### BIBLE GEMS.

There hath no temptation taken you, but such as is common to man; God is faithful, who will not suffer you to be tempted above what ye are able, but will also make a way of escape, that ye may be able to hear it.—1 Cor. 10:13.

Watch and pray that ye not into temptation.—Matt. 26:41.

### HOW WE COMPLAIN.

The following clipping from the Greensboro News is a good text for a sermon on economy:

"When you take a \$1,500 motor truck, driven by a chauffeur who is paid anything from \$5 a day up, and use the outfit, consuming a dime's worth of gasoline and a quarter's worth of wear and tear on the tires and machinery, to deliver 15 cents' worth of prunes, there is an economic waste involved—a waste that somebody has to make good."

There are people who will use the telephone to order to their homes one yeast cake, the cost of which is only three cents, and the merchant is expected to deliver it in a truck or by a special messenger boy.

And this is not all, this little piece of yeast cake must be charged.

I heard a merchant say not many days ago that if he had not been forced to purchase trucks for delivery of his goods, he was satisfied he would be worth today at least from five to ten thousand dollars more than he is. He stated that while he could deliver more goods and in a shorter time than when he used the horse, yet his delivery expenses had increased greatly.

The News further strikes home when it says:

"One important reason why the cost of living is as high as it is lies in the fact that there are too many housewives in this town who are ashamed to be seen with market-baskets on their arms."

It was a noble act on the part of Dr. Adolph Lorenz of Vienna to come to this country and treat free of charge thousands of our people, to show his gratitude and that of his country for the aid given by Americans to the people of Austria after the world war had closed. He diagnosed in a few hours enough cases to keep the surgeons busy for six months in operations. Well have all Americans done this great surgeon honor.

This country today has on hand 3,452,000,000 bushels of corn. This is 370,000,000 bushels more than we ever consumed and exported in one year in previous history. These figures are stunning, and yet there are millions of people in Europe starving for bread, and it is said, corn will be used for fuel this winter by the western farmers. The old adage, that it is great to make two blades of grass grow where one formerly grew, seems exploded with the corn figures before us.

If we were to start a comprehensive campaign among the farmers of the South, we would call it a "Live-at-Home" campaign. The only solution of overproduction of what is known as the surplus crops is to live at home.

meat, flour and corn bread. The time given to home supplies reduces much time given to money crops, but it does look like our Southern people will never learn to live at home. What overproduction has not done will be accomplished sooner or later by the boll-weevil.

### STUDY OF HUMAN FRAILTIES.

The National Surety Company of New York has recently published some interesting statistics. The authors of this report are forced to make a close study of human merits and human frailties.

This Chinese race leads in honesty and the Anglo-Saxons come next.

It is stated that the man who loses his money is the least dishonest.

Profane men, fat men and married men are considered good risks. The report also states that married men are more honest than bachelors by a ratio of six to one.

Women, as compared with men are by far the most honest, and when they do go wrong, says the Detective Magazine, it is either due to vanity and love of money or in quest of relief from dire poverty.

But strangest of all, the statistics on the "crank" or the "nut" makes excellent risks. On the other hand, the "sleek, vily person who agrees with everything that is said, and rarely expresses an opinion is a bad risk."

Most money is lost by the "trusted employee."

There are thieves at all ages, but as far as age is concerned, young men with unformed characters are the chief offenders.

This magazine states that margin speculation leads to more embezzlement than anything else.
