**Choking Democracy**

The detestable smear attacks so cunningly advanced and without any responsibility whatsoever against those men who would stand up and champion the cause of the common people, will eventually choke Democracy.

Those who advance the crumb economy system where a few at the top would share the whole loaf and leave the dropping crumbs for the man, are dead set on wiping out anyone who would stand up for the common good of all.

Their hold on the coveted position shaken during the Roosevelt years, the economic royalists are now coming back to wipe out the people's representatives. That's bad within itself, but it is even worse when the royalists create a condition under which good men will hesitate to run for public

office. It'll be a sad day in this country when all the candidates are handpicked by the monopolists and a leader dares not step forward because there is the abuse to be accepted with the possibility of crucifixion.

**Security But Not Socialistic!**

The American Telephone and Telegraph Company, one of the world's great holding companies, had a long meeting the other day. The business, for the most part was cut and dried.

When one of the little stockholders suggested that pensions for ranking company officials be limited to \$25,000 a year, he was "hooted" down. Another little guy proposed that pensions be paid for partly by the company officials sharing in the provisions of the system. He, too, was shouted down. Another one of the little fellows suggested that salaries in the hundred thousand class be reduced in any year the company failed to pay the "traditional" \$9 a share dividend, but his cry was lost in the wilderness.

The big boys really walked off with the melon and got security. And no one branded their action as being socialistic.

**Immunity**

When a person studies conditions in those countries without a king or democratic government, he is almost immediately isolated as a follower of some ism. We forget that we can't hope for peace unless we first study and understand both sides of a problem.

On the other hand reactionaries in this country apparently have immunity even if they attack Democracy and go on to suggest the use of rifles and shotguns.

Robert P. Gerholz, president of the National Association of Real Estate Boards, is quoted as saying, "It may be time to use shotguns and rifles—and you know what I mean." The association's vice president, Herbert U. Nelson, is quoted as saying, "I do not like democracy. I think it stinks."

Those guys seem to have immunity, but such men as Owen Lattimore and others who have studied the Far East and lent their services in an effort to unravel the problems relative thereto are brazenly branded as communists.

**IMPORTANT TO REGISTER**  
To the Editor:

Permit me space in your paper to again call attention to the importance of people who are eligible to register and get their names on the book by reason of becoming of age or moving into another community from which they once formerly voted, in which case you would have to have a transfer from the registrar where you once voted.

My experience in the past has been many will wait until it is too late to get their names on the register and could not vote.

There are also many people who do not consider the primary of much importance which idea is also wrong of both the primary and election. The primary is even more important, for at that time you have the chance to pick your choice (which is a hard job this time). As conditions under these circumstances are, it is more important to vote in the primary than in the election, but both are given you as your privilege for being an American citizen.

If you have not registered, let me urge you to do so now and be ready to select your candidate. Your respective registrar will register you at his home any-
