CHRIST SHOWS HIMSELF ALIVE

LESSON TEXT-Luke 24:13-17, 25-35. GOLDEN TEXT-I am he that liveth and was dead; and, behold, I am alive for evermore.-Revelation 1:18.

Certainty and assurance - these are at the heart of our observance of Easter. We declare with Paul. "Now is Christ risen from the dead" (I Cor. 15:20), and that He is "deurrection of the Lord Jesus" (Acts

Someone may say, "That's well enough for you who have faith in God, but I'm bewildered, uncertain, fearful, in a disordered world. What shall I do?" Come with us as, in our lesson, we join two men who had become bewildered, who felt that all their hopes had been crushed, that the future was only to

We join them as they walk wearily along the road from Jerusalem to Emmaus. Suddenly there is Another with the little group. Let us listen to their conversation. First we find I. Holden Eyes and Slow Hearts

(vv. 13-17, 25, 26). The two sad men who had left Jerusalem to go to Emmaus were disciples of our Lord who had just been through the crushing experience of seeing Him crucified. Now, as the jeering mob held triumphant sway in the city, they left the dead Christ (as they supposed) in the tomb and went their way. True. there had been some reports on the morning of the third day that the women had seen Jesus alive (vv. 23, 24), but their hope and faith was at such low ebb that they could not -or did not-believe. Even when and question them, they did not

Eyes closed by unbelief; faith hindered by doubt and fear: a despond very effectively these shut out the blessing of God and of His Word, unseeing eyes and warm cold hearts

II. Burning Hearts and Opened Eyes (vv. 26-32).

Although they did not realize it (how slow we are to appreciate our blessings!) until after He was gone (v. 32), their hearts began to burn within them as soon as He began to expound the Scriptures to them.

What a Bible exposition that was as Christ Himself opened all that the Scriptures taught concerning Him! Bible teachers have talked about, ample Morgan on Luke, page 278). Little wonder that these men were "strangely warmed" as they lis-

The way to have a burning heart is to read God's Word or to have it | expounded by a Spirit-filled teacher or preacher. Especially is there blessing in reading and studying what the sacred Book teaches about Ity, and visiting friends. our blessed Lord.

With the heart "strangely warmed," as John Wesley described his Aldersgate experience, comes the opened eye. "They knew him" (v. 31) in the breaking of the bread. Perhaps they saw the scar in His hand, or possibly they identified a familiar gesture or something in His warmed they did not see. Paul knew that truth when he declared: "But the natural man receiveth not the things of the Spirit of God: for they spiritually discerned" (I Cor. 2:14). Some reader who has trouble believing in the resurrection will find the problem solved when he meets Christ and has his heart changed in regeneration. What follows?

III. Quickened Feet and Glad Testimony (vv. 33-35).

The seven miles (sixty furlongs, swift are the leet of the one who has good tidings to bear (see Rom. 10:15). One wonders why so many professed Christians are so slow about carrying His message. Can it be that they do not yet know the risen Christ? For if we know Him, surely "we do not well" to keep silent in a day of good tidings (II | trated.

Note in verse 34 that before they could speak, the others gave them the good news of the resurrection. It is proper and delightful that be- and con, about replacing stock by lievers share spiritual blessings the use of setting hens, there has (Rom. 1:11, 12). That's why we not as yet been developed an articome together in God's house.

#### NCUBATORS TAKE OVER JOB OF "SETTING HEN"

The old "setting hen" is being out out of business by artificial methods of incubation. Commervoice; but until their hearts were cial and semi-commercial poultrymen now depend almost entirely on incubators as a source of baby

In recognition of this trend, the N. C. State College extension service has published a circular (No. 249) entitled "Incubation." It describes both natural and artificial methods of incubation, and points out the advantages of artificial incubation from the standpoint of disease and parasite control, and mass production.

A copy of the circular may be btained free upon request to the Agricultural Editor, N. C. State College, Raleigh. County farm and home agents also will have supplies of this publication.

The text for the circular was prepared by Prof. R. S. Dearstyne. nead of the State College poultry department, and C. F. Parrish, T. T. Brown and C. J. Maupin, extension poultry specialists. The 12page publication is well-illus-

# SHARKS CREATE NEW INDUSTRY

War Brings Large Demand For Sharks; Formerly Worthless

(From The Fishing Gazette) A new industry has sprung up on the Pacific Coast almost ove.

Fishermen who, just a few days ago, threw away the small "ground min is necessary to human existsharks" that intruded into their ence in bone formation, tissue catches of salmon, albacore, rock growth and blood cells. It is absosharks and eliminate the fish. well as correcting the health of the \$200.00 a ton is the reason.

taken the Pacific fleets by storm. cretion glands. From Crescent City to Fort Bragg, in California, the docks are receiving Blue Fin, Soup Fin and Cow size livers are selling for \$1.00 a into fertilizer.

Sharks have long been the curse of legitimate sea-going business. But now there is a pay-off. It is no uncommon sight to witness a had cleared \$8,000.

apiece. The Cow sharks, weighing fish. finally die from lack of breathing ged bait.

These denizens of the ocean bottom are caught from 40 to 160 the surface.

Specimens such as these are istration. caught with regular halibut equipment. This means that a long anchored line is dropped from a float, and a similar one is dropped 100 to 250 yards away. A heavy connecting line, attached near the anchor and known as the "ground line," is equipped with 5-foot hook lines about every 6-foot interval along its length. These use shark hooks, the Twelve-O size, larger than the customary halibut hooks. Sole or sardines are used for bait, and on this "skate" or gear the

'ground sharks" are caught. At the dock, the catch is delivered to the fish company, weighed in and the livers quickly removed. They are placed in cold storage or are immediately iced down and trucked to market. San Francisco is the headquarters for receiving the shark livers, and here the East Bay Fisheries, the California Packers, Consolidated Fisheries, Incorporated, A. Paladini, Incorporated, and the San Francisco International Fish Company! receive the catches. Sharks caught in Oregon waters are usua!!y landed at Eureka, California, then

trucked south from there. Shark livers are now highly de-
