committee has worked well and efficiently.

Sore Tender Aching Feet

In Just Five Minutes These Sore, Tender, Aching Feet Get Almost Amazing Relief

In just one minute after an application of Emeril Oil you'll get the surprise of your life. Your tired, tender, aching, burning feet will literally jump for joy. No fuss, no trouble; you just apply a few drops of the oil over the surface of the foot night and morning, or when occasion requires. Just a little and rub it in. It's simply wonderful the way it acts on all foot misery, while for feet that sweat and give off an offensive odor, there's nothing better in the world. It's a wonderful formula—this combination of essential oil and camphor and other antiseptics so marvelous that thousands of bottles are sold annually to help soften up corns and callouses.

CLARK'S PHARMACY

MAKES GOOD

J. Francis Price, native of Williamston, was recently appointed an administrative assistant in the Displaced Persons Division of the United Nations Relief and Rehabilitation Administration, and is expected to enter foreign service, possibly in Germany, within a short time.

The son of Maggie Respass Rice, of Williamston, he served thirteen years as registrar and assistant professor of German and French at Shaw University, Raleigh. While there he took a leading part in various war drives, the Governor's Work or Fight Committee, the Red Cross and War Price and Rationing Board in Wake County. He was second vice president of the National Association of Collegiate Deans and Registrars in Negro schools and chairman of the Raleigh Citizens Committee.

appear before L. B. Wynne, Clerk Superior Court of Martin County at his office in the town of Williamston, N. C., within 30 days after 18th day of July, 1945, and answer or demur to the complaint of the plaintiff or the plaintiff will apply to the court for the relief demanded in the complaint.

This the 18th day of June, 1945.

HOWDY, NEIGHBOR!

Your Carolina Trailways driver is a man with a thousand friends. As he waves to Bill Jones, he's probably thinking, "I'm glad to see Bill has his tractor running again because he hasn't had it in the field for several days and I was afraid he was having trouble with it."

This friendliness exists throughout every community served by Trailways and it is the most valuable asset Carolina Trailways has. This spirit was fostered long before Pearl Harbor, has withstood the greatest trials in the history of our country, and is the basis for an even closer relationship in the great days to come.

Don't say Can't say **CAN** Raddy Kilwatt

6 RULES TO OBSERVE WHEN YOU PRESERVE

1. Don't can wilted, overripe or partly spoiled food... it won't keep!
2. Don't prepare more than your canner will hold. Food spoils if it stands around.
3. Don't pack too tight... especially corn and greens. Tightly packed jars heat through too slowly.
4. Don't lose track of time... follow reliable timetables to the minute for successful canning.
5. Don't stand hot jars on their heads... you may break the seal.
6. Don't place hot jars on a cold surface or in a draft. They may crack!
