IS HERBERT HOOVER ELIGIBLE FOR PRESIDENTIAL NOMINATION?

A correspondent calls our attention to a provision of the Constitution, which says:

"No person except a natural-born citizen, or a citizen of the United States at the time of the adoption of this Constitution, shall be eligible to the office of President; neither shall any person be eligible to that office who shall not have attained to the age of thirty-five years and been fourteen years a resident within the United States."

In Who's Who, the following facts are given in regard to Mr. Hoover:

Herbert Clark Hoover.
Engineer; born West Branch, Ia., August 10, 1874; son Jesse Clark and Hulda Randall (Minthorn) H.; brother of Theodore Jesse H.; B. A. (in mining engineering), Leland Stanford Junior University, 1895; (L. L. D., Brown University, 1916; University of Pennsylvania, 1917); married Lou Henry, Monterey, Cal., 1899; assistant Arkansas Geological Survey, 1893; United States Geological Survey, Sierra Nevada Mountains, 1895; assistant manager Carlsbad Mines, New Mexico, and Morning Star Mines, California, 1896; in West Australia as chief of mining staff of Bewick, Moreing & Co., and manager Hannan's Brown Hill Mine, 1897; manager Sons of Gwaha and E. Murchison mines, 1898; chief engineer Chinese Imperial Bureau of Mines, 1899, doing extensive exploration in interior of China. Took part in defense of Tiensin during Box disturbances, 1900. Representative of bondholders in construction of Ching Wang Tow harbor, 1900; general manager Chinese Engineering & Mining Co., 1901; partner Bewick, Moreing & Co., mine operators, London, 1902-8; director Zinc Corporation, Ltd., Kyshtim Corporation, Ltd., Tanalyk Corporation, Ltd., Oroya Exploration Co. Ltd., Russo-Asiatic Corporation, Ltd., 1908-14; chairman of directors Burma Corporation, Ltd., Santa Gertrudis Mining Co., Camp Bird, Ltd., Irish Corporation, Ltd.; chairman American Relief Committee, London, 1914-15. Commission for Relief in Belgium since 1915; chairman Food Committee Council of National Defense, April-August, 1917; appointed United States Food Administrator by President Wilson, August 10, 1917; trustee Stanford University, fellow Royal Geographical Society; member American Institute Mining Engineers, Society Ingenieurs Civils de France, Society Belge des Ingen., et des Indust., Min. and Metall. Society, A. A. A. S., Hakuyt Society, etc. Clubs: Pacific Union, Bohemian (San Francisco); Burlingame (Cal.); University, Metropolitan, Lawyers, Bankers (New York); Metropolitan, Cosmos, Chevy Chase (Washington). Author: Economics of Mining (joint author), 1906; Principles of Mining, 1909; translator Agricola's De Re Metallica, 1912. Contributor to technical publications. Address, United States Food Administration, Washington, D. C.

According to this statement it would look as though he was not living in the United States between 1897 and 1917, or a period of 20 years. It may be however, that Mr. Hoover was during a portion of that time a resident within the United States, but in view of his very great activities abroad he certainly could not have been here many months during that 20-year period. We rather doubt, however, whether this would militate against his nomination, since technically the law would probably call him a resident even though for the greater part of the time he was living abroad.

The interesting fact in connection with the matter, however, is the amazing activity of Mr. Hoover in

connection with mining operations throughout the world. He has certainly had an experience in this respect probably not surpassed by any other mining engineer or geologist of this or any other land—Manufacturers Record.

"Our Yield Larger than any Other in this Vicinity." Mr. Thomas Earle, Sterling, Pa., says: "This season we used Bonker's Pyrox on about half an acre of potatoes. We had an exceedingly dry season, but we had a large yield per acre than any other in the vicinity—due largely, we believe, to the use of Pyrox—as the plants kept green and healthy longer than those that were not sprayed." This voices the experience of potato growers everywhere. Pyrox kills the bugs; prevents blight and, as it sticks like paint on the leaves, one application does the work of several applications of Paris Green. Follow the lead of the big potato growers and orchardists—there is no sentiment about their enthusiastic use of Pyrox—it gets them the money. We sell Pyrox—any quantity you want, in small crocks, kegs or barrels. Ask for the new and interesting Pyrox booklet. EDGEcombe DRUG CO.
