

U. N. Group Finds Homemakers Will Meet In Creswell

Lake Success, New York—The world would not have to fear a shortage of iron and steel, if the basic resources—iron ore and coking coal—of the underdeveloped areas were properly exploited.

These facts are among those brought out in a report titled "World Iron Ore Reserves and Their Utilization in Under-Developed Areas," prepared by the United Nations Subcommittee on Economic Development and Stability.

The report—the first to be issued in a series of projected resources studies, dealing mainly with basic resources and their utilization in underdeveloped regions—finds that on the basis of their iron and coking coal reserves, China and India can achieve an annual production rate of 20,000,000 tons or more than 10 times their present output.

Latin America also has enormous reserves of high grade iron ores, although it has little high quality coking coal well located in relations to ores and markets. Large scale utilization of ore reserves depends upon the development of techniques for reducing the use of coking coal, or upon its importation, the report points out.

Shortage of coking coal is the limiting factor in Africa, which has extensive coal reserves. Exchange of North African iron ore for European coking coal is, how-

More than six hundred Future Homemakers of America from fourteen counties are expected for the District I rally to be held in the school auditorium at Creswell on Saturday of this week.

The meeting will open at 10:00 o'clock that morning and close at 3:00 o'clock that afternoon, it was announced. Rev. Paul B. Nickens of Plymouth will address the group and there will a talent show to feature the entertainment ever, possible at low shipping costs.

The larger and more populous underdeveloped countries already have the beginnings of a modern iron and steel industry. Yet their combined production is small, aggregating only five per cent of the world total.

The report sees increased imports of iron ores from the underdeveloped countries by industrial nations as a means of helping their economic development without impairing reserves for their own use.

Installation of modern steel mills in the underdeveloped areas of the world would require large capital investment, the report discloses. It is estimated that at present day prices in the USA, a plant containing blast furnaces, coke oven, steel works and a continuous widestrrip mill of a million tons capacity, would cost upwards of \$250,000,000.

CONFLICT! Barbra Fuller, headed for trouble, rejects the warnings of her friend Virginia Huston in a dramatic scene from "Women from Headquarters" which comes to the Watts Theatre Saturday. The exciting Republic film reveals for the first time the fascinating and dangerous part women play in the Police Department of a metropolitan city.

program. The meeting is to elect a State Parliamentarian from the District for the year 1951-52. Miss "Toddy" Smith of Bethel, State historian, will preside over the meeting and report on the national meeting

which she attended in Kansas City. Luncheon will be served in the cafeteria.

All counties in the district, including Beaufort, Pitt, Washington, Tyrrell, Halifax, Martin, Hertford, Bertie, Chowan, Perquimans,

Happenings In Hassell School

Our school is small but one to be proud of in many ways.

We have six grades and two teachers. The teachers are like mothers to us and we love them. We are one big family.

Our school day starts with a devotional period. Miss Bee reads Bible stories and asks questions about them. Mrs. Leggett is reading us a book called "The Beggar Boy of Galilee." It is about a beggar boy, Caleb, and his blind father, Bartimalus trying to find Jesus so that Bartimalus might get his eyes opened. It was exciting when they found Jesus. It almost made us cry with joy when he could see Caleb for the first time.

The first lesson in our room is geography. We have really enjoyed studying about World War II and the Korean War. The Korean War is not in our book but Mrs. Leggett has shown us maps and told us how and why it started. We like to follow our troops on the map.

Our other lessons are interesting but we have enjoyed most Pasquotank, Hyde, Gates and Northampton, are expected to send delegates.

making calendars for October. We put Halloween pictures on most of them. They are on our wall.

The Sixth Grade Fourth, Fifth, and Sixth Grades On Wednesday September 13 Miss Beal and Mr. Tuten met with the fourth, fifth, and sixth grades, and organized our 4-H Club for this year.

Officers were elected: George

Edward Purvis, President; Joan Burroughs, Vice-President; Bobby Haislip, Secretary; Ray Jones and Mary Ethel Edmondson were chosen as song leaders.

Miss Dixie Howell comes to our school each Wednesday afternoon, for our public school music and piano lessons. We always like to see her come.

Last Thursday, Mrs. Leggett,

our teacher, carried us in the woods to look for moss and leaves. We had lots of fun.

Wanted—by Almost Half the People!

According to a recent widespread survey—almost half the motor car owners in the United States would choose a Cadillac, if they had their unrestricted choice.

Cadillac was voted the favorite by more than five to one over any other motor car built in America—a degree of leadership that is probably without parallel in the whole of American industry.

This is, of course, a tremendous tribute to Cadillac, and to those who have designed it so well and built it so soundly for so long a time. But we think it is, equally, a tribute to the American people themselves.

Only a small percentage of American motorists have ever owned or driven a Cadillac—or, for that matter, so much as enjoyed a ride in one.

But that has not hindered the public in general from sensing the soundness of the Cadillac ideal—or from giving its wholehearted approval to the Cadillac crusade for quality. Where the effort is worthy—the American people approve.

We regret exceedingly that not every one who wants a Cadillac can own one. But we believe, sincerely, that many have needlessly denied themselves the pleasure.

Cadillac cars are far more practical and

economical to own than most people realize.

It costs less to buy the lower-priced Cadillacs than it costs to buy certain models of numerous other makes of cars.

Furthermore, under normal driving conditions, a single tankful of gasoline will usually suffice for a whole day's drive.

And, of course, when it comes to *endurance*, a Cadillac stands alone—for its life-span has never been fully measured.

Yes, for a very wide group of people, a Cadillac car is a sensible, practical buy. We hope sincerely that it is for you.
