

Take Orders For Pine Seedlings

M. H. Leggett, Martin County Forest Warden, urges everyone who expects to plant pine seedlings this winter to get their orders into the Raleigh office. Leggett says it is very probable that the State Forestry Nursery may again run out of these seedlings very soon. All orders placed early most likely will be filled. All pine seedlings will be ready for delivery sometime after December 1st. Red cedars will be ready after January 1st. The cost of the pine seedlings is \$3.00 per thousand; red cedars \$3.50 per thousand. One thousand seedlings will plant approximately one acre. Also available in lots of 500 or above are black walnut and black locust. For further information contact your county forest warden, agriculture teacher or county agent.

A backward glance into the Roaring Twenties, complete with beaded skirts above the knees and Minnie Mouse shoes, adds hilarity to the famous Barter Theatre's production of "The Show-Off" by George Kelly. The two flappers pictured above, Misses Patricia O'Connell and Joyce Savage, will be seen here when the nostalgic comedy is presented at Williamston on November 29 under the auspices of Williamston Jaycees.

Circular Issued On Income Tax

The State College Extension Service announces publication of "Farmer's 1950 Income Tax," a 24-page booklet designed to help farmers with their 1950 income tax problems. Copies are available on request.

The circular approved by the U. S. Bureau of Internal Revenue, was prepared by extension farm management Specialists W. L. Turner of North Carolina, E. D. Chastain, Jr., of Virginia, and Luke M. Schruben and E. P. Callahan of the U. S. Department of Agriculture.

Among the subjects covered are forms needed, who must file a return, figuring depreciation, reporting sales of livestock, handling croppers' shares, and reporting agricultural program payments. Eight pages are devoted to illustrations showing forms filled out correctly.

Persons desiring single copies of the publication should address requests to Extension Farm Management Department, N. C. State College, Raleigh, and ask for Extension Circular No. 358, "Farmer's 1950 Income Tax."

Cancer Clinic In Elizabeth City

The Northeastern Carolina Cancer Detection Clinic will be held Friday, December 1, in the Elizabeth City Health Center. Registration will be from 1:00 to 2:30 p. m.

Examinations are free to all women thirty-five or over, all men forty or over, and to anyone with a symptom or a "danger signal," regardless of age.

The clinic is now held every other Friday, and frequently there are more applicants for examination than can be accommodated. Therefore in order that those who live at a distance may be sure of an examination, priorities will be sent, on request, to all who live twenty miles or more from Elizabeth City. Address request to: Cancer Center Clerk, Health Center, Cedar Street.

THE STATE FLOWER—The Dogwood

Legend says that during Christ's time, the Dogwood was so tall and strong, it was chosen to furnish the timber of which the cross was made. This distressed the tree and Jesus said to it, "Because of your sympathy for My suffering I promise you this. Never again will you attain such size that you can be used as a cross. Also your blossoms shall be in the form of a cross with two short and two long petals, and at the outer edge of each of your petals, in the center, shall be the print of the nail and in the center of your flower, which shall appear stained with blood and brown with rust, there shall be a crown of thorns."

SPRY AND MIGHTY POWER PLANT

with a proud pedigree

HERE you behold the up-to-the-minute version of a high-compression engine that has taught a whole industry something about fuel efficiency.

Fact is, Buick pioneered the deep-breathing valve-in-head engine 47 years ago—and thus blazed a trail that aircraft engines—and more recently automobile engines—have followed.

But don't let that ancient lineage fool you.

Today's Buick engine is not simply a valve-in-head. It's a Fireball—which means that it uses fuel-saving, power-peaking principles that are found in no other motorcar on America's highways.

"This is all very well," you say, "but what does it do for me?"

Mister, that's what we'd like to show you.

Come settle yourself at the graceful Buick wheel. Gently press the handy gas treadle—and feel this spry and mighty motor come to life.

Then head for the open road, and discover what a whale of a lot of fun it can be to have Fireballs under your hood.

Better come in soon, and get acquainted with the engine—and the automobile—that have won more than 200,000 owners of other cars to 1950 Buicks.

Pushing into the cylinder, the fuel charge strikes the Turbo-top piston—swirls into a tiny cyclone of terrific turbulence that gives a mighty power-push to the ignited fuel.

No other motorcar engine can match these features

- TURBO-TOP piston heads roll the incoming charge of fuel into a whirling "Fireball"
- MICROPOISE BALANCING after assembly keeps Buick engines within 1/4 of an "ounce-inch" of perfect balance
- HI-POISED MOUNTINGS cradle the engine for smoother action
- CYLINDER BLOCKS are super-precision-bored and double-honed for perfect dimensioning
- FLEX-FIT RINGS snug up against cylinder walls, increase oil economy
- DUREX BEARINGS provide unsurpassed bearing life
- FLITEWEIGHT PISTONS combine lightness with hardness and strength
- CYLINDERS are individually cooled to prevent distortion
