

Green Wave Plays Robersonville On Local Field Friday

Williamston Defeated Aces Of Edenton 11-0 Tuesday At Edenton

Behind the one-hit, twelve-strikeout pitching of James Perry, the Williamston Green Wave defeated the Edenton Aces, 11-0, Friday, with Gerald Griffin pacing the attack on a home run and two singles. Willie Hardison banged out a double and two singles. Perry two doubles and Billy Mobley three singles.

The Green Wave will play the Rams of Robersonville High on the Williamston diamond tomorrow, Friday, afternoon.

Edenton had only two men to reach first base safely, both in the

fourth inning, when the first man up was hit by a pitched ball and the third man up singled. Both were ineffective because Catcher Willie Hardison threw to Alvin Hardison to catch the first man and the second died on first base. Perry struckout the side in order in the second and sixth innings.

Williamston scored one run in the first inning when Gerald Griffin singled and tallied on Perry's double. In the second inning the Green Wave almost batted around as Willie Hardison walked, Foggy Gurkin singled but was thrown out trying to steal. Jimmy Rogers sacrificed and Wayne Rawls singled. Billy Mobley singled and Gerald Griffin cleaned the bases with a home run. Alvin Hardison got his only hit of the game but was stranded. He has now hit safely in every game to date. Williamston did bat all the way around in the third inning but netted only three runs on four hits, including a double by Willie Hardison.

Egg Nature's Own Nutrient Capsule

"The egg is nature's own nutrient capsule in the most concentrated form," according to Henry W. Garren, assistant research professor of poultry science, N. C. State College.

Garren, hired under North Carolina's Nickels for Know-How program through which farmers help foot the bill of agricultural research by paying a few pennies extra when they buy fertilizer, says that in addition to vitamins A, D, G, B1 and B12, and others, the egg is an excellent source of protein, calcium, phosphorus and iron.

"The vitamins alone contained in the egg are worth more in human nutrition than the cost of a dozen eggs. Since all vitamins and other nutrients have not been isolated and identified, the egg very probably contains more unidentified factors essential to our nutrition."

And for those on diets, the egg serves another purpose, according to Garren. "Since most of us consume more calories than we need,

It has come to the attention of this department that Wayne Rawls has been listed in previous box scores as Jack Rawls. Wayne has been doing a good job and his batting has been good, five hits in 11 times at bat.

GETS SCHOLARSHIP

Miss Nancy Carol Rawls, senior at Robersonville High School, has been awarded the Trustees Scholarship at Chowan College for the school year beginning September 1, 1954, according to an announcement made jointly by President F. O. Mixon and Dean L. R. Grogan. Miss Rawls, the daughter of Mr. and Mrs. Benjamin O. Rawls, won the full scholarship on the basis of a competitive examination given at the College April 10. The scholarship is awarded annually to a senior from North Carolina or Tidewater Virginia.

Garden Time In Eastern Carolina

By Robert Schmidt

A good lawn, well kept, is a beautiful thing and is an asset to any property. This is not the proper season to plant lawn grasses—except Bermuda and Centipede—but from now on through the hot weather is the critical period in the maintenance of the lawn.

A lawn should be fertilized every five to six weeks throughout the growing season. If you haven't already done so, put on an application of a good garden fertilizer such as a 6-8-6 at the rate of 20 pounds per 1,000 square feet. Water this in or apply it just before a rain. For the remainder of the season use about five pounds of nitrate of soda per 1,000 square feet at each application. This should be applied when the grass is dry and preferably just before a rain.

Watering is a very important operation. Soak the soil thoroughly at least once a week during dry weather rather than light sprinklings each day, although these light sprinklings do some good. Frequent cutting is desirable, but close cutting will do much

harm to some of the better grasses such as bluegrass. Set the mower blades a little higher for these grasses.

If you have a good stand of grass and keep it well fertilized and limed when necessary, weeds will not thrive in a lawn. If weeds become established now is a good time to eliminate them with a spray of 2, 4-D with care because it will kill your shrubs and flowers as well as the weeds. Even the spray mist carried by the wind may cause a lot of damage to other plants.

Sprays available that will kill out crabgrass without harming the principal lawn grasses.

I have recently noticed advertisements of a new spray for lawns that is supposed to keep grass from growing and therefore, make mowing unnecessary. This is a material known as maleic hydrazide which stunts the growth

All Get Stung Trying To Rob Bees On Church

Pine Bush, N. Y.—Bees made honey under the eaves of the century-old Crawford Methodist Church. Deciding to rob the hives and sell the honey to help repair the church, Burnet Decker, one of the members, was stung several times and Ira Jones did a jig for five minutes trying to get one of the bees out of his pants leg. Warren Spadola, a beekeeper, was stung on the tongue as he offered advice to the novices.

Grapefruit has been described as the most frequently used eye-wash of many plants. My advice is not to look for miracles. Don't expect all the wonderful results that are claimed for it. If you use any of it, try it out on a small scale first.
