

Stresses Supply Of Pure Water

By W. B. Gaylor, Jr., County Sanitarian

You can't trust to luck when it comes to a water supply. Plenty of pure water is not only important to human beings, it counts a lot in the care of live stock.

A farmer who installs a water system providing for pure water is in much the same dilemma as the Ancient Mariner who, you will recall, found himself becalmed in the middle of the ocean with "water, water everywhere, and not a drop to drink." The clear cool water of a spring is unsafe to drink unless properly protected, and cistern water, to be safe, should be chlorinated.

Of course, a spring and cistern are but two of many sources of water, all of which should be protected from contamination.

The best rule to follow in build-

Time To Prepare Plant Beds For Tobacco Crop

Uramon and Cyanamid for weed control in plant beds for next year should be applied during October. The suggested rates are one pound of Uramon and half a pound of Cyanamid per square yard, plus one pound of 0-18-6 or its equivalent, or two pounds of 4-9-3 in the fall, or not more than one pound of 4-9-3 at seed sowing time.

ing or changing a water supply is to call in someone familiar with the local area and its water problems. Your sanitarian may be able to help you and he will give advice without cost. He will also help you disinfect your well, or other source of water, and collect samples for analysis.

A good water supply will last for many years. So don't make the mistake of many farmers who have sacrificed quality for economy, only to find it necessary to replace their entire system with in a few years.

Interesting Bits Of Business In U. S.

Still the "most insurance-conscious people in the world," Americans carry almost twice as much life protection as they did 10 years ago. This year's sales may top \$27,000,000,000, 15 per cent above 1949's peak. . . Bell Telephone system, which at the end of the war had a waiting list of 2,100,000 people, still has 790,000 unfilled orders on its books - this despite the fact that the company has added 12,500,000 new phones since 1945. Three-quarters of all Bell phones are now dial-operated. . . Frozen fruit and juice output continues to spurt to new heights. Total 1950 production, says the Agricultural Department, will surpass 1946's record 525,000,000-pound mark. The biggest increases: probably frozen citrus juice concentrates.

Never before in the history of theatre-going in Williamston has as large a crowd greeted a performance as that which saw the rise of the curtain at the New Opera House on Wednesday night, when "St. Elmo" appeared there. Every neighboring town had sent a large delegation of play lovers and the rush for seats was tremendous.

A quiet marriage was solemnized on Wednesday evening at 7

Hoarding Club Found In Control Of Inventories

An "inventory control" order, designed to curb hoarding of scarce war materials by business firms, was the first restraint clamped on industry by the new National Production Authority. The order contained: (1) A "scarcity list" of materials which are, or threaten to be, of bottlenecks in the expanding production drive; and, (2) a broadly-worded prohibition against massing more than a normal operating supply of the scarce items. Penalties of a year in prison or a \$10,000 fine, or both, are provided.

At 10 o'clock at the residence of Mr. David Stalls on Church Street. The contracting parties being Mr. Mack S. Taylor and Miss Temple Stalls, daughter of Mr. David Stalls, Elder John R.
